

States' Biofuels Statutes

STATE OF INDIANA

This project was undertaken in partnership with the USDA Office of the Chief Economist, The Office of Energy Policy and New Uses. For information on the full project, visit [States' Biofuels Statutory Citations](#). These statutes are placed in reverse chronological order using the date of the most recent amendment to the statute. Many biofuels laws were enacted as amendments to previously passed laws.

Current through the 2013 Legislative Session of the Indiana General Assembly.

36-7-32-7 “High technology activity” defined

Sec. 7. As used in this chapter, “high technology activity” means one (1) or more of the following:

- (1) Advanced computing, which is any technology used in the design and development of any of the following:
 - (A) Computer hardware and software.
 - (B) Data communications.
 - (C) Information technologies.
- (2) Advanced materials, which are materials with engineered properties created through the development of specialized process and synthesis technology.
- (3) Biotechnology, which is any technology that uses living organisms, cells, macromolecules, microorganisms, or substances from living organisms to make or modify a product, improve plants or animals, or develop microorganisms for useful purposes. Biotechnology does not include human cloning or stem cell research with embryonic tissue.
- (4) Electronic device technology, which is any technology that involves:
 - (A) microelectronics, semiconductors, or electronic equipment;
 - (B) instrumentation, radio frequency, microwave, and millimeter electronics;
 - (C) optical and optic electrical devices; or

(D) data and digital communications and imaging devices.

(5) Engineering or laboratory testing related to the development of a product.

(6) Technology that assists in the assessment or prevention of threats or damage to human health or the environment, including environmental cleanup technology, pollution prevention technology, or development of alternative energy sources.

(7) Medical device technology, which is any technology that involves medical equipment or products other than a pharmaceutical product that has therapeutic or diagnostic value and is regulated.

(8) Product research and development.

(9) Advanced vehicles technology, which is any technology that involves:

(A) electric vehicles, hybrid vehicles, or alternative fuel vehicles; or

(B) components used in the construction of electric vehicles, hybrid vehicles, or alternative fuel vehicles.
