

States' Biofuels Statutes

STATE OF CALIFORNIA

This project was undertaken in partnership with the USDA Office of the Chief Economist, The Office of Energy Policy and New Uses. For information on the full project, visit [States' Biofuels Statutory Citations](#). These statutes are placed in reverse chronological order using the date of the most recent amendment to the statute. Many biofuels laws were enacted as amendments to previously passed laws.

Current through the 2013 Legislative Session of the California General Assembly.

§ 17912. Design and administration; duties of commission

The demonstration program established by this chapter shall be designed and administered by the commission, with the advice and consultation of the department and the superintendent. The commission shall insure that fuel economy and exhaust emissions are monitored as a part of the demonstration, and shall ensure that at least 35 percent of the vehicles are powered by methanol or other low-emission, clean-burning fuels, unless the commission determines, within 18 months of the effective date of this act, that the use of these funds for clean burning fuel projects is infeasible. The commission shall, within 30 days of making that determination, submit a report to the Legislature explaining its determination with respect to the feasibility or infeasibility of the project. The field demonstration shall be in accordance with State Energy Conservation Program guidelines.
