Nutrient Management Plans

STATE OF VIRGINIA

1) Va. Code Ann. § 62.1-44.15(5), (5a), (5b); 9 VAC 25-31-10, 20, 60, 130, 170, 190, 200(E), 9 VAC 25-191

2) Va. Code Ann. § 62.1-44.15(5), (5a), (5b); 9 VAC 25-32(10), (20), (30), (250), (255), 9 VAC 25-192(10), (20), (25), (50), (60), (70), (80), (90)(A), (C)—(F), 9 VAC 25-630(10), (20), (25), (30), (40), (50), (60), (70), (80)(A), (C)—(F)

The statutes and Constitution are current through the 2018 regular and special legislative sessions. The statutes are subject to changes by the Virginia Legislative Services.

1) Va. Code Ann. § 62.1-44.15(5), (5a), (5b); 9 VAC 25-31-10, 20, 60, 130, 170, 190, 200(E), 9 VAC 25-191

§ 62.1-44.15. (For expiration date -- see notes) Powers and duties; civil penalties

It shall be the duty of the Board and it shall have the authority:

[. . .]

(5) To issue, revoke or amend certificates under prescribed conditions for: (a) the discharge of sewage, industrial wastes and other wastes into or adjacent to state waters; (b) the alteration otherwise of the physical, chemical or biological properties of state waters; (c) excavation in a wetland; or (d) on and after October 1, 2001, the conduct of the following activities in a wetland: (i) new activities to cause draining that significantly alters or degrades existing wetland acreage or functions, (ii) filling or dumping, (iii) permanent flooding or impounding, or (iv) new activities that cause significant alteration or degradation of existing wetland acreage or functions. However, to the extent allowed by federal law, any person holding a certificate issued by the Board that is intending to upgrade the permitted facility by installing technology, control equipment, or other apparatus that the permittee demonstrates to the satisfaction of the Director will result in improved energy efficiency, reduction in the amount of nutrients discharged, and improved water quality shall not be required to obtain a new, modified, or amended permit. The permit holder shall provide the demonstration anticipated by this subdivision to the Department no later than 30 days prior to commencing construction.

(5a) All certificates issued by the Board under this chapter shall have fixed terms. The term of a Virginia Pollution Discharge Elimination System permit shall not

exceed five years. The term of a Virginia Water Protection Permit shall be based upon the projected duration of the project, the length of any required monitoring, or other project operations or permit conditions; however, the term shall not exceed 15 years. The term of a Virginia Pollution Abatement permit shall not exceed 10 years, except that the term of a Virginia Pollution Abatement permit for confined animal feeding operations shall be 10 years. The Department of Environmental Quality shall inspect all facilities for which a Virginia Pollution Abatement permit has been issued to ensure compliance with statutory, regulatory, and permit requirements. Department personnel performing inspections of confined animal feeding operations shall be certified under the voluntary nutrient management training and certification program established in § 10.1-104.2. The term of a certificate issued by the Board shall not be extended by modification beyond the maximum duration and the certificate shall expire at the end of the term unless an application for a new permit has been timely filed as required by the regulations of the Board and the Board is unable, through no fault of the permittee, to issue a new permit before the expiration date of the previous permit.

(5b) Any certificate issued by the Board under this chapter may, after notice and opportunity for a hearing, be amended or revoked on any of the following grounds or for good cause as may be provided by the regulations of the Board:

1. The owner has violated any regulation or order of the Board, any condition of a certificate, any provision of this chapter, or any order of a court, where such violation results in a release of harmful substances into the environment or poses a substantial threat of release of harmful substances into the environment or presents a hazard to human health or the violation is representative of a pattern of serious or repeated violations which, in the opinion of the Board, demonstrates the owner's disregard for or inability to comply with applicable laws, regulations, or requirements;
2. The owner has failed to disclose fully all relevant material facts or has misrepresented a material fact in applying for a certificate, or in any other report or document required under this law or under the regulations of the Board;
3. The activity for which the certificate was issued endangers human health or the environment and can be regulated to acceptable levels by amendment or revocation of the certificate; or
4. There exists a material change in the basis on which the permit was issued that requires either a temporary or a permanent reduction or elimination of any discharge controlled by the certificate necessary to protect human health or the environment.

9 VAC 25-31-10. Definitions.

"Act" means Federal Water Pollution Control Act, also known as the Clean Water Act (CWA), as amended, 33 USC § 1251 et seq.

"Administrator" means the Administrator of the United States Environmental Protection Agency, or an authorized representative.

"Animal feeding operation" or "AFO" means a lot or facility (other than an aquatic animal production facility) where the following conditions are met: (i) animals (other than aquatic animals) have been, are, or will be stabled or confined and fed or maintained for a total of 45 days or more in any 12-month period, and (ii) crops, vegetation forage growth, or post-harvest residues are not sustained in the normal growing season over any portion of the lot or facility.

"Applicable standards and limitations" means all state, interstate, and federal standards and limitations to which a discharge, a sewage sludge use or disposal practice, or a related activity is subject under the CWA (33 USC § 1251 et seq.) and the law, including effluent limitations, water quality standards, standards of performance, toxic effluent standards or prohibitions, best management practices, pretreatment standards, and standards for sewage sludge use or disposal under §§ 301, 302, 303, 304, 306, 307, 308, 403 and 405 of CWA.

"Approval authority" means the Director of the Department of Environmental Quality.

"Approved POTW Pretreatment Program" or "Program" or "POTW Pretreatment Program" means a program administered by a POTW that meets the criteria established in Part VII (9VAC25-31-730 et seq.) of this chapter and which has been approved by the director or by the administrator in accordance with 9VAC25-31-830.

"Approved program" or "approved state" means a state or interstate program which has been approved or authorized by EPA under 40 CFR Part 123.

"Aquaculture project" means a defined managed water area which uses discharges of pollutants into that designated area for the maintenance or production of harvestable freshwater, estuarine, or marine plants or animals.

"Average monthly discharge limitation" means the highest allowable average of daily discharges over a calendar month, calculated as the sum of all daily discharges measured during a calendar month divided by the number of daily discharges measured during that month.

"Average weekly discharge limitation" means the highest allowable average of daily discharges over a calendar week, calculated as the sum of all daily discharges measured during a calendar week divided by the number of daily discharges measured during that week.

"Best management practices" or "BMPs" means schedules of activities, prohibitions of practices, maintenance procedures, and other management practices to implement the prohibitions listed in 9VAC25-31-770 and to prevent or reduce the pollution of surface waters. BMPs also include treatment requirements, operating procedures, and practices to control plant site run-off, spillage or leaks, sludge or waste disposal, or drainage from raw material storage.

"Biosolids" means a sewage sludge that has received an established treatment and is managed in a manner to meet the required pathogen control and vector attraction reduction, and contains concentrations of regulated pollutants below the ceiling limits established in 40 CFR Part 503 and 9VAC25-31-540, such that it meets the standards established for use of biosolids for land application, marketing, or distribution in accordance with this chapter. Liquid biosolids contains less than 15% dry residue by weight. Dewatered biosolids contains 15% or more dry residue by weight.

"Board" means the Virginia State Water Control Board or State Water Control Board.

"Bypass" means the intentional diversion of waste streams from any portion of a treatment facility.

"Class I sludge management facility" means any POTW identified under Part VII (9VAC25-31-730 et seq.) of this chapter as being required to have an approved pretreatment program and any other treatment works treating domestic sewage classified as a Class I sludge management facility by the regional administrator, in conjunction with the director, because of the potential for its sludge use or disposal practices to adversely affect public health and the environment.

"Concentrated animal feeding operation" or "CAFO" means an AFO that is defined as a Large CAFO or as a Medium CAFO, or that is designated as a Medium CAFO or a Small CAFO. Any AFO may be designated as a CAFO by the director in accordance with the provisions of 9VAC25-31-130 B.

1. "Large CAFO." An AFO is defined as a Large CAFO if it stables or confines as many or more than the numbers of animals specified in any of the following categories:

- a. 700 mature dairy cows, whether milked or dry;
- b. 1,000 veal calves;
- c. 1,000 cattle other than mature dairy cows or veal calves. Cattle includes but is not limited to heifers, steers, bulls and cow/calf pairs;
- d. 2,500 swine each weighing 55 pounds or more;
- e. 10,000 swine each weighing less than 55 pounds;

- f. 500 horses;
- g. 10,000 sheep or lambs;
- h. 55,000 turkeys;
- i. 30,000 laying hens or broilers, if the AFO uses a liquid manure handling system;
- j. 125,000 chickens (other than laying hens), if the AFO uses other than a liquid manure handling system;
- k. 82,000 laying hens, if the AFO uses other than a liquid manure handling system;
- l. 30,000 ducks, if the AFO uses other than a liquid manure handling system; or
- m. 5,000 ducks if the AFO uses a liquid manure handling system.

2. "Medium CAFO." The term Medium CAFO includes any AFO with the type and number of animals that fall within any of the ranges below that has been defined or designated as a CAFO. An AFO is defined as a Medium CAFO if:

- a. The type and number of animals that it stables or confines falls within any of the following ranges:
 - (1) 200 to 699 mature dairy cattle, whether milked or dry;
 - (2) 300 to 999 veal calves;
 - (3) 300 to 999 cattle other than mature dairy cows or veal calves. Cattle includes but is not limited to heifers, steers, bulls and cow/calf pairs;
 - (4) 750 to 2,499 swine each weighing 55 pounds or more;
 - (5) 3,000 to 9,999 swine each weighing less than 55 pounds;
 - (6) 150 to 499 horses;
 - (7) 3,000 to 9,999 sheep or lambs;
 - (8) 16,500 to 29,999 laying hens or broilers, if the AFO uses a liquid manure handling system;

(9) 37,500 to 124,999 chickens (other than laying hens), if the AFO uses other than a liquid manure handling system;

(10) 25,000 to 81,999 laying hens, if the AFO uses other than a liquid manure handling system;

(11) 10,000 to 29,999 ducks, if the AFO uses other than a liquid manure handling system;

(12) 1,500 to 4,999 ducks, if the AFO uses a liquid manure handling system; and

b. Either one of the following conditions are met:

(1) Pollutants are discharged into surface waters of the state through a man-made ditch, flushing system, or other similar man-made device; or

(2) Pollutants are discharged directly into surface waters of the state that originate outside of and pass over, across, or through the facility or otherwise come into direct contact with the animals confined in the operation.

3. "Small CAFO." An AFO that is designated as a CAFO and is not a Medium CAFO.

"Concentrated aquatic animal production facility" means a hatchery, fish farm, or other facility which meets the criteria of this definition, or which the board designates under 9VAC25-31-140. A hatchery, fish farm, or other facility is a concentrated aquatic animal production facility if it contains, grows, or holds aquatic animals in either of the following categories:

1. Cold water fish species or other cold water aquatic animals in ponds, raceways, or other similar structures which discharge at least 30 days per year but does not include:

a. Facilities which produce less than 9,090 harvest weight kilograms (approximately 20,000 pounds) of aquatic animals per year; and

b. Facilities which feed less than 2,272 kilograms (approximately 5,000 pounds) of food during the calendar month of maximum feeding; or

2. Warm water fish species or other warm water aquatic animals in ponds, raceways, or other similar structures which discharge at least 30 days per year, but does not include:

- a. Closed ponds which discharge only during periods of excess run-off; or
- b. Facilities which produce less than 45,454 harvest weight kilograms (approximately 100,000 pounds) of aquatic animals per year.

Cold water aquatic animals include, but are not limited to, the Salmonidae family of fish (e.g., trout and salmon).

Warm water aquatic animals include, but are not limited to, the Ictaluridae, Centrarchidae and Cyprinidae families of fish (e.g., respectively, catfish, sunfish and minnows).

"Contiguous zone" means the entire zone established by the United States under Article 24 of the Convention on the Territorial Sea and the Contiguous Zone (37 FR 11906).

"Continuous discharge" means a discharge which occurs without interruption throughout the operating hours of the facility, except for infrequent shutdowns for maintenance, process changes, or other similar activities.

"Control authority" refers to the POTW if the POTW's pretreatment program submission has been approved in accordance with the requirements of 9VAC25-31-830 or the approval authority if the submission has not been approved.

"Co-permittee" means a permittee to a VPDES permit that is only responsible for permit conditions relating to the discharge for which it is the operator.

"CWA" means the Clean Water Act (33 USC § 1251 et seq.) (formerly referred to as the Federal Water Pollution Control Act or Federal Water Pollution Control Act Amendments of 1972) Public Law 92-500, as amended by Public Law 95-217, Public Law 95-576, Public Law 96-483, Public Law 97-117, and Public Law 100-4.

"CWA and regulations" means the Clean Water Act (CWA) and applicable regulations promulgated thereunder. For the purposes of this chapter, it includes state program requirements.

"Daily discharge" means the discharge of a pollutant measured during a calendar day or any 24-hour period that reasonably represents the calendar day for purposes of sampling. For pollutants with limitations expressed in units of mass, the daily discharge is calculated as the total mass of the pollutant discharged over the day. For pollutants with limitations expressed in other units of measurement, the daily discharge is calculated as the average measurement of the pollutant over the day.

"Department" means the Virginia Department of Environmental Quality.

"Designated project area" means the portions of surface within which the permittee or permit applicant plans to confine the cultivated species, using a method or plan or operation (including, but not limited to, physical confinement) which, on the basis of reliable scientific evidence, is expected to ensure that specific individual organisms comprising an aquaculture crop will enjoy increased growth attributable to the discharge of pollutants and be harvested within a defined geographic area.

"Direct discharge" means the discharge of a pollutant.

"Director" means the Director of the Department of Environmental Quality or an authorized representative.

"Discharge," when used without qualification, means the discharge of a pollutant.

"Discharge," when used in Part VII (9VAC25-31-730 et seq.) of this chapter, means "indirect discharge" as defined in this section.

"Discharge of a pollutant" means:

1. Any addition of any pollutant or combination of pollutants to surface waters from any point source; or
2. Any addition of any pollutant or combination of pollutants to the waters of the contiguous zone or the ocean from any point source other than a vessel or other floating craft which is being used as a means of transportation.

This definition includes additions of pollutants into surface waters from: surface run-off which is collected or channeled by man; discharges through pipes, sewers, or other conveyances owned by a state, municipality, or other person which do not lead to a treatment works; and discharges through pipes, sewers, or other conveyances, leading into privately owned treatment works. This term does not include an addition of pollutants by any indirect discharger.

"Discharge Monitoring Report" or "DMR" means the form supplied by the department or an equivalent form developed by the permittee and approved by the board, for the reporting of self-monitoring results by permittees.

"Draft permit" means a document indicating the board's tentative decision to issue or deny, modify, revoke and reissue, terminate, or reissue a permit. A notice of intent to terminate a permit, and a notice of intent to deny a permit are types of draft permits. A denial of a request for modification, revocation and reissuance, or termination is not a draft permit. A proposed permit is not a draft permit.

"Effluent limitation" means any restriction imposed by the board on quantities, discharge rates, and concentrations of pollutants which are discharged from point sources into surface waters, the waters of the contiguous zone, or the ocean.

"Effluent limitations guidelines" means a regulation published by the administrator under § 304(b) of the CWA to adopt or revise effluent limitations.

"Environmental Protection Agency" or "EPA" means the United States Environmental Protection Agency.

"Existing source" means any source which is not a new source or a new discharger.

"Facilities or equipment" means buildings, structures, process or production equipment or machinery which form a permanent part of a new source and which will be used in its operation, if these facilities or equipment are of such value as to represent a substantial commitment to construct. It excludes facilities or equipment used in connection with feasibility, engineering, and design studies regarding the new source or water pollution treatment for the new source.

"Facility or activity" means any VPDES point source or treatment works treating domestic sewage or any other facility or activity (including land or appurtenances thereto) that is subject to regulation under the VPDES program.

"General permit" means a VPDES permit authorizing a category of discharges under the CWA and the law within a geographical area.

"Hazardous substance" means any substance designated under the Code of Virginia and 40 CFR Part 116 pursuant to § 311 of the CWA.

"Incorporated place" means a city, town, township, or village that is incorporated under the Code of Virginia.

"Indian country" means (i) all land within the limits of any Indian reservation under the jurisdiction of the United States government, notwithstanding the issuance of any patent, and including rights-of-way running through the reservation; (ii) all dependent Indian communities with the borders of the United States whether within the originally or subsequently acquired territory thereof, and whether within or without the limits of a state; and (iii) all Indian allotments, the Indian titles to which have not been extinguished, including rights-of-way running through the same.

"Indirect discharge" means the introduction of pollutants into a POTW from any nondomestic source regulated under § 307(b), (c) or (d) of the CWA and the law.

"Indirect discharger" means a nondomestic discharger introducing pollutants to a POTW.

"Individual control strategy" means a final VPDES permit with supporting documentation showing that effluent limits are consistent with an approved wasteload allocation or other documentation that shows that applicable water quality standards will be met not later than three years after the individual control strategy is established.

"Industrial residual" means solid or semisolid industrial waste including solids, residues, and precipitates separated or created by the unit processes of a device or system used to treat industrial wastes.

"Industrial user" or "user" means a source of indirect discharge.

"Industrial wastes" means liquid or other wastes resulting from any process of industry, manufacture, trade, or business, or from the development of any natural resources.

"Interference" means an indirect discharge which, alone or in conjunction with an indirect discharge or discharges from other sources, both: (i) inhibits or disrupts the POTW, its treatment processes or operations, or its sludge processes, use or disposal; and (ii) therefore is a cause of a violation of any requirement of the POTW's VPDES permit (including an increase in the magnitude or duration of a violation) or of the prevention of biosolids use or sewage sludge disposal in compliance with the following statutory provisions and regulations or permits issued thereunder (or more stringent state or local regulations): Section 405 of the Clean Water Act, the Solid Waste Disposal Act (SWDA) (including Title II, more commonly referred to as the Resource Conservation and Recovery Act (RCRA) (42 USC § 6901 et seq.), and including state regulations contained in any state sludge management plan prepared pursuant to Subtitle D of the SWDA) the Clean Air Act (42 USC § 701 et seq.), the Toxic Substances Control Act (15 USC § 2601 et seq.), and the Marine Protection, Research and Sanctuaries Act (33 USC § 1401 et seq.).

"Interstate agency" means an agency of two or more states established by or under an agreement or compact approved by Congress, or any other agency of two or more states having substantial powers or duties pertaining to the control of pollution as determined and approved by the administrator under the CWA and regulations.

"Land application" means, in regard to sewage, biosolids, and industrial residuals, the distribution of treated wastewater of acceptable quality, referred to as effluent, or stabilized sewage sludge of acceptable quality, referred to as biosolids, or industrial residuals by spreading or spraying on the surface of the land, injecting below the surface of the land, or incorporating into the soil with a uniform application rate for the purpose of fertilizing crops or vegetation or conditioning the soil. Sites approved for land application of biosolids in accordance with this chapter are not considered to be treatment works. Bulk disposal of stabilized sludge or industrial residuals in a confined area, such as in landfills, is not land application. For the purpose of this chapter, the use of biosolids in agricultural research and the distribution and marketing of exceptional quality biosolids are not land application.

"Land application area" means, in regard to an AFO, land under the control of an AFO owner or operator that is owned, rented, or leased to which manure, litter, or process wastewater from the production area may be applied.

"Land application area" means, in regard to biosolids, the area in the permitted field, excluding the setback area, where biosolids may be applied.

"Local ordinance" means an ordinance adopted by counties, cities, or towns in accordance with § 62.1-44.16 or 62.1-44.19:3 of the Code of Virginia.

"Log sorting facilities" and "log storage facilities" mean facilities whose discharges result from the holding of unprocessed wood, for example, logs or roundwood with bark or after removal of bark held in self-contained bodies of water (mill ponds or log ponds) or stored on land where water is applied intentionally on the logs (wet decking).

"Major facility" means any VPDES facility or activity classified as such by the regional administrator in conjunction with the board.

"Malodor" means an unusually strong or offensive odor associated with biosolids or sewage sludge as distinguished from odors normally associated with biosolids or sewage sludge.

"Man-made" means constructed by man and used for the purpose of transporting wastes.

"Manure" means manure, bedding, compost and raw materials or other materials commingled with manure or set aside for disposal.

"Maximum daily discharge limitation" means the highest allowable daily discharge.

"Municipal separate storm sewer" means a conveyance or system of conveyances, including roads with drainage systems, municipal streets, catch basins, curbs, gutters, ditches, man-made channels, or storm drains, (i) owned or operated by a state, city, town, borough, county, parish, district, association, or other public body (created by or pursuant to state law) having jurisdiction over disposal of sewage, industrial wastes, storm water, or other wastes, including special districts under state law, such as a sewer district, flood control district or drainage district, or similar entity, or an Indian tribe or an authorized Indian tribal organization or a designated and approved management agency under § 208 of the CWA, that discharges to surface waters of the state; (ii) designed or used for collecting or conveying storm water; (iii) that is not a combined sewer; and (iv) that is not part of a publicly owned treatment works (POTW).

"Municipality" means a city, town, county, district, association, or other public body created by or under state law and having jurisdiction over disposal of sewage, industrial wastes, or other wastes, or an Indian tribe or an authorized Indian tribal organization, or a designated and approved management agency under § 208 of the CWA.

"National Pollutant Discharge Elimination System" or "NPDES" means the national program for issuing, modifying, revoking and reissuing, terminating, monitoring and enforcing permits, and imposing and enforcing pretreatment requirements under §§ 307, 402, 318, and 405 of the CWA. The term includes an approved program.

"National pretreatment standard," "pretreatment standard," or "standard," when used in Part VII (9VAC25-31-730 et seq.) of this chapter, means any regulation containing pollutant discharge limits promulgated by the EPA in accordance with § 307(b) and (c) of the CWA, which applies to industrial users. This term includes prohibitive discharge limits established pursuant to 9VAC25-31-770.

"New discharger" means any building, structure, facility, or installation:

1. From which there is or may be a discharge of pollutants;
2. That did not commence the discharge of pollutants at a particular site prior to August 13, 1979;
3. Which is not a new source; and
4. Which has never received a finally effective VPDES permit for discharges at that site.

This definition includes an indirect discharger which commences discharging into surface waters after August 13, 1979. It also includes any existing mobile point source (other than an offshore or coastal oil and gas exploratory drilling rig or a coastal oil and gas developmental drilling rig) such as a seafood processing rig, seafood processing vessel, or aggregate plant, that begins discharging at a site for which it does not have a permit, and any offshore or coastal mobile oil and gas exploratory drilling rig or coastal mobile oil and gas developmental drilling rig that commences the discharge of pollutants after August 13, 1979.

"New source," except when used in Part VII (9VAC25-31-730 et seq.) of this chapter, means any building, structure, facility, or installation from which there is or may be a discharge of pollutants, the construction of which commenced:

1. After promulgation of standards of performance under § 306 of the CWA which are applicable to such source; or
2. After proposal of standards of performance in accordance with § 306 of the CWA which are applicable to such source, but only if the standards are promulgated in accordance with § 306 of the CWA within 120 days of their proposal.

"New source," when used in Part VII of this chapter, means any building, structure, facility, or installation from which there is or may be a discharge of pollutants, the construction of which commenced after the publication of proposed pretreatment standards under § 307(c) of the CWA which will be applicable to such source if such standards are thereafter promulgated in accordance with that section, provided that:

- 1.

a. The building, structure, facility, or installation is constructed at a site at which no other source is located;

b. The building, structure, facility, or installation totally replaces the process or production equipment that causes the discharge of pollutants at an existing source; or

c. The production of wastewater generating processes of the building, structure, facility, or installation are substantially independent of an existing source at the same site. In determining whether these are substantially independent, factors such as the extent to which the new facility is integrated with the existing plant, and the extent to which the new facility is engaged in the same general type of activity as the existing source should be considered.

2. Construction on a site at which an existing source is located results in a modification rather than a new source if the construction does not create a new building, structure, facility, or installation meeting the criteria of subdivision 1 b or c of this definition but otherwise alters, replaces, or adds to existing process or production equipment.

3. Construction of a new source as defined under this subdivision has commenced if the owner or operator has:

a. Begun, or caused to begin, as part of a continuous on-site construction program:

(1) Any placement, assembly, or installation of facilities or equipment; or

(2) Significant site preparation work including clearing, excavation, or removal of existing buildings, structures, or facilities which is necessary for the placement, assembly, or installation of new source facilities or equipment; or

b. Entered into a binding contractual obligation for the purchase of facilities or equipment which are intended to be used in its operation within a reasonable time. Options to purchase or contracts which can be terminated or modified without substantial loss, and contracts for feasibility, engineering, and design studies do not constitute a contractual obligation under this subdivision.

"Overburden" means any material of any nature, consolidated or unconsolidated, that overlies a mineral deposit, excluding topsoil or similar naturally occurring surface materials that are not disturbed by mining operations.

"Owner" means the Commonwealth or any of its political subdivisions including, but not limited to, sanitation district commissions and authorities, and any public or private institution, corporation, association, firm or company organized or existing under the laws of this or any other state or country, or any officer or agency of the United States, or any person or group of persons acting individually or as a group that owns, operates, charters, rents, or otherwise exercises control over or is responsible for any actual or potential discharge of sewage, industrial wastes, or other wastes to state waters, or any facility or operation that has the capability to alter the physical, chemical, or biological properties of state waters in contravention of § 62.1-44.5 of the Code of Virginia.

"Owner" or "operator" means the owner or operator of any facility or activity subject to regulation under the VPDES program.

"Pass through" means a discharge which exits the POTW into state waters in quantities or concentrations which, alone or in conjunction with a discharge or discharges from other sources, is a cause of a violation of any requirement of the POTW's VPDES permit (including an increase in the magnitude or duration of a violation).

"Permit" means an authorization, certificate, license, or equivalent control document issued by the board to implement the requirements of this chapter. Permit includes a VPDES general permit. Permit does not include any permit which has not yet been the subject of final agency action, such as a draft permit or a proposed permit.

"Person" means an individual, corporation, partnership, association, a governmental body, a municipal corporation, or any other legal entity.

"Point source" means any discernible, confined, and discrete conveyance including, but not limited to, any pipe, ditch, channel, tunnel, conduit, well, discrete fissure, container, rolling stock, concentrated animal feeding operation, landfill leachate collection system, vessel, or other floating craft from which pollutants are or may be discharged. This term does not include return flows from irrigated agriculture or agricultural storm water runoff.

"Pollutant" means dredged spoil, solid waste, incinerator residue, filter backwash, sewage, garbage, sewage sludge, munitions, chemical wastes, biological materials, radioactive materials (except those regulated under the Atomic Energy Act of 1954, as amended (42 USC § 2011 et seq.)), heat, wrecked or discarded equipment, rock, sand, cellar dirt and industrial, municipal, and agricultural waste discharged into water. It does not mean:

1. Sewage from vessels; or
2. Water, gas, or other material that is injected into a well to facilitate production of oil or gas, or water derived in association with oil and gas production and disposed of in a well if the well used either to facilitate production or for disposal

purposes is approved by the board, and if the board determines that the injection or disposal will not result in the degradation of ground or surface water resources.

"POTW treatment plant" means that portion of the POTW which is designed to provide treatment (including recycling and reclamation) of municipal sewage and industrial waste.

"Pretreatment" means the reduction of the amount of pollutants, the elimination of pollutants, or the alteration of the nature of pollutant properties in wastewater prior to or in lieu of discharging or otherwise introducing such pollutants into a POTW. The reduction or alteration may be obtained by physical, chemical or biological processes, process changes or by other means, except as prohibited in Part VII of this chapter. Appropriate pretreatment technology includes control equipment, such as equalization tanks or facilities, for protection against surges or slug loadings that might interfere with or otherwise be incompatible with the POTW. However, where wastewater from a regulated process is mixed in an equalization facility with unregulated wastewater or with wastewater from another regulated process, the effluent from the equalization facility must meet an adjusted pretreatment limit calculated in accordance with Part VII of this chapter.

"Pretreatment requirements" means any requirements arising under Part VII (9VAC25-31-730 et seq.) of this chapter including the duty to allow or carry out inspections, entry or monitoring activities; any rules, regulations, or orders issued by the owner of a publicly owned treatment works; or any reporting requirements imposed by the owner of a publicly owned treatment works or by the regulations of the board. Pretreatment requirements do not include the requirements of a national pretreatment standard.

"Primary industry category" means any industry category listed in the NRDC settlement agreement (Natural Resources Defense Council et al. v. Train, 8 E.R.C. 2120 (D.D.C. 1976), modified 12 E.R.C. 1833 (D.D.C. 1979)); also listed in 40 CFR Part 122 Appendix A.

"Privately owned treatment works" or "PVOTW" means any device or system which is (i) used to treat wastes from any facility whose operator is not the operator of the treatment works and (ii) not a POTW.

"Process wastewater" means any water which, during manufacturing or processing, comes into direct contact with or results from the production or use of any raw material, intermediate product, finished product, byproduct, or waste product. Process wastewater from an AFO means water directly or indirectly used in the operation of the AFO for any of the following: spillage or overflow from animal or poultry watering systems; washing, cleaning, or flushing pens, barns, manure pits, or other AFO facilities; direct contact swimming, washing, or spray cooling of the animals; or dust control. Process wastewater from an AFO also includes any water that comes into contact with any raw materials, products, or byproducts including manure, litter, feed, milk, eggs or bedding.

"Production area" means that part of an AFO that includes the animal confinement area, the manure storage area, the raw materials storage area, and the waste containment areas. The animal confinement area includes but is not limited to open lots, housed lots, feedlots, confinement houses, stall barns, free stall barns, milkrooms, milking centers, cowyards, barnyards, medication pens, walkers, animal walkways, and stables. The manure storage area includes but is not limited to lagoons, runoff ponds, storage sheds, stockpiles, under house or pit storages, liquid impoundments, static piles, and composting piles. The raw materials storage areas includes but is not limited to feed silos, silage bunkers, and bedding materials. The waste containment area includes but is not limited to settling basins, and areas within berms and diversions that separate uncontaminated storm water. Also included in the definition of production area is any egg washing or egg processing facility, and any area used in the storage, handling, treatment, or disposal of mortalities.

"Proposed permit" means a VPDES permit prepared after the close of the public comment period (and, when applicable, any public hearing and administrative appeals) which is sent to EPA for review before final issuance. A proposed permit is not a draft permit.

"Publicly owned treatment works" or "POTW" means a treatment works as defined by § 212 of the CWA, which is owned by a state or municipality (as defined by § 502(4) of the CWA). This definition includes any devices and systems used in the storage, treatment, recycling, and reclamation of municipal sewage or industrial wastes of a liquid nature. It also includes sewers, pipes, and other conveyances only if they convey wastewater to a POTW treatment plant. The term also means the municipality as defined in § 502(4) of the CWA, which has jurisdiction over the indirect discharges to and the discharges from such a treatment works.

"Recommencing discharger" means a source which recommences discharge after terminating operations.

"Regional administrator" means the Regional Administrator of Region III of the Environmental Protection Agency or the authorized representative of the regional administrator.

"Rock crushing and gravel washing facilities" means facilities which process crushed and broken stone, gravel, and riprap.

"Schedule of compliance" means a schedule of remedial measures included in a permit, including an enforceable sequence of interim requirements (for example, actions, operations, or milestone events) leading to compliance with the law, the CWA and regulations.

"Secondary industry category" means any industry category which is not a primary industry category.

"Secretary" means the Secretary of the Army, acting through the Chief of Engineers.

"Septage" means the liquid and solid material pumped from a septic tank, cesspool, or similar domestic sewage treatment system, or a holding tank when the system is cleaned or maintained.

"Setback area" means the area of land between the boundary of the land application area and adjacent features where biosolids or other managed pollutants may not be land applied.

"Severe property damage" means substantial physical damage to property, damage to the treatment facilities which causes them to become inoperable, or substantial and permanent loss of natural resources which can reasonably be expected to occur in the absence of a bypass. Severe property damage does not mean economic loss caused by delays in production.

"Sewage from vessels" means human body wastes and the wastes from toilets and other receptacles intended to receive or retain body wastes that are discharged from vessels and regulated under § 312 of CWA.

"Sewage sludge" means any solid, semisolid, or liquid residue removed during the treatment of municipal wastewater or domestic sewage. Sewage sludge includes, but is not limited to, solids removed during primary, secondary, or advanced wastewater treatment, scum, domestic septage, portable toilet pumpings, type III marine sanitation device pumpings, and sewage sludge products. Sewage sludge does not include grit or screenings, or ash generated during the incineration of sewage sludge.

"Sewage sludge use" or "disposal practice" means the collection, storage, treatment, transportation, processing, monitoring, use of biosolids, or disposal of sewage sludge.

"Significant industrial user" or "SIU" means:

1. Except as provided in subdivisions 2 and 3 of this definition:

a. All industrial users subject to categorical pretreatment standards under 9VAC25-31-780 and incorporated by reference in 9VAC25-31-30; and

b. Any other industrial user that: discharges an average of 25,000 gallons per day or more of process wastewater to the POTW (excluding sanitary, noncontact cooling and boiler blowdown wastewater); contributes a process wastestream which makes up 5.0% or more of the average dry weather hydraulic or organic capacity of the POTW treatment plant; or is designated as such by the control authority, on the basis that the industrial user has a reasonable potential for adversely affecting the POTW's operation or for violating any pretreatment standard or requirement.

2. The control authority may determine that an industrial user subject to categorical pretreatment standards under 9VAC25-31-780 and 40 CFR chapter I, subchapter N is a nonsignificant categorical industrial user rather than a significant industrial user on a finding that the industrial user never discharges more than 100 gallons per day (gpd) of total categorical wastewater (excluding sanitary, noncontact cooling and boiler blowdown wastewater, unless specifically included in the pretreatment standard) and the following conditions are met:

- a. The industrial user, prior to control authority's finding, has consistently complied with all applicable categorical pretreatment standards and requirements;
- b. The industrial user annually submits the certification statement required in 9VAC25-31-840 together with any additional information necessary to support the certification statement; and
- c. The industrial user never discharges any untreated concentrated wastewater.

3. Upon a finding that an industrial user meeting the criteria in subdivision 1 b of this definition has no reasonable potential for adversely affecting the POTW's operation or for violating any pretreatment standard or requirement, the control authority may at any time, on its own initiative or in response to a petition received from an industrial user or POTW, and in accordance with Part VII (9VAC25-31-730 et seq.) of this chapter, determine that such industrial user is not a significant industrial user.

"Significant materials" means, but is not limited to: raw materials; fuels; materials such as solvents, detergents, and plastic pellets; finished materials such as metallic products; raw materials used in food processing or production; hazardous substances designated under § 101(14) of CERCLA (42 USC § 9601(14)); any chemical the facility is required to report pursuant to § 313 of Title III of SARA (42 USC § 11023); fertilizers; pesticides; and waste products such as ashes, slag and sludge that have the potential to be released with storm water discharges.

"Silvicultural point source" means any discernible, confined and discrete conveyance related to rock crushing, gravel washing, log sorting, or log storage facilities which are operated in connection with silvicultural activities and from which pollutants are discharged into surface waters. The term does not include nonpoint source silvicultural activities such as nursery operations, site preparation, reforestation and subsequent cultural treatment, thinning, prescribed burning, pest and fire control, harvesting operations, surface drainage, or road construction and maintenance from which there is natural run-off. However, some of these activities (such as stream crossing for roads) may involve point source discharges of dredged or fill material which may require a CWA § 404 permit.

"Site" means the land or water area where any facility or activity is physically located or conducted, including adjacent land used in connection with the facility or activity.

"Sludge-only facility" means any treatment works treating domestic sewage whose methods of biosolids use or sewage sludge disposal are subject to regulations promulgated pursuant to the law and § 405(d) of the CWA, and is required to obtain a VPDES permit.

"Source" means any building, structure, facility, or installation from which there is or may be a discharge of pollutants.

"Standards for biosolids use or sewage sludge disposal" means the regulations promulgated pursuant to the law and § 405(d) of the CWA which govern minimum requirements for sludge quality, management practices, and monitoring and reporting applicable to sewage sludge or the use of biosolids or disposal of sewage sludge by any person.

"State" means the Commonwealth of Virginia.

"State/EPA agreement" means an agreement between the regional administrator and the state which coordinates EPA and state activities, responsibilities and programs including those under the CWA and the law.

"State Water Control Law" or "Law" means Chapter 3.1 (§ 62.1-44.2 et seq.) of Title 62.1 of the Code of Virginia.

"Storm water" means storm water run-off, snow melt run-off, and surface run-off and drainage.

"Storm water discharge associated with industrial activity" means the discharge from any conveyance which is used for collecting and conveying storm water and which is directly related to manufacturing, processing, or raw materials storage areas at an industrial plant. The term does not include discharges from facilities or activities excluded from the VPDES program. For the categories of industries identified in this definition, the term includes, but is not limited to, storm water discharges from industrial plant yards; immediate access roads and rail lines used or traveled by carriers of raw materials, manufactured products, waste material, or byproducts used or created by the facility; material handling sites; refuse sites; sites used for the application or disposal of process wastewaters; sites used for the storage and maintenance of material handling equipment; sites used for residual treatment, storage, or disposal; shipping and receiving areas; manufacturing buildings; storage areas (including tank farms) for raw materials, and intermediate and final products; and areas where industrial activity has taken place in the past and significant materials remain and are exposed to storm water. For the purposes of this definition, material handling activities include the storage, loading and unloading, transportation, or conveyance of any raw material, intermediate product, final product, byproduct, or waste product. The term excludes areas located on plant lands separate from the plant's industrial activities, such as office buildings and accompanying parking

lots as long as the drainage from the excluded areas is not mixed with storm water drained from the above described areas. Industrial facilities (including industrial facilities that are federally, state, or municipally owned or operated that meet the description of the facilities listed in subdivisions 1 through 10 of this definition) include those facilities designated under the provisions of 9VAC25-31-120 A 1 c. The following categories of facilities are considered to be engaging in industrial activity for purposes of this subsection:

1. Facilities subject to storm water effluent limitations guidelines, new source performance standards, or toxic pollutant effluent standards under 40 CFR Subchapter N (except facilities with toxic pollutant effluent standards that are exempted under category 10);
2. Facilities classified as Standard Industrial Classifications 24 (except 2434), 26 (except 265 and 267), 28 (except 283), 29, 311, 32 (except 323), 33, 3441, 373;
3. Facilities classified as Standard Industrial Classifications 10 through 14 (mineral industry) including active or inactive mining operations (except for areas of coal mining operations no longer meeting the definition of a reclamation area under 40 CFR 434.11(l) because the performance bond issued to the facility by the appropriate SMCRA authority has been released, or except for areas of non-coal mining operations which have been released from applicable state or federal reclamation requirements after December 17, 1990) and oil and gas exploration, production, processing, or treatment operations, or transmission facilities that discharge storm water contaminated by contact with or that has come into contact with, any overburden, raw material, intermediate products, finished products, byproducts, or waste products located on the site of such operations; (inactive mining operations are mining sites that are not being actively mined, but which have an identifiable owner/operator; inactive mining sites do not include sites where mining claims are being maintained prior to disturbances associated with the extraction, beneficiation, or processing of mined materials, nor sites where minimal activities are undertaken for the sole purpose of maintaining a mining claim);
4. Hazardous waste treatment, storage, or disposal facilities, including those that are operating under interim status or a permit under Subtitle C of RCRA (42 USC § 6901 et seq.);
5. Landfills, land application sites, and open dumps that receive or have received any industrial wastes (waste that is received from any of the facilities described under this subsection) including those that are subject to regulation under Subtitle D of RCRA (42 USC § 6901 et seq.);
6. Facilities involved in the recycling of materials, including metal scrapyards, battery reclaimers, salvage yards, and automobile junkyards, including but limited to those classified as Standard Industrial Classification 5015 and 5093;

7. Steam electric power generating facilities, including coal handling sites;
8. Transportation facilities classified as Standard Industrial Classifications 40, 41, 42 (except 4221-25), 43, 44, 45, and 5171 which have vehicle maintenance shops, equipment cleaning operations, or airport deicing operations. Only those portions of the facility that are either involved in vehicle maintenance (including vehicle rehabilitation, mechanical repairs, painting, fueling, and lubrication), equipment cleaning operations, airport deicing operations, or which are otherwise identified under subdivisions 1 through 7 or 9 and 10 of this definition are associated with industrial activity;
9. Treatment works treating domestic sewage or any other sewage sludge or wastewater treatment device or system, used in the storage treatment, recycling, and reclamation of municipal or domestic sewage, including land dedicated to the disposal of sewage sludge that are located within the confines of the facility, with a design flow of 1.0 mgd or more, or required to have an approved pretreatment program. Not included are farm lands, domestic gardens or lands used for sludge management where sludge is beneficially reused and which are not physically located in the confines of the facility, or areas that are in compliance with § 405 of the CWA; and
10. Facilities under Standard Industrial Classifications 20, 21, 22, 23, 2434, 25, 265, 267, 27, 283, 30, 31 (except 311), 323, 34 (except 3441), 35, 36, 37 (except 373), 38, 39, and 4221-25.

"Submission" means: (i) a request by a POTW for approval of a pretreatment program to the regional administrator or the director; (ii) a request by POTW to the regional administrator or the director for authority to revise the discharge limits in categorical pretreatment standards to reflect POTW pollutant removals; or (iii) a request to the EPA by the director for approval of the Virginia pretreatment program.

"Surface waters" means:

1. All waters which are currently used, were used in the past, or may be susceptible to use in interstate or foreign commerce, including all waters which are subject to the ebb and flow of the tide;
2. All interstate waters, including interstate wetlands;
3. All other waters such as intrastate lakes, rivers, streams (including intermittent streams), mudflats, sandflats, wetlands, sloughs, prairie potholes, wet meadows, playa lakes, or natural ponds the use, degradation, or destruction of which would affect or could affect interstate or foreign commerce including any such waters:

- a. Which are or could be used by interstate or foreign travelers for recreational or other purposes;
 - b. From which fish or shellfish are or could be taken and sold in interstate or foreign commerce; or
 - c. Which are used or could be used for industrial purposes by industries in interstate commerce;
4. All impoundments of waters otherwise defined as surface waters under this definition;
 5. Tributaries of waters identified in subdivisions 1 through 4 of this definition;
 6. The territorial sea; and
 7. Wetlands adjacent to waters (other than waters that are themselves wetlands) identified in subdivisions 1 through 6 of this definition.

Waste treatment systems, including treatment ponds or lagoons designed to meet the requirements of the CWA and the law, are not surface waters. Surface waters do not include prior converted cropland. Notwithstanding the determination of an area's status as prior converted cropland by any other agency, for the purposes of the Clean Water Act, the final authority regarding the Clean Water Act jurisdiction remains with the EPA.

"Total dissolved solids" means the total dissolved (filterable) solids as determined by use of the method specified in 40 CFR Part 136.

"Toxic pollutant" means any pollutant listed as toxic under § 307(a)(1) of the CWA or, in the case of sludge use or disposal practices, any pollutant identified in regulations implementing § 405(d) of the CWA.

"Treatment facility" means only those mechanical power driven devices necessary for the transmission and treatment of pollutants (e.g., pump stations, unit treatment processes).

"Treatment works" means any devices and systems used for the storage, treatment, recycling or reclamation of sewage or liquid industrial waste, or other waste or necessary to recycle or reuse water, including intercepting sewers, outfall sewers, sewage collection systems, individual systems, pumping, power and other equipment and their appurtenances; extensions, improvements, remodeling, additions, or alterations thereof; and any works, including land that will be an integral part of the treatment process or is used for ultimate disposal of residues resulting from such treatment; or any other method or system used for preventing, abating, reducing, storing, treating, separating, or disposing of municipal waste or industrial waste, including waste in combined sewer water and sanitary sewer systems.

"Treatment works treating domestic sewage" means a POTW or any other sewage sludge or wastewater treatment devices or systems, regardless of ownership (including federal facilities), used in the storage, treatment, recycling, and reclamation of municipal or domestic sewage, including land dedicated for the disposal of sewage sludge. This definition does not include septic tanks or similar devices. For purposes of this definition, domestic sewage includes waste and wastewater from humans or household operations that are discharged to or otherwise enter a treatment works.

"TWTDS" means treatment works treating domestic sewage.

"Uncontrolled sanitary landfill" means a landfill or open dump, whether in operation or closed, that does not meet the requirements for run-on or run-off controls established pursuant to subtitle D of the Solid Waste Disposal Act (42 USC § 6901 et seq.).

"Upset," except when used in Part VII (9VAC25-31-730 et seq.) of this chapter, means an exceptional incident in which there is unintentional and temporary noncompliance with technology based permit effluent limitations because of factors beyond the reasonable control of the permittee. An upset does not include noncompliance to the extent caused by operational error, improperly designed treatment facilities, inadequate treatment facilities, lack of preventive maintenance, or careless or improper operation.

"Variance" means any mechanism or provision under § 301 or § 316 of the CWA or under 40 CFR Part 125, or in the applicable effluent limitations guidelines which allows modification to or waiver of the generally applicable effluent limitation requirements or time deadlines of the CWA. This includes provisions which allow the establishment of alternative limitations based on fundamentally different factors or on §§ 301(c), 301(g), 301(h), 301(i), or 316(a) of the CWA.

"Vegetated buffer" means a permanent strip of dense perennial vegetation established parallel to the contours of and perpendicular to the dominant slope of the field for the purposes of slowing water runoff, enhancing water infiltration, and minimizing the risk of any potential nutrients or pollutants from leaving the field and reaching surface waters.

"Virginia Pollutant Discharge Elimination System permit" or "VPDES permit" means a document issued by the board pursuant to this chapter authorizing, under prescribed conditions, the potential or actual discharge of pollutants from a point source to surface waters and the use of biosolids or disposal of sewage sludge. Under the approved state program, a VPDES permit is equivalent to an NPDES permit.

"VPDES application" or "application" means the standard form or forms, including any additions, revisions or modifications to the forms, approved by the administrator and the board for applying for a VPDES permit.

"Wastewater," when used in Part VII (9VAC25-31-730 et seq.) of this chapter, means liquid and water carried industrial wastes and domestic sewage from residential

dwellings, commercial buildings, industrial and manufacturing facilities and institutions, whether treated or untreated, which are contributed to the POTW.

"Wastewater works operator" means any individual employed or appointed by any owner, and who is designated by such owner to be the person in responsible charge, such as a supervisor, a shift operator, or a substitute in charge, and whose duties include testing or evaluation to control wastewater works operations. Not included in this definition are superintendents or directors of public works, city engineers, or other municipal or industrial officials whose duties do not include the actual operation or direct supervision of wastewater works.

"Water Management Division Director" means the director of the Region III Water Management Division of the Environmental Protection Agency or this person's delegated representative.

"Wetlands" means those areas that are inundated or saturated by surface or groundwater at a frequency and duration sufficient to support, and that under normal circumstances do support, a prevalence of vegetation typically adapted for life in saturated soil conditions. Wetlands generally include swamps, marshes, bogs, and similar areas.

"Whole effluent toxicity" means the aggregate toxic effect of an effluent measured directly by a toxicity test.

9 VAC 25-31-20. Purpose.

This chapter delineates the procedures and requirements to be followed in connection with VPDES permits issued by the board pursuant to the Clean Water Act and the State Water Control Law.

9 VAC 25-31-60. Effect of a Permit.

A. Compliance with a permit.

1. Except for any toxic effluent standards and prohibitions imposed under § 307 of the CWA and standards for biosolids use or sewage sludge disposal under § 405(d) of the CWA, compliance with a permit during its term constitutes compliance, for purposes of enforcement, with the law and with §§ 301, 302, 306, 307, 318, 403, and 405 (a) through (b) of the CWA. However, a permit may be modified, revoked and reissued, or terminated during its term for cause as set forth in this chapter.

2. Compliance with a permit condition which implements a particular standard for biosolids use or sewage sludge disposal shall be an affirmative defense in any enforcement action brought for a violation of that standard for biosolids use or sewage sludge disposal pursuant to the law and §§ 309 and 405(e) of the CWA.

B. The issuance of a permit does not convey any property rights of any sort, or any exclusive privilege.

C. The issuance of a permit does not authorize any injury to persons or property or invasion of other private rights, or any infringement of state or local law or regulations.

9 VAC 25-31-130. Concentrated Animal Feeding Operations.

A. Permit requirement for CAFOs.

1. Concentrated animal feeding operations as defined in 9VAC25-31-10 or designated in accordance with subsection B of this section are point sources that require VPDES permits for discharges. Once an operation is defined as a CAFO, the VPDES requirements for CAFOs apply with respect to all animals in confinement at the operation and all manure, litter and process wastewater generated by those animals or the production of those animals, regardless of the type of animal.

2. Two or more animal feeding operations under common ownership are considered, for the purposes of this chapter, to be a single animal feeding operation if they adjoin each other or if they use a common area or system for the disposal of wastes.

B. Case-by-case designations. The board may designate any animal feeding operation as a concentrated animal feeding operation upon determining that it is a significant contributor of pollution to surface waters.

1. In making this designation the board shall consider the following factors:

a. The size of the animal feeding operation and the amount of wastes reaching surface waters;

b. The location of the animal feeding operation relative to surface waters;

c. The means of conveyance of animal wastes and process wastewaters into surface waters;

d. The slope, vegetation, rainfall, and other factors affecting the likelihood or frequency of discharge of animal wastes and process wastewaters into surface waters; and

e. Other relevant factors.

2. No animal feeding operation with less than the numbers of animals set forth in the definition of Medium CAFO in this regulation shall be designated as a concentrated animal feeding operation unless:

- a. Pollutants are discharged into surface waters through a manmade ditch, flushing system, or other similar manmade device; or
 - b. Pollutants are discharged directly into surface waters which originate outside of the facility and pass over, across, or through the facility or otherwise come into direct contact with the animals confined in the operation.
3. A permit application shall not be required from a concentrated animal feeding operation designated under this subsection until the board has conducted an on-site inspection of the operation and determined that the operation should and could be regulated under the VPDES permit program.

C. VPDES permit authorization.

1. Permit requirement. The owners or operators of a CAFO shall not discharge unless the discharge is authorized by a VPDES permit. In order to obtain authorization under a VPDES permit, the CAFO owner or operator shall either apply for an individual VPDES permit or apply for coverage under a VPDES general permit. The owners or operators of a CAFO must have obtained authorization under the VPDES permit at the time that the CAFO discharges.
2. Information to submit with permit application. A permit application for an individual permit must include the information specified in 9VAC25-31-100 J. A notice of intent for a general permit must include the information specified in 9VAC25-31-100 J and 9VAC25-31-170.
3. Land application discharges from a CAFO are subject to VPDES requirements. The discharge of manure, litter or process wastewater to surface waters from a CAFO as the result of the application of that manure, litter or process wastewater by the CAFO to land areas under its control is a discharge from that CAFO subject to VPDES requirements, except where it is an agricultural storm water discharge as provided in 33 USC § 1362(14). For purposes of this subdivision, where the manure, litter or process wastewater has been applied in accordance with a nutrient management plan approved by the Department of Conservation and Recreation and in accordance with site specific nutrient management practices that ensure appropriate agricultural utilization of the nutrients in the manure, litter or process wastewater, as specified in subdivisions E 1 f through i of 9VAC25-31-200, a precipitation-related discharge of manure, litter or process wastewater from land areas under the control of a CAFO is an agricultural storm water discharge.
 - a. For unpermitted Large CAFOs, a precipitation-related discharge of manure, litter, or process wastewater from land areas under the control of

a CAFO shall be considered an agricultural stormwater discharge only where the manure, litter, or process wastewater has been land applied in accordance with site-specific nutrient management practices that ensure appropriate agricultural utilization of the nutrients in the manure, litter, or process wastewater, as specified in subdivisions E 1 f through i of 9VAC25-31-200.

b. Unpermitted Large CAFOs shall maintain documentation specified in subdivision E 1 i of 9VAC25-31-200 either on site or at a nearby office, or otherwise make such documentation readily available to department staff upon request.

4. Procedures for CAFOs seeking coverage under a general permit. CAFO owners or operators shall submit a registration statement when seeking authorization to discharge under a general permit in accordance with subsection B of 9VAC25-31-170. The board will review registration statements submitted by CAFO owners or operators to ensure that the registration statement includes the information required by subsection J of 9VAC25-31-100, including a nutrient management plan that meets the requirements of subsection E of 9VAC25-31-200 and applicable effluent limitations and standards, including those specified in 40 CFR Part 412. When additional information is necessary to complete the registration statement or clarify, modify, or supplement previously submitted material, the board may request such information from the owner or operator. If the board makes a preliminary determination that the registration statement meets the requirements of subsection J of 9VAC25-31-100 and subsection E of 9VAC25-31-200, the board will notify the public of the board's proposal to grant coverage under the permit to the CAFO and make available for public review and comment the registration statement submitted by the CAFO, including the CAFO's nutrient management plan, and the draft terms of the nutrient management plan to be incorporated into the permit. The process for submitting public comments and public hearing requests, and the public hearing process if a request for a public hearing is granted, shall follow the procedures applicable to draft permits set forth in 9VAC25-31-300, 9VAC25-31-310 and 40 CFR 124.13. The board may establish, either by regulation or in the general permit, an appropriate period of time for the public to comment and request a public hearing that differs from the time period specified in 9VAC25-31-290. The board's response to significant comments received during the comment period is governed by 9VAC25-31-320, and, if necessary, the board will require the CAFO owner or operator to revise the nutrient management plan in order to be granted permit coverage. When the board authorizes coverage for the CAFO owner or operator under the general permit, the terms of the nutrient management plan shall become incorporated as terms and conditions of the permit for the CAFO. The board will notify the CAFO owner or operator and inform the public that coverage has been authorized and of the terms of the nutrient management plan incorporated as terms and conditions of the permit applicable to the CAFO.

5. Changes to a nutrient management plan. Any permit issued to a CAFO shall require the following procedures to apply when a CAFO owner or operator makes changes to the CAFO's nutrient management plan previously submitted to the board:

a. The CAFO owner or operator shall provide the board with the most current version of the CAFO's nutrient management plan and identify changes from the previous version, except that the results of calculations made in accordance with the requirements of subdivisions E 5 a (2) and E 5 b (4) of 9VAC25-31-200 are not subject to the requirements of this subdivision 5.

b. The board will review the revised nutrient management plan to ensure that it meets the requirements of this section and applicable effluent limitations and standards, including those specified in 40 CFR Part 412, and will determine whether the changes to the nutrient management plan necessitate revision to the terms of the nutrient management plan incorporated into the permit issued to the CAFO. If revision to the terms of the nutrient management plan is not necessary, the board will notify the CAFO owner or operator and upon such notification the CAFO may implement the revised nutrient management plan. If revision to the terms of the nutrient management plan is necessary, the board will determine whether such changes are substantial changes as described in subdivision 5 c of this subsection.

(1) If the board determines that the changes to the terms of the nutrient management plan are not substantial, the board will make the revised nutrient management plan publicly available and include it in the permit record, revise the terms of the nutrient management plan incorporated into the permit, and notify the owner or operator and inform the public of any changes to the terms of the nutrient management plan that are incorporated into the permit.

(2) If the board determines that the changes to the terms of the nutrient management plan are substantial, the board will notify the public and make the proposed changes and the information submitted by the CAFO owner or operator available for public review and comment. The process for public comments, public hearing requests, and the public hearing process if a public hearing is held shall follow the procedures applicable to draft permits set forth in 9VAC25-31-300, 9VAC25-31-310 and 40 CFR 124.13. The board may establish, either by regulation or in the CAFO's permit, an appropriate period of time for the public to comment and request a public hearing on the proposed changes that differs from the time period specified in 9VAC25-31-290. The board will

respond to all significant comments received during the comment period as provided in 9VAC25-31-320, and require the CAFO owner or operator to further revise the nutrient management plan if necessary, in order to approve the revision to the terms of the nutrient management plan incorporated into the CAFO's permit. Once the board incorporates the revised terms of the nutrient management plan into the permit, the board will notify the owner or operator and inform the public of the final decision concerning revisions to the terms and conditions of the permit.

c. Substantial changes to the terms of a nutrient management plan incorporated as terms and conditions of a permit include, but are not limited to:

(1) Addition of new land application areas not previously included in the CAFO's nutrient management plan. Except that if the land application area that is being added to the nutrient management plan is covered by terms of a nutrient management plan incorporated into an existing VPDES permit in accordance with the requirements of subdivision E 5 of 9VAC25-31-200, and the CAFO owner or operator applies manure, litter, or process wastewater on the newly added land application area in accordance with the existing field-specific permit terms applicable to the newly added land application area, such addition of new land would be a change to the new CAFO owner or operator's nutrient management plan but not a substantial change for purposes of this section;

(2) Any changes to the field-specific maximum annual rates for land application, as set forth in subdivision E 5 a of 9VAC25-31-200, and to the maximum amounts of nitrogen and phosphorus derived from all sources for each crop, as set forth in subdivision E 5 b of 9VAC25-31-200;

(3) Addition of any crop or other uses not included in the terms of the CAFO's nutrient management plan and corresponding field-specific rates of application expressed in accordance with subdivision E 5 of 9VAC25-31-200; and

(4) Changes to site-specific components of the CAFO's nutrient management plan, where such changes are likely to increase the risk of nitrogen and phosphorus transport to state waters.

6. Causes for modification of nutrient management plans. The incorporation of the terms of a CAFO's nutrient management plan into the terms and conditions of a general permit when a CAFO obtains coverage under a general permit in

accordance with subdivision C 4 of 9VAC25-31-130 and 9VAC25-31-170 is not a cause for modification pursuant to the requirements of 9VAC25-31-370.

9 VAC 25-31-170. General Permits.

A. The board may issue a general permit in accordance with the following:

1. The general permit shall be written to cover one or more categories or subcategories of discharges or sludge use or disposal practices or facilities described in the permit under subdivision 2 b of this subsection, except those covered by individual permits, within a geographic area. The area should correspond to existing geographic or political boundaries, such as:

- a. Designated planning areas under §§ 208 and 303 of CWA;
- b. Sewer districts or sewer authorities;
- c. City, county, or state political boundaries;
- d. State highway systems;
- e. Standard metropolitan statistical areas as defined by the Office of Management and Budget;
- f. Urbanized areas as designated by the Bureau of the Census according to criteria in 30 FR 15202 (May 1, 1974); or
- g. Any other appropriate division or combination of boundaries.

2. The general permit may be written to regulate one or more categories or subcategories of discharges or sludge use or disposal practices or facilities, within the area described in subdivision 1 of this subsection, where the sources within a covered subcategory of discharges are either:

- a. Storm water point sources; or
- b. One or more categories or subcategories of point sources other than storm water point sources, or one or more categories or subcategories of treatment works treating domestic sewage, if the sources or treatment works treating domestic sewage within each category or subcategory all:
 - (1) Involve the same or substantially similar types of operations;
 - (2) Discharge the same types of wastes or engage in the same types of sludge use or disposal practices;

- (3) Require the same effluent limitations, operating conditions, or standards for sewage sludge use or disposal;
 - (4) Require the same or similar monitoring; and
 - (5) In the opinion of the board, are more appropriately controlled under a general permit than under individual permits.
3. Where sources within a specific category of dischargers are subject to water quality-based limits imposed pursuant to 9VAC25-31-220, the sources in that specific category or subcategory shall be subject to the same water quality-based effluent limitations.
 4. The general permit must clearly identify the applicable conditions for each category or subcategory of dischargers or treatment works treating domestic sewage covered by the permit.
 5. The general permit may exclude specified sources or areas from coverage.

B. Administration.

1. General permits may be issued, modified, revoked and reissued, or terminated in accordance with applicable requirements of this chapter.
2. Authorization to discharge, or authorization to engage in sludge use and disposal practices.
 - a. Except as provided in subdivisions 2 e and 2 f of this subsection, dischargers (or treatment works treating domestic sewage) seeking coverage under a general permit shall submit to the department a written notice of intent to be covered by the general permit. A discharger (or treatment works treating domestic sewage) who fails to submit a notice of intent in accordance with the terms of the permit is not authorized to discharge, (or in the case of a sludge disposal permit, to engage in a sludge use or disposal practice), under the terms of the general permit unless the general permit, in accordance with subdivision 2 e of this subsection, contains a provision that a notice of intent is not required or the board notifies a discharger (or treatment works treating domestic sewage) that it is covered by a general permit in accordance with subdivision 2 f of this subsection. A complete and timely notice of intent (NOI) to be covered in accordance with general permit requirements fulfills the requirements for permit applications for the purposes of this chapter. As of the start date in Table 1 of 9VAC25-31-1020, all notices of intent submitted in compliance with this subsection shall be submitted electronically by the discharger (or treatment works treating domestic sewage) to the department in compliance with this subsection and 40 CFR Part 3 (including, in all cases,

40 CFR Part 3 Subpart D), 9VAC25-31-110, and Part XI (9VAC25-31-950 et seq.) of this chapter. Part XI of this chapter is not intended to undo existing requirements for electronic reporting. Prior to this date, and independent of Part XI of this chapter, dischargers (or treatment works treating domestic sewage) may be required to report electronically if specified by a particular permit.

b. The contents of the notice of intent shall be specified in the general permit and shall require the submission of information necessary for adequate program implementation, including at a minimum, the legal name and address of the owner or operator, the facility name and address, type of facility or discharges, and the receiving stream or streams and other required data elements as identified in Appendix A to 40 CFR Part 127, as adopted by reference in 9VAC25-31-1030. General permits for storm water discharges associated with industrial activity from inactive mining, inactive oil and gas operations, or inactive landfills occurring on federal lands where an operator cannot be identified may contain alternative notice of intent requirements. Notices of intent for coverage under a general permit for concentrated animal feeding operations must include the information specified in 9VAC25-31-100 J 1, including a topographic map. All notices of intent shall be signed in accordance with 9VAC25-31-110.

c. General permits shall specify the deadlines for submitting notices of intent to be covered and the date or dates when a discharger is authorized to discharge under the permit.

d. General permits shall specify whether a discharger (or treatment works treating domestic sewage) that has submitted a complete and timely notice of intent to be covered in accordance with the general permit and that is eligible for coverage under the permit, is authorized to discharge, (or in the case of a sludge disposal permit, to engage in a sludge use or disposal practice), in accordance with the permit either upon receipt of the notice of intent by the department, after a waiting period specified in the general permit, on a date specified in the general permit, or upon receipt of notification of inclusion by the board. Coverage may be terminated or revoked in accordance with subdivision 3 of this subsection.

e. Discharges other than discharges from publicly owned treatment works, combined sewer overflows, primary industrial facilities, and storm water discharges associated with industrial activity, may, at the discretion of the board, be authorized to discharge under a general permit without submitting a notice of intent where the board finds that a notice of intent requirement would be inappropriate. In making such a finding, the board shall consider: the type of discharge; the expected nature of the discharge; the potential for toxic and conventional pollutants in the discharges; the

expected volume of the discharges; other means of identifying discharges covered by the permit; and the estimated number of discharges to be covered by the permit. The board shall provide in the public notice of the general permit the reasons for not requiring a notice of intent.

f. The board may notify a discharger (or treatment works treating domestic sewage) that it is covered by a general permit, even if the discharger (or treatment works treating domestic sewage) has not submitted a notice of intent to be covered. A discharger (or treatment works treating domestic sewage) so notified may request an individual permit under subdivision 3 c of this subsection.

g. A CAFO owner or operator may be authorized to discharge under a general permit only in accordance with the process described in subdivision C 4 of 9VAC25-31-130.

3. Requiring an individual permit.

a. The board may require any discharger authorized by a general permit to apply for and obtain an individual VPDES permit. Any interested person may request the board to take action under this subdivision. Cases where an individual VPDES permit may be required include the following:

(1) The discharger or treatment works treating domestic sewage is not in compliance with the conditions of the general VPDES permit;

(2) A change has occurred in the availability of demonstrated technology or practices for the control or abatement of pollutants applicable to the point source or treatment works treating domestic sewage;

(3) Effluent limitation guidelines are promulgated for point sources covered by the general VPDES permit;

(4) A water quality management plan containing requirements applicable to such point sources is approved;

(5) Circumstances have changed since the time of the request to be covered so that the discharger is no longer appropriately controlled under the general permit, or either a temporary or permanent reduction or elimination of the authorized discharge is necessary;

(6) Standards for sewage sludge use or disposal have been promulgated for the sludge use and disposal practice covered by the general VPDES permit; or

(7) The discharge(s) is a significant contributor of pollutants. In making this determination, the board may consider the following factors:

- (a) The location of the discharge with respect to surface waters;
- (b) The size of the discharge;
- (c) The quantity and nature of the pollutants discharged to surface waters; and
- (d) Other relevant factors.

b. Permits required on a case-by-case basis.

(1) The board may determine, on a case-by-case basis, that certain concentrated animal feeding operations, concentrated aquatic animal production facilities, storm water discharges, and certain other facilities covered by general permits that do not generally require an individual permit may be required to obtain an individual permit because of their contributions to water pollution.

(2) Whenever the board decides that an individual permit is required under this subsection, except as provided in subdivision 3 b (3) of this subsection, the board shall notify the discharger in writing of that decision and the reasons for it, and shall send an application form with the notice. The discharger must apply for a permit within 60 days of notice, unless permission for a later date is granted by the board. The question whether the designation was proper will remain open for consideration during the public comment period for the draft permit and in any subsequent public hearing.

(3) Prior to a case-by-case determination that an individual permit is required for a storm water discharge under this subsection, the board may require the discharger to submit a permit application or other information regarding the discharge under the law and § 308 of the CWA. In requiring such information, the board shall notify the discharger in writing and shall send an application form with the notice. The discharger must apply for a permit under 9VAC25-31-120 A 1 within 60 days of notice or under 9VAC25-31-120 A 7 within 180 days of notice, unless permission for a later date is granted by the board. The question whether the initial designation was proper will remain open for consideration during the public

comment period for the draft permit and in any subsequent public hearing.

c. Any owner or operator authorized by a general permit may request to be excluded from the coverage of the general permit by applying for an individual permit. The owner or operator shall submit an application under 9VAC25-31-100 with reasons supporting the request. The request shall be processed under the applicable parts of this chapter. The request shall be granted by issuing of an individual permit if the reasons cited by the owner or operator are adequate to support the request.

d. When an individual VPDES permit is issued to an owner or operator otherwise subject to a general VPDES permit, the applicability of the general permit to the individual VPDES permittee is automatically terminated on the effective date of the individual permit.

e. A source excluded from a general permit solely because it already has an individual permit may request that the individual permit be revoked, and that it be covered by the general permit. Upon revocation of the individual permit, the general permit shall apply to the source.

9 VAC 25-31-190. Conditions Applicable to All Permits.

The following conditions apply to all VPDES permits. Additional conditions applicable to VPDES permits are in 9VAC25-31-200. All conditions applicable to VPDES permits shall be incorporated into the permits either expressly or by reference. If incorporated by reference, a specific citation to this regulation must be given in the permit.

A. The permittee must comply with all conditions of the permit. Any permit noncompliance constitutes a violation of the law and the CWA, except that noncompliance with certain provisions of the permit may constitute a violation of the law but not the CWA. Permit noncompliance is grounds for enforcement action; for permit termination, revocation and reissuance, or modification; or denial of a permit renewal application.

The permittee shall comply with effluent standards or prohibitions established under § 307(a) of the CWA for toxic pollutants and with standards for sewage sludge use or disposal established under § 405(d) of the CWA within the time provided in the chapters that establish these standards or prohibitions or standards for sewage sludge use or disposal, even if the permit has not yet been modified to incorporate the requirement.

B. If the permittee wishes to continue an activity regulated by the permit after the expiration date of the permit, the permittee must apply for and obtain a new permit.

C. It shall not be a defense for a permittee in an enforcement action that it would have been necessary to halt or reduce the permitted activity in order to maintain compliance with the conditions of the permit.

D. The permittee shall take all reasonable steps to minimize or prevent any discharge or sludge use or disposal in violation of the permit which has a reasonable likelihood of adversely affecting human health or the environment.

E. The permittee shall at all times properly operate and maintain all facilities and systems of treatment and control (and related appurtenances) which are installed or used by the permittee to achieve compliance with the conditions of the permit. Proper operation and maintenance also includes adequate laboratory controls and appropriate quality assurance procedures. This provision requires the operation of back-up or auxiliary facilities or similar systems which are installed by a permittee only when the operation is necessary to achieve compliance with the conditions of the permit.

F. Permits may be modified, revoked and reissued, or terminated for cause. The filing of a request by the permittee for a permit modification, revocation and reissuance, or termination, or a notification of planned changes or anticipated noncompliance does not stay any permit condition.

G. Permits do not convey any property rights of any sort, or any exclusive privilege.

H. The permittee shall furnish to the department, within a reasonable time, any information which the board may request to determine whether cause exists for modifying, revoking and reissuing, or terminating the permit or to determine compliance with the permit. The board may require the permittee to furnish, upon request, such plans, specifications, and other pertinent information as may be necessary to determine the effect of the wastes from his discharge on the quality of state waters, or such other information as may be necessary to accomplish the purposes of the law. The permittee shall also furnish to the department upon request, copies of records required to be kept by the permit.

I. The permittee shall allow the director, or an authorized representative (including an authorized contractor acting as a representative of the administrator), upon presentation of credentials and other documents as may be required by law, to:

1. Enter upon the permittee's premises where a regulated facility or activity is located or conducted, or where records must be kept under the conditions of the permit;
2. Have access to and copy, at reasonable times, any records that must be kept under the conditions of the permit;

3. Inspect at reasonable times any facilities, equipment (including monitoring and control equipment), practices, or operations regulated or required under the permit; and
4. Sample or monitor at reasonable times, for the purposes of assuring permit compliance or as otherwise authorized by the CWA and the law, any substances or parameters at any location.

J. Monitoring and records.

1. Samples and measurements taken for the purpose of monitoring shall be representative of the monitored activity.
2. Except for records of monitoring information required by the permit related to the permittee's sewage sludge use and disposal activities, which shall be retained for a period of at least five years (or longer as required by Part VI (9VAC25-31-420 et seq.) of this chapter), the permittee shall retain records of all monitoring information, including all calibration and maintenance records and all original strip chart recordings for continuous monitoring instrumentation, copies of all reports required by the permit, and records of all data used to complete the application for the permit, for a period of at least three years from the date of the sample, measurement, report or application. This period of retention shall be extended automatically during the course of any unresolved litigation regarding the regulated activity or regarding control standards applicable to the permittee, or as requested by the board.
3. Records of monitoring information shall include:
 - a. The date, exact place, and time of sampling or measurements;
 - b. The individual or individuals who performed the sampling or measurements;
 - c. The date or dates analyses were performed;
 - d. The individual or individuals who performed the analyses;
 - e. The analytical techniques or methods used; and
 - f. The results of such analyses.
4. Monitoring results must be conducted according to test procedures approved under 40 CFR Part 136 or alternative EPA approved methods; or, in the case of sludge use or disposal, approved under 40 CFR Part 136 unless otherwise specified in Part VI of this chapter, unless other test procedures have been specified in the permit.

K. All applications, reports, or information submitted to the department shall be signed and certified as required by 9VAC25-31-110.

L. Reporting requirements.

1. The permittee shall give notice to the department as soon as possible of any planned physical alterations or additions to the permitted facility. Notice is required only when:
 - a. The alteration or addition to a permitted facility may meet one of the criteria for determining whether a facility is a new source in 9VAC25-31-180 A;
 - b. The alteration or addition could significantly change the nature or increase the quantity of pollutants discharged. This notification applies to pollutants which are subject neither to effluent limitations in the permit, nor to notification requirements under 9VAC25-31-200 A 1; or
 - c. The alteration or addition results in a significant change in the permittee's sludge use or disposal practices, and such alteration, addition, or change may justify the application of permit conditions that are different from or absent in the existing permit, including notification of additional use or disposal sites not reported during the permit application process or not reported pursuant to an approved land application plan.
2. The permittee shall give advance notice to the department of any planned changes in the permitted facility or activity which may result in noncompliance with permit requirements.
3. Permits are not transferable to any person except after notice to the department. The board may require modification or revocation and reissuance of permits to change the name of the permittee and incorporate such other requirements as may be necessary under the law or the CWA.
4. Monitoring results shall be reported at the intervals specified in the permit.
 - a. Monitoring results must be reported on a Discharge Monitoring Report (DMR) or forms provided or specified by the department for reporting results of monitoring of sludge use or disposal practices. As of the start date in Table 1 of 9VAC25-31-1020, all reports and forms submitted in compliance with this subdivision 4 shall be submitted electronically by the permittee to the department in compliance with this subdivision 4 and 40 CFR Part 3 (including, in all cases, 40 CFR Part 3 Subpart D), 9VAC25-31-110, and Part XI (9VAC25-31-950 et seq.) of this chapter. Part XI of this chapter is not intended to undo existing requirements for electronic

reporting. Prior to this date, and independent of Part XI of this chapter, permittees may be required to report electronically if specified by a particular permit.

b. If the permittee monitors any pollutant specifically addressed by the permit more frequently than required by the permit using test procedures approved under 40 CFR Part 136 or, in the case of sludge use or disposal, approved under 40 CFR Part 136 unless otherwise specified in Part VI of this chapter, or as specified in the permit, the results of this monitoring shall be included in the calculation and reporting of the data submitted in the DMR or sludge reporting form specified by the department.

c. Calculations for all limitations which require averaging of measurements shall utilize an arithmetic mean unless otherwise specified in the permit.

5. Reports of compliance or noncompliance with, or any progress reports on, interim and final requirements contained in any compliance schedule of the permit shall be submitted no later than 14 days following each schedule date.

6. If any unusual or extraordinary discharge including a bypass or upset should occur from a facility and such discharge enters or could be expected to enter state waters, the owner shall promptly notify, in no case later than 24 hours, the department by telephone after the discovery of such discharge. This notification shall provide all available details of the incident, including any adverse effects on aquatic life and the known number of fish killed. The permittee shall reduce the report to writing and shall submit it to the department within five days of discovery of the discharge in accordance with subdivision 7 a of this subsection. Unusual and extraordinary discharges include but are not limited to any discharge resulting from:

a. Unusual spillage of materials resulting directly or indirectly from processing operations;

b. Breakdown of processing or accessory equipment;

c. Failure or taking out of service of the treatment plant or auxiliary facilities (such as sewer lines or wastewater pump stations); and

d. Flooding or other acts of nature.

7. Twenty-four hour and five-day reporting.

a. The permittee shall report any noncompliance that may endanger health or the environment. Any information shall be provided orally within 24 hours from the time the permittee becomes aware of the circumstances. A

report in a format required by the department shall also be provided within five days of the time the permittee becomes aware of the circumstances. The five-day report shall contain a description of the noncompliance and its cause; the period of noncompliance, including exact dates and times, and if the noncompliance has not been corrected, the anticipated time it is expected to continue; and steps taken or planned to reduce, eliminate, and prevent reoccurrence of the noncompliance.

(1) For noncompliance events related to combined sewer overflows, sanitary sewer overflows, or bypass events, these reports must include the data described in subdivision 7 a of this subsection with the exception of time of discovery, as well as the type of event (i.e., combined sewer overflows, sanitary sewer overflows, or bypass events); type of sewer overflow structure (e.g., manhole, combine sewer overflow outfall); discharge volumes untreated by the treatment works treating domestic sewage; types of human health and environmental impacts of the sewer overflow event; and whether the noncompliance was related to wet weather.

(2) As of the start date in Table 1 of 9VAC25-31-1020, all reports related to combined sewer overflows, sanitary sewer overflows, or bypass events submitted in compliance with this subdivision 7 shall be submitted electronically by the permittee to the department in compliance with this subdivision 7 and 40 CFR Part 3 (including, in all cases, 40 CFR Part 3 Subpart D), 9VAC25-31-110, and Part XI (9VAC25-31-950 et seq.) of this chapter. Part XI of this chapter is not intended to undo existing requirements for electronic reporting. Prior to this date, and independent of Part XI of this chapter, permittees may be required to electronically submit reports related to combined sewer overflows, sanitary sewer overflows, or bypass events under this subdivision by a particular permit.

(3) The director may also require permittees to electronically submit reports not related to combined sewer overflows, sanitary sewer overflows, or bypass events under this subdivision.

b. The following shall be reported within 24 hours under this subdivision:

(1) Any unanticipated bypass that exceeds any effluent limitation in the permit.

(2) Any upset that exceeds any effluent limitation in the permit.

(3) Violation of a maximum daily discharge limitation for any of the pollutants listed in the permit to be reported within 24 hours.

c. The board may waive the five-day report on a case-by-case basis for reports under this subdivision if the oral report has been received within 24 hours.

8. The permittee shall report all instances of noncompliance not reported under subdivisions 4, 5, 6, and 7 of this subsection, in a format required by the department at the time the next monitoring reports are submitted. The reports shall contain the information listed in subdivision 7 of this subsection.

a. For noncompliance events related to combined sewer overflows, sanitary sewer overflows, or bypass events, these reports shall contain the information described in subdivision 7 a of this subsection and the applicable required data in Appendix A to 40 CFR Part 127 as adopted by reference in 9VAC25-31-1030.

b. As of the start date in Table 1 of 9VAC25-31-1020, all reports related to combined sewer overflows, sanitary sewer overflows, or bypass events submitted in compliance with this subdivision 8 shall be submitted electronically by the permittee to the department in compliance with this subdivision 8 and 40 CFR Part 3 (including, in all cases, 40 CFR Part 3 Subpart D), 9VAC25-31-110, and Part XI (9VAC25-31-950 et seq.) of this chapter. Part XI of this chapter is not intended to undo existing requirements for electronic reporting. Prior to this date, and independent of Part XI of this chapter, permittees may be required to electronically submit reports related to combined sewer overflows, sanitary sewer overflows, or bypass events under this section by a particular permit.

c. The director may also require permittees to electronically submit reports not related to combined sewer overflows, sanitary sewer overflows, or bypass events under this section.

9. Where the permittee becomes aware that it failed to submit any relevant facts in a permit application, or submitted incorrect information in a permit application or in any report to the department, it shall promptly submit such facts or information.

10. The owner, operator, or the duly authorized representative of an VPDES-regulated entity is required to electronically submit the required information, as specified in Appendix A to 40 CFR Part 127 as adopted by reference in 9VAC25-31-1030, to the department.

M. Bypass.

1. The permittee may allow any bypass to occur which does not cause effluent limitations to be exceeded, but only if it also is for essential maintenance to assure efficient operation. These bypasses are not subject to the provisions of subdivisions 2 and 3 of this subsection.

2. Notice.

a. Anticipated bypass. If the permittee knows in advance of the need for a bypass, it shall submit prior notice, if possible at least 10 days before the date of the bypass. As of the start date in Table 1 of 9VAC25-31-1020, all notices submitted in compliance with this subdivision shall be submitted electronically by the permittee to the department in compliance with this subdivision and 40 CFR Part 3 (including, in all cases, 40 CFR Part 3 Subpart D), 9VAC25-31-110, and Part XI (9VAC25-31-950 et seq.) of this chapter. Part XI of this chapter is not intended to undo existing requirements for electronic reporting. Prior to this date, and independent of Part XI of this chapter, permittees may be required to report electronically if specified by a particular permit.

b. Unanticipated bypass. The permittee shall submit notice of an unanticipated bypass as required in subdivision L 7 of this section. As of the start date in Table 1 of 9VAC25-31-1020, all notices submitted in compliance with this subdivision shall be submitted electronically by the permittee to the department in compliance with this subdivision and 40 CFR Part 3 (including, in all cases, 40 CFR Part 3 Subpart D), 9VAC25-31-110, and Part XI (9VAC25-31-950 et seq.) of this chapter. Part XI of this chapter is not intended to undo existing requirements for electronic reporting. Prior to this date, and independent of Part XI of this chapter, permittees may be required to report electronically if specified by a particular permit.

3. Prohibition of bypass.

a. Bypass is prohibited, and the board may take enforcement action against a permittee for bypass, unless:

(1) Bypass was unavoidable to prevent loss of life, personal injury, or severe property damage;

(2) There were no feasible alternatives to the bypass, such as the use of auxiliary treatment facilities, retention of untreated wastes, or maintenance during normal periods of equipment downtime. This condition is not satisfied if adequate back-up equipment should have been installed in the exercise of reasonable engineering judgment to prevent a bypass which occurred during

normal periods of equipment downtime or preventive maintenance;
and

(3) The permittee submitted notices as required under subdivision 2 of this subsection.

b. The board may approve an anticipated bypass, after considering its adverse effects, if the board determines that it will meet the three conditions listed above in subdivision 3 a of this subsection.

N. Upset.

1. An upset constitutes an affirmative defense to an action brought for noncompliance with such technology based permit effluent limitations if the requirements of subdivision 2 of this subsection are met. No determination made during administrative review of claims that noncompliance was caused by upset, and before an action for noncompliance, is final administrative action subject to judicial review.

2. A permittee who wishes to establish the affirmative defense of upset shall demonstrate, through properly signed, contemporaneous operating logs, or other relevant evidence that:

a. An upset occurred and that the permittee can identify the cause or causes of the upset;

b. The permitted facility was at the time being properly operated;

c. The permittee submitted notice of the upset as required in subdivision L 7 b (2) of this section (24-hour notice); and

d. The permittee complied with any remedial measures required under subsection D of this section.

3. In any enforcement proceeding the permittee seeking to establish the occurrence of an upset has the burden of proof.

9 VAC 25-31-200. Additional Conditions Applicable to Specified Categories of VPDES Permits.

The following conditions, in addition to those set forth in 9VAC25-31-190, apply to all VPDES permits within the categories specified below:

[. . .]

E. Concentrated animal feeding operations (CAFOs). The activities of the CAFO shall not contravene the Water Quality Standards, as amended and adopted by the board, or any provision of the State Water Control Law. There shall be no point source discharge of manure, litter or process wastewater to surface waters of the state except in the case of an overflow caused by a storm event greater than the 25-year, 24-hour storm. Agricultural storm water discharges as defined in subdivision C 3 of 9VAC25-31-130 are permitted. Domestic sewage or industrial waste shall not be managed under the Virginia Pollutant Discharge Elimination System General Permit for CAFOs (9VAC25-191). Any permit issued to a CAFO shall include:

1. Requirements to develop, implement and comply with a nutrient management plan. At a minimum, a nutrient management plan shall include best management practices and procedures necessary to implement applicable effluent limitations and standards. Permitted CAFOs must have their nutrient management plans developed and implemented and be in compliance with the nutrient management plan as a requirement of the permit. The nutrient management plan must, to the extent applicable:

a. Ensure adequate storage of manure, litter, and process wastewater, including procedures to ensure proper operation and maintenance of the storage facilities;

b. Ensure proper management of mortalities (i.e., dead animals) to ensure that they are not disposed of in a liquid manure, storm water, or process wastewater storage or treatment system that is not specifically designed to treat animal mortalities;

c. Ensure that clean water is diverted, as appropriate, from the production area;

d. Prevent direct contact of confined animals with surface waters of the state;

e. Ensure that chemicals and other contaminants handled on site are not disposed of in any manure, litter, process wastewater, or stormwater storage or treatment system unless specifically designed to treat such chemicals and other contaminants;

f. Identify appropriate site specific conservation practices to be implemented, including as appropriate buffers or equivalent practices, to control runoff of pollutants to surface waters of the state;

g. Identify protocols for appropriate testing of manure, litter, process wastewater and soil;

h. Establish protocols to land apply manure, litter or process wastewater in accordance with site specific nutrient management practices that ensure appropriate agricultural utilization of the nutrients in the manure, litter or process wastewater; and

i. Identify specific records that will be maintained to document the implementation and management of the minimum elements described above.

2. Recordkeeping requirements. The permittee must create, maintain for five years, and make available to the director upon request the following records:

a. All applicable records identified pursuant to subdivision 1 i of this subsection;

b. In addition, all CAFOs subject to EPA Effluent Guidelines for Feedlots (40 CFR Part 412) must comply with recordkeeping requirements as specified in 40 CFR 412.37(b) and (c) and 40 CFR 412.47(b) and (c);

A copy of the CAFO's site-specific nutrient management plan must be maintained on site and made available to the director upon request.

3. Requirements relating to transfer of manure or process wastewater to other persons. Prior to transferring manure, litter or process wastewater to other persons, large CAFOs must provide the recipient of the manure, litter or process wastewater with the most current nutrient analysis. The analysis provided must be consistent with the requirements of EPA Effluent Guidelines for Feedlots (40 CFR Part 412). Large CAFOs must retain for five years records of the date, recipient name and address and approximate amount of manure, litter or process wastewater transferred to another person.

4. Annual reporting requirements for CAFOs. The permittee must submit an annual report to the director. As of the start date in Table 1 of 9VAC25-31-1020, all annual reports submitted in compliance with this subsection shall be submitted electronically by the permittee to the department in compliance with this subsection and 40 CFR Part 3 (including, in all cases, 40 CFR Part 3 Subpart D), 9VAC25-31-110, and Part XI (9VAC25-31-950 et seq.) of this chapter. Part XI of this chapter is not intended to undo existing requirements for electronic reporting. Prior to this date, and independent of Part XI of this chapter, the permittee may be required to

report electronically if specified by a particular permit. The annual report must include:

- a. The number and type of animals, whether in open confinement or housed under roof (beef cattle, broilers, layers, swine weighing 55 pounds or more, swine weighing less than 55 pounds, mature dairy cows, dairy heifers, veal calves, sheep and lambs, horses, ducks, turkeys, other);
- b. Estimated amount of total manure, litter and process wastewater generated by the CAFO in the previous 12 months (tons/gallons);
- c. Estimated amount of total manure, litter and process wastewater transferred to other persons by the CAFO in the previous 12 months (tons/gallons);
- d. Total number of acres for land application covered by the nutrient management plan developed in accordance with subdivision 1 of this subsection;
- e. Total number of acres under control of the CAFO that were used for land application of manure, litter and process wastewater in the previous 12 months;
- f. Summary of all manure, litter and process wastewater discharges from the production area that occurred in the previous 12 months including for each discharge the date of discovery, duration of discharge, and approximate volume;
- g. A statement indicating whether the current version of the CAFO's nutrient management plan was developed or approved by a certified nutrient management planner; and
- h. The actual crop(s) planted and actual yield(s) for each field, the actual nitrogen and phosphorus content of the manure, litter, and process wastewater, the results of calculations conducted in accordance with subdivisions 5 a (2) and 5 b (4) of this subsection, and the amount of manure, litter, and process wastewater applied to each field during the previous 12 months; and, for any CAFO that implements a nutrient management plan that addresses rates of application in accordance with subdivision 5 b of this subsection, the results of any soil testing for nitrogen and phosphorus taken during the preceding 12 months, the data used in calculations conducted in accordance with subdivision 5 b (4) of this subsection, and the amount of any supplemental fertilizer applied during the previous 12 months.

5. Terms of the nutrient management plan. Any permit issued to a CAFO shall require compliance with the terms of the CAFO's site-specific nutrient management plan. The terms of the nutrient management plan are the information, protocols, best management practices, and other conditions in the nutrient management plan determined by the board to be necessary to meet the requirements of subdivision 1 of this subsection. The terms of the nutrient management plan, with respect to protocols for land application of manure, litter, or process wastewater required by subdivision 4 h of this subsection and, as applicable, 40 CFR 412.4(c), shall include the fields available for land application; field-specific rates of application properly developed, as specified in subdivisions 5 a and b of this subsection, to ensure appropriate agricultural utilization of the nutrients in the manure, litter, or process wastewater; and any timing limitations identified in the nutrient management plan concerning land application on the fields available for land application. The terms shall address rates of application using one of the following two approaches, unless the board specifies that only one of these approaches may be used:

a. Linear approach. An approach that expresses rates of application as pounds of nitrogen and phosphorus, according to the following specifications:

(1) The terms include maximum application rates from manure, litter, and process wastewater for each year of permit coverage, for each crop identified in the nutrient management plan, in chemical forms determined to be acceptable to the board, in pounds per acre, per year, for each field to be used for land application, and certain factors necessary to determine such rates. At a minimum, the factors that are terms shall include: the outcome of the field-specific assessment of the potential for nitrogen and phosphorus transport from each field; the crops to be planted in each field or any other uses of a field such as pasture or fallow fields; the realistic yield goal for each crop or use identified for each field; the nitrogen and phosphorus recommendations from sources specified by the board for each crop or use identified for each field; credits for all nitrogen in the field that will be plant available; consideration of multi-year phosphorus application; and accounting for all other additions of plant available nitrogen and phosphorus to the field. In addition, the terms include the form and source of manure, litter, and process wastewater to be land-applied; the timing and method of land application; and the methodology by which the nutrient management plan accounts for the amount of

nitrogen and phosphorus in the manure, litter, and process wastewater to be applied.

(2) Large CAFOs that use this approach shall calculate the maximum amount of manure, litter, and process wastewater to be land applied at least once each year using the results of the most recent representative manure, litter, and process wastewater tests for nitrogen and phosphorus taken within 12 months of the date of land application; or

b. Narrative rate approach. An approach that expresses rates of application as a narrative rate of application that results in the amount, in tons or gallons, of manure, litter, and process wastewater to be land applied, according to the following specifications:

(1) The terms include maximum amounts of nitrogen and phosphorus derived from all sources of nutrients, for each crop identified in the nutrient management plan, in chemical forms determined to be acceptable to the board, in pounds per acre, for each field, and certain factors necessary to determine such amounts. At a minimum, the factors that are terms shall include: the outcome of the field-specific assessment of the potential for nitrogen and phosphorus transport from each field; the crops to be planted in each field or any other uses such as pasture or fallow fields (including alternative crops identified in accordance with subdivision 5 b (2) of this subsection); the realistic yield goal for each crop or use identified for each field; and the nitrogen and phosphorus recommendations from sources specified by the board for each crop or use identified for each field. In addition, the terms include the methodology by which the nutrient management plan accounts for the following factors when calculating the amounts of manure, litter, and process wastewater to be land applied: results of soil tests conducted in accordance with protocols identified in the nutrient management plan, as required by subdivision 1 g of this subsection; credits for all nitrogen in the field that will be plant available; the amount of nitrogen and phosphorus in the manure, litter, and process wastewater to be applied; consideration of multi-year phosphorus application; accounting for all other additions of plant available nitrogen and phosphorus to the field; the form and source of manure, litter, and process wastewater; the timing and method of land application; and

volatilization of nitrogen and mineralization of organic nitrogen.

(2) The terms of the nutrient management plan include alternative crops identified in the CAFO's nutrient management plan that are not in the planned crop rotation. Where a CAFO includes alternative crops in its nutrient management plan, the crops shall be listed by field, in addition to the crops identified in the planned crop rotation for that field, and the nutrient management plan shall include realistic crop yield goals and the nitrogen and phosphorus recommendations from sources specified by the board for each crop. Maximum amounts of nitrogen and phosphorus from all sources of nutrients and the amounts of manure, litter, and process wastewater to be applied shall be determined in accordance with the methodology described in subdivision 5 b (1) of this subsection.

(3) For CAFOs using this approach, the following projections shall be included in the nutrient management plan submitted to the board, but are not terms of the nutrient management plan: the CAFO's planned crop rotations for each field for the period of permit coverage; the projected amount of manure, litter, or process wastewater to be applied; projected credits for all nitrogen in the field that will be plant available; consideration of multi-year phosphorus application; accounting for all other additions of plant available nitrogen and phosphorus to the field; and the predicted form, source, and method of application of manure, litter, and process wastewater for each crop. Timing of application for each field, insofar as it concerns the calculation of rates of application, is not a term of the nutrient management plan.

(4) CAFOs that use this approach shall calculate maximum amounts of manure, litter, and process wastewater to be land applied at least once each year using the methodology required in subdivision 5 b (1) of this subsection before land applying manure, litter, and process wastewater and shall rely on the following data:

(a) A field-specific determination of soil levels of nitrogen and phosphorus, including, for nitrogen, a concurrent determination of nitrogen that will be plant available consistent with the methodology required by subdivision 5 b (1) of this subsection,

and for phosphorus, the results of the most recent soil test conducted in accordance with soil testing requirements approved by the board; and

(b) The results of most recent representative manure, litter, and process wastewater tests for nitrogen and phosphorus taken within 12 months of the date of land application, in order to determine the amount of nitrogen and phosphorus in the manure, litter, and process wastewater to be applied.

9 VAC 25-191-10. Definitions.

The words and terms used in this regulation shall have the meanings defined in the State Water Control Law and 9VAC25-31 (VPDES Permit Regulation) unless the context clearly indicates otherwise, except that for the purposes of this regulation:

"Agricultural storm water" means storm water that is not the sole result of land application of manure, litter or process wastewater. Where manure, litter or process wastewater has been applied in accordance with a nutrient management plan approved by the Virginia Department of Conservation and Recreation and in accordance with site-specific nutrient management practices that ensure appropriate agricultural utilization of the nutrients in the manure, litter or process wastewater, a precipitation-related discharge of manure, litter, or process wastewater from land areas under the control of an animal feeding operation is an agricultural storm water discharge.

"Animal feeding operation" or "AFO" means a lot or facility (other than an aquatic animal production facility) where the following conditions are met:

1. Animals (other than aquatic animals) have been, are, or will be stabled or confined and fed or maintained for a total of 45 days or more in any 12-month period, and
2. Crops, vegetation, forage growth, or post-harvest residues are not sustained in the normal growing season over any portion of the lot or facility.

Two or more animal feeding operations under common ownership are a single animal feeding operation for the purposes of determining the number of animals at an operation if they adjoin each other or if they use a common area or system for the disposal of wastes.

"Best Management Practices" or "BMPs" means structural improvements, prohibitions of practices, maintenance procedures, and other management practices to prevent or reduce the pollution of surface waters. BMPs also include

treatment requirements, operating procedures, and practices to control site runoff, spillage or leaks, or drainage from raw material storage.

"Concentrated animal feeding operation" or "CAFO" means an animal feeding operation that is defined as a "Large CAFO" or as a "Medium CAFO," or that is designated as a "Medium CAFO" or a "Small CAFO." Any AFO may be designated as a CAFO by the director in accordance with the provisions of 40 CFR 122.23 (April 14, 2003).

1. "Large CAFO." An AFO is defined as a Large CAFO if it stables or confines as many as or more than the numbers of animals specified in any of the following categories:
 - a. 700 mature dairy cattle, whether milked or dry;
 - b. 1,000 veal calves;
 - c. 1,000 cattle other than mature dairy cows or veal calves. Cattle includes but is not limited to heifers, steers, bulls, and cow-calf pairs;
 - d. 2,500 swine each weighing 55 pounds or more;
 - e. 10,000 swine each weighing less than 55 pounds;
 - f. 500 horses;
 - g. 10,000 sheep or lambs;
 - h. 55,000 turkeys;
 - i. 30,000 laying hens or broilers, if the AFO uses a liquid manure handling system;
 - j. 125,000 chickens (other than laying hens), if the AFO uses other than a liquid manure handling system;
 - k. 82,000 laying hens, if the AFO uses other than a liquid manure handling system;
 - l. 30,000 ducks, if the AFO uses other than a liquid manure handling system; or
 - m. 5,000 ducks, if the AFO uses a liquid manure handling system.

2. "Medium CAFO." The term "Medium CAFO" includes any AFO that has the type and number of animals found within any of the ranges below and that has been defined or designated as a CAFO. An AFO is defined as a Medium CAFO if:

a. The type and number of animals it stables or confines falls within any of the following ranges:

(1) 200 to 699 mature dairy cattle (whether milked or dry cows);

(2) 300 to 999 veal calves;

(3) 300 to 999 cattle other than mature dairy cows or veal calves. Cattle includes but is not limited to heifers, steers, bulls, and cow-calf pairs;

(4) 750 to 2,499 swine (each weighing 55 pounds or more);

(5) 3,000 to 9,999 swine (each weighing less than 55 pounds);

(6) 150 to 499 horses;

(7) 3,000 to 9,999 sheep or lambs;

(8) 16,500 to 54,999 turkeys;

(9) 9,000 to 29,999 laying hens or broilers, if the AFO uses a liquid manure handling system;

(10) 37,500 to 124,999 chickens (other than laying hens), if the AFO uses other than a liquid manure handling system;

(11) 25,000 to 81,999 laying hens, if the AFO uses other than a liquid manure handling system;

(12) 10,000 to 29,999 ducks, if the AFO uses other than a liquid manure handling system; or

(13) 1,500 to 4,999 ducks, if the AFO uses a liquid manure handling system; and

b. Either one of the following conditions are met:

(1) Pollutants are discharged into surface waters of the state through a man-made ditch, flushing system, or other similar man-made device; or

(2) Pollutants are discharged directly into surface waters of the state that originate outside of and pass over, across, or through the facility or otherwise come into direct contact with the animals confined in the operation.

The term "man-made" means constructed by man and used for the purpose of transporting wastes.

3. "Small CAFO." An AFO that is designated as a CAFO and is not a Medium CAFO.

"Director" means the Director of the Virginia Department of Environmental Quality, or his designee.

"Operator" means any owner or operator (individual, partnership, corporation, or association) of an AFO or CAFO in this state that is eligible to be certified under the provisions of this general permit.

"Permittee" means any operator (individual, partnership, corporation, or association) in the Commonwealth of Virginia that is certified to be covered under the provisions of this general permit.

"Process wastewater" means water directly or indirectly used in the operation of the AFO for any or all of the following: spillage or overflow from animal or poultry watering systems; washing, cleaning, or flushing pens, barns, manure pits, or other AFO facilities; direct contact swimming, washing, or spray cooling of animals; or dust control. Process wastewater also includes any water that comes into contact with any raw materials, products, or byproducts including manure, litter, feed, milk, eggs or bedding.

"Production area" means that part of an AFO that includes the animal confinement area, the manure storage area, the raw materials storage area, and the waste containment areas. The animal confinement area includes but is not limited to open lots, housed lots, feedlots, confinement houses, stall barns, free stall barns, milkrooms, milking centers, cowyards, barnyards, medication pens, walkers, animal walkways, and stables. The manure storage area includes but is not limited to lagoons, runoff ponds, storage sheds, stockpiles, under house or pit storages, liquid impoundments, static piles, and composting piles. The raw materials storage area includes but is not limited to feed silos, silage bunkers, and bedding materials. The waste containment area includes but is not limited to settling basins, and areas within berms and diversions that separate uncontaminated storm water. Also included in the definition of production area is

any egg washing or egg processing facility, and any area used in the storage, handling, treatment, or disposal of mortalities.

"Setback" means a specified distance from surface waters or potential conduits to surface waters where manure, litter, and process wastewater may not be land applied. Examples of conduits to surface waters include but are not limited to open tile line intake structures, sinkholes, and agricultural well heads.

"Storm water" means storm water runoff, snow melt runoff, and surface runoff and drainage.

"Vegetated buffer" means a permanent strip of dense perennial vegetation established parallel to the contours of and perpendicular to the dominant slope of the field for the purposes of slowing water runoff, enhancing water infiltration, and minimizing the risk of any potential nutrients or pollutants from leaving the field and reaching surface waters.

9 VAC 25-191-20. Purpose; Delegation of Authority; Effective Date of the Permit.

A. This general permit regulation governs the pollutant management activities of animal wastes and process wastewater at concentrated animal feeding operations. These concentrated animal feeding operations may operate and maintain treatment works for waste storage, treatment or recycling and may perform land application of manure, litter, process wastewater, compost, biosolids, or sludges.

B. The director, or an authorized representative, may perform any act of the board provided under this regulation, except as limited by § 62.1-44.14 of the Code of Virginia.

C. This general permit will become effective on January 1, 2006, and will expire five years from the effective date.

9 VAC 25-191-30. Authorization to Discharge.

A. Any owner or operator governed by this general permit is hereby authorized to discharge animal wastes and process wastewater at concentrated animal feeding operations to surface waters of the Commonwealth of Virginia provided that the owner submits a complete registration statement of 9VAC25-191-40 and receives notification of coverage by the board, and has complied with the following conditions:

1. The owner has not been required to obtain an individual permit according to 9VAC25-31;

2. The owner has complied or will comply with the effluent limitations and other requirements of 9VAC25-191-50;

3. The activities of the concentrated animal feeding operation shall not contravene the Water Quality Standards, as amended and adopted by the board, or any provision of the State Water Control Law. There shall be no point source discharge of manure, litter or process wastewater to surface waters of the state except in the case of a storm event greater than the 25-year, 24-hour storm, except that for swine, poultry, and veal calf operations constructed after April 14, 2003, in the case of a storm event greater than the 100-year, 24-hour storm. Agricultural storm water discharges are permitted. Domestic sewage or industrial waste shall not be managed under this general permit;

4. Confined poultry feeding operations that use disposal pits for routine disposal of daily mortalities shall not be covered under this general permit. The use of a disposal pit by a permittee for routine disposal of daily poultry mortalities shall be considered a violation of this permit. This prohibition shall not apply to the emergency disposal of dead poultry done according to regulations adopted pursuant to § 3.1-726 or Chapter 14 (§ 10.1-1400 et seq.) of Title 10.1 of the Code of Virginia; and

5. Adjoining property notification.

a. The owner shall give notice of the registration statement to all owners or residents of property that adjoins the property on which the animal feeding operation will be located. Such notice shall include (i) the types and maximum number of animals that will be maintained at the facility and (ii) the address and phone number of the appropriate department regional office to which comments relevant to the permit may be submitted. This notice requirement is waived whenever registration is for the purpose of renewing coverage under a permit and no expansion is proposed and the department has not issued any special or consent order relating to violations under the existing permit. This notice is also waived for poultry operations except those that propose construction of new poultry growing houses after December 1, 2000.

b. Any person may submit written comments on the proposed operation to the department within 30 days of the date of the filing of the registration statement. If, on the basis of such written comments or his review, the director determines that the proposed operation will not be capable of complying with the provisions of the general permit, the director shall require the owner to obtain an individual permit for the operation. Any such determination by the director shall be made in writing and received by the owner not more than 45 days after the filing of the registration statement or, if in the director's sole discretion additional time is necessary to evaluate comments received from the public, not more than 60 days after the filing of the registration statement.

B. The owner shall not be authorized by this general permit to discharge to state waters specifically named in other board regulations or policies that prohibit such discharges.

C. Receipt of this general permit does not relieve any owner of the responsibility to comply with any other applicable federal, state or local statute, ordinance or regulation.

9 VAC 25-191-40. Registration Statement.

A. In order to be covered under the general permit, the owner shall file a complete VPDES Concentrated Animal Feeding Operation General Permit registration statement or a VPA Animal Feeding Operation General Permit registration statement. The registration statement submitted shall include the following information:

1. The name, location, and mailing address of the facility;
2. The latitude and longitude of the production area (entrance to production area);
3. The name, mailing address, and telephone number of the owner and operator;
4. The name and telephone number of a contact person other than the operator, if applicable;
5. The best time of day and day of the week to contact the operator or contact person;
6. If the facility has an existing VPA or VPDES permit, the permit number;
7. The method of mortality management;
8. A topographic map of the geographic area in which the CAFO is located showing the specific location of the production area;
9. Specific information about the maximum number, average weight of and type of animals, whether in open confinement or housed under roof (beef cattle, broilers, layers, swine weighing 55 pounds or more, swine weighing less than 55 pounds, mature dairy cows, dairy heifers, veal calves, sheep and lambs, horses, ducks, turkeys, other);
10. The type of containment and storage (anaerobic lagoon, roofed storage shed, storage ponds, underfloor pits, above ground storage tanks, below ground storage tanks, concrete pad, impervious soil pad, other) and total capacity for manure, litter, and process wastewater storage (tons/gallons);
11. The total number of acres under control of the applicant available for land application of manure, litter, or process wastewater;

12. Estimated amounts of manure, litter, and process wastewater generated per year (tons/gallons); and

13. Estimated amounts of poultry waste transferred to other persons per year (tons).

B. The applicant shall attach to the registration statement a copy of the facility's approved nutrient management plan and a letter from the Department of Conservation and Recreation certifying approval of the facility's nutrient management plan and if the nutrient management plan was written after December 31, 2005, that the facility's nutrient management plan was developed by a certified nutrient management planner in accordance with § 10.1-104.2 of the Code of Virginia.

C. The registration statement shall include the following certification: "I certify that notice of the registration statement has been given to all owners or residents of property that adjoins the property on which the concentrated animal feeding operation will be located. This notice included the types and numbers of animals that will be maintained at the facility and the address and phone number of the appropriate Department of Environmental Quality regional office to which comments relevant to the permit may be submitted. (The preceding certification is waived if the registration is for renewing coverage under a permit and no expansion of the operation is proposed and the department has not issued any special or consent order relating to violations under the existing permit. This notice is also waived for poultry operations except those that propose construction of new poultry growing houses after December 1, 2000.) I certify under penalty of law that all the requirements of the board for the general permit are being met and that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system or those persons directly responsible for gathering the information, the information submitted is to the best of my knowledge and belief true, accurate, and complete. I am aware that there are significant penalties for submitting false information including the possibility of fine and imprisonment for knowing violations."

D. Where to submit. The registration statement shall be submitted to the DEQ Regional Office that serves the area where the concentrated animal feeding operation is located.

9 VAC 25-191-50. Contents of the General Permit.

Any CAFO whose registration statement is accepted by the board will receive the following general permit and shall comply with the requirements therein and be subject to the VPDES Permit Regulation, 9VAC25-31.

General Permit No.: VAG01 Effective Date: January 1, 2006 Expiration Date: December 31, 2010

GENERAL PERMIT FOR CONCENTRATED ANIMAL FEEDING OPERATIONS
AUTHORIZATION TO DISCHARGE UNDER THE VIRGINIA POLLUTANT DISCHARGE
ELIMINATION SYSTEM AND THE VIRGINIA STATE WATER CONTROL LAW

In compliance with the provisions of the Clean Water Act, as amended, and pursuant to the State Water Control Law and regulations adopted pursuant thereto, owners of concentrated animal feeding operations are authorized to discharge to surface waters within the boundaries of the Commonwealth of Virginia, except those specifically named in board regulations or policies that prohibit such discharges.

The authorized discharge shall be in accordance with this cover page, Part I???Pollutant Management and Monitoring Requirements, Part II???Best Management Practices, Nutrient Management, and Special Conditions, and Part III???Conditions Applicable to All VPDES Permits, as set forth herein.

Part I Pollutant Management and Monitoring Requirements

A. Pollutant management authorization. During the period beginning with the date of coverage under this general permit and lasting until the permit's expiration date, the permittee is authorized to manage pollutants at the location or locations identified in the registration statement and the facility's approved nutrient management plan.

B. Monitoring requirements.

1. At earthen liquid waste storage facilities constructed after December 1, 1998, to an elevation below the seasonal high water table or within one foot thereof, ground water monitoring wells shall be installed. A minimum of one up gradient and one down gradient well shall be installed at each earthen waste storage facility that requires ground water monitoring. Existing wells may be utilized to meet this requirement if properly located and constructed.
2. All facilities previously covered under a VPA permit that required ground water monitoring shall continue monitoring consistent with the requirements listed below regardless of where they are located relative to the seasonal high water table.
3. At facilities where ground water monitoring is required, the following conditions apply:
 - a. One data set shall be collected from each well prior to any waste being placed in the storage facility.
 - b. The static water level shall be measured prior to bailing well water for sampling.

c. At least three well volumes of ground water shall be withdrawn immediately prior to sampling each monitoring well.

4. In accordance with subdivisions 2 and 3 of this subsection, the ground water shall be monitored by the permittee at the monitoring wells as specified below. Additional ground water monitoring may be required in the facility's approved nutrient management plan.

GROUND WATER MONITORING				
PARAMETER	LIMITATIONS	UNITS	MONITORING REQUIREMENTS	
			Frequency	Sample Type
Static Water Level	NL	ft	1/3 years	Sample Type
Ammonia Nitrogen	NL	mg/L	1/3 years	Measured
Nitrate Nitrogen	NL	mg/L	1/3 years	Grab
pH	NL	SU	1/3 years	Grab
Conductivity	NL	umhos/cm	1/3 years	Grab

NL = No limit, this is a monitoring requirement only.

5. Soil at the land application sites shall be monitored as specified below. Additional soils monitoring may be required in the facility's approved nutrient management plan.

SOILS MONITORING				
PARAMETER	LIMITATIONS	UNITS	MONITORING REQUIREMENTS	
			Frequency	Sample Type
pH	NL	SU	1/3 years	Composite
Phosphorus	NL	ppm or lbs/ac	1/3 years	Composite
Potash	NL	ppm or lbs/ac	1/3 years	Composite
Calcium	NL	ppm or lbs/ac	1/3 years	Composite
Magnesium	NL	ppm or lbs/ac	1/3 years	Composite

NL = No limit, this is a monitoring requirement only.

SU = Standard Units

6. Soil monitoring shall be conducted at a depth of between 0-6 inches, unless otherwise specified in the facility's approved nutrient management plan.

7. Waste shall be monitored as specified below. Additional waste monitoring may be required in the facility's approved nutrient management plan.

WASTE MONITORING

PARAMETERES	LIMITATIONS	UNITS	MONITORING REQUIREMENTS	
			Frequency	Sample Type
Total Kjeldahl Nitrogen	NL	*	1/year	Composite
Ammonia Phosphorus	NL	*	1/year	Composite
Total Phosphorus	NL	*	1/year	Composite
Total Potassium	NL	*	1/year	Composite
Calcium**	NL	*	1/year	Composite
Magnesium**	NL	*	1/year	Composite
Moisture Content	NL	%	1/year	Composite

NL = No limit, this is a monitoring requirement only.

* Parameters for waste may be reported as a percent, as lbs/ton or lbs/1000 gallons, or as ppm where appropriate.

** Calcium and magnesium monitoring not required for poultry waste.

8. Analysis of soil and waste shall be according to methods specified in the facility's approved nutrient management plan.

9. All monitoring data collected as required by this section and any additional monitoring data shall be maintained on site for a period of five years and shall be made available to department personnel upon request.

Part II Waste Storage Facility Design, Operation, and Maintenance; Recordkeeping and Reporting; Nutrient Management; Special Conditions

A. Waste storage facility design, operation and maintenance.

1. Any manure, litter, or process wastewater storage facility shall be designed and operated to (i) prevent point source discharges of pollutants to state waters except in the case of a storm event greater than the 25-year, 24-hour storm; or for swine, poultry, and veal calf operations constructed after April 14, 2003, in the case of a storm event greater than the 100-year, 24-hour storm, and (ii) provide adequate waste storage capacity to accommodate periods when the ground is frozen or saturated, periods when land application of nutrients should not occur due to limited or nonexistent crop nutrient uptake, and periods when physical limitations prohibit the land application of waste.

2. Waste storage facilities constructed after April 14, 2003, shall not be located on a 100-year floodplain, except that dry poultry waste storage facilities may be constructed on the 100-year floodplain, when the following conditions are met:

a. When the poultry operation has no land outside the floodplain on which to construct the facility; and

b. The facility is constructed so that the poultry waste is stored above the 100-year flood elevation or otherwise protected from floodwaters through the construction of berms or similar best management flood control structures.

New, expanded or replacement poultry growing houses that are constructed after December 1, 2000, shall not be located within a 100-year floodplain unless they are part of an existing, ongoing confined poultry feeding operation and are constructed so that the poultry and poultry litter are housed above the 100-year flood elevation or otherwise protected from floodwaters through construction of berms or similar best management flood control structures.

3. Earthen liquid waste storage facilities constructed after December 1, 1998, shall include a properly designed and installed liner. Such liner shall be either a synthetic liner of at least 20 mils thickness or a compacted soil liner of at least one-foot thickness with a maximum permeability rating of 0.0014 inches per hour. A licensed professional engineer, an employee of the Natural Resources Conservation Service of the United States Department of Agriculture with appropriate engineering approval authority, or an employee of a soil and water conservation district with appropriate engineering approval authority shall certify that the siting, design and construction of the waste storage facility comply with the requirements of this permit. This certification shall be maintained on site.
4. At earthen liquid waste storage facilities constructed below the seasonal high water table, the top surface of the waste shall be maintained at a level of at least two feet above the water table.
5. All liquid waste storage facilities shall maintain at least one foot of freeboard at all times, except in the case of a storm event greater than a 25-year, 24-hour storm. Liquid waste storage facilities at swine, poultry, and veal calf operations constructed after April 14, 2003, shall maintain at least one foot of freeboard at all times, except in the case of a storm event greater than a 100-year, 24-hour storm.
6. All equipment needed for the proper operation of the permitted facilities shall be maintained in good working order. The manufacturer's operating and maintenance manuals shall be retained for references to allow for timely maintenance and prompt repair of equipment when appropriate. The operator shall periodically inspect for leaks on equipment used for land application of manure, litter, or process wastewater.
7. All open surface liquid impoundments shall have a depth marker that clearly indicates the minimum capacity necessary to contain the runoff and direct precipitation of the 25-year, 24-hour rainfall event; or in the case of swine, poultry, and veal calf operations constructed after April 14, 2003, the runoff and direct precipitation from a 100-year, 24-hour rainfall event.

8. When any waste storage facility is no longer needed, the permittee shall close it in a manner that (i) minimizes the need for further maintenance and (ii) controls, minimizes or eliminates, to the extent necessary to protect human health and the environment, the post-closure escape of uncontrolled leachate, surface runoff, or waste decomposition products to the ground water, surface water or the atmosphere. At closure, the permittee shall remove all waste from the waste storage facility. At waste storage facilities without permanent covers and impermeable ground barriers, all residual waste shall be removed from the surface below the stockpile when the waste is taken out of storage. Removed waste materials shall be utilized according to the nutrient management plan.

9. Poultry waste shall be stored according to the nutrient management plan and in a manner that prevents contact with surface water and ground water. Dry poultry waste that is stockpiled outside of the growing house for more than 14 days shall be kept in a facility that provides adequate storage.

Adequate storage shall, at a minimum, include the following:

- a. Poultry waste shall be covered to protect it from precipitation and wind;
- b. Storm water shall not run onto or under the stored poultry waste; and
- c. A minimum of two feet separation distance shall be maintained to the seasonal high water table or an impermeable barrier shall be used under the stored poultry waste. All dry poultry waste storage facilities that use an impermeable barrier shall maintain a minimum of one foot separation between the seasonal high water table and the impermeable barrier. Seasonal high water table means that portion of the soil profile where a color change has occurred in the soil as a result of saturated soil conditions or where soil concretions have formed. Typical colors are gray mottlings, solid gray or black. The depth in the soil at which these conditions first occur is termed the seasonal high water table. Impermeable barriers shall be constructed of at least 12 inches of compacted clay, at least four inches of reinforced concrete, or another material of similar structural integrity that has a minimum permeability rating of 0.0014 inches per hour (1×10^{-6} centimeters per second).

10. Mortalities shall not be disposed of in any liquid manure or process wastewater system, and the permittee shall record methods of mortality management and practices used by the CAFO to prevent the discharge of pollutants to surface water. Confined poultry feeding operations that use disposal pits for routine disposal of daily mortalities shall not be covered under this general permit. The use of a disposal pit for routine disposal of daily poultry mortalities by a permittee shall be considered a violation of this permit. This prohibition does not apply to the emergency disposal of dead poultry done

according to regulations adopted pursuant to § 3.1-726 or Chapter 14 (§ 10.1-1400 et seq.) of Title 10.1 of the Code of Virginia.

B. Recordkeeping and reporting.

1. The permittee shall maintain records documenting the following visual inspections:

- a. Weekly inspections of all storm water diversion devices, runoff diversion structures, and devices channelling contaminated storm water to any wastewater or manure storage structure;
- b. Daily inspection of water lines, including drinking water or cooling water lines; and
- c. Weekly inspections of the manure, litter, and process wastewater storage structures; the inspection shall record the level in liquid impoundments as indicated by a depth marker.

The permittee shall also document any actions taken to correct deficiencies found during the visual inspections; deficiencies not corrected within 30 days shall be accompanied by an explanation of the factors preventing immediate correction;

2. The permittee shall maintain records documenting the current design of any manure or litter storage structures, including volume for solids accumulation, design treatment volume, total design volume, and approximate number of days of storage capacity;

3. The permittee shall maintain records of the date, time, and estimated volume of any overflow from a waste or process wastewater storage structure;

4. Records shall be maintained to demonstrate:

- a. What fields under the ownership or operational control of the CAFO received waste;
- b. At what rate waste has been applied;
- c. That the application schedule has been followed;
- d. The method used to apply the waste;
- e. What crops have been planted;

f. The weather conditions at the time of application and for 24 hours prior to and following application;

g. What nutrients from sources other than manure, litter or process wastewater have been applied to each field; and

h. The date or dates of manure application equipment inspection. These records shall be maintained on site for a period of five years after recorded application is made and shall be made available to department personnel upon request.

5. The permittee shall submit an annual report to the director by February 15 of each year for the previous calendar year or part thereof since covered by this general permit. The annual report shall include:

a. The number and type of animals, whether in open confinement or housed under roof (beef cattle, broilers, layers, swine weighing 55 pounds or more, swine weighing less than 55 pounds, mature dairy cows, dairy heifers, veal calves, sheep and lambs, horses, ducks, turkeys, other);

b. Estimated amount of total manure, litter and process wastewater generated by the CAFO in the previous 12 months (tons/gallons);

c. Estimated amount of poultry waste transferred to other persons by the CAFO in the previous 12 months (tons);

d. Total number of acres for land application covered by the facility's approved nutrient management plan;

e. Total number of acres under control of the CAFO that were used for land application of manure, litter and process wastewater in the previous 12 months;

f. Summary of all manure, litter and process wastewater discharges from the production area that entered or could be expected to enter state waters in the previous 12 months, including date, time, and approximate volume; and

g. A statement indicating whether the current version of the CAFO's nutrient management plan was developed or approved by a certified nutrient management planner.

6. The permittee shall create, maintain for five years, and make available to the director, upon request, any records that will document the implementation and management of the minimum elements described below:

- a. Ensure adequate storage of manure, litter, and process wastewater, including procedures to ensure proper operation and maintenance of the storage facilities;
- b. Ensure proper management of mortalities (i.e., dead animals) to ensure that they are not disposed of in a liquid manure, storm water, or process wastewater storage or treatment system that is not specifically designed to treat animal mortalities;
- c. Ensure that clean water is diverted, as appropriate, from the production area;
- d. Prevent direct contact of confined animals with surface waters of the state;
- e. Ensure that chemicals and other contaminants handled on-site are not disposed of in any manure, litter, process wastewater, or storm water storage or treatment system unless specifically designed to treat such chemicals and other contaminants;
- f. Identify appropriate site specific conservation practices to be implemented, including as appropriate buffers or equivalent practices, to control runoff of pollutants to surface waters of the state;
- g. Identify protocols for appropriate testing of manure, litter, process wastewater, and soil;
- h. Establish protocols to land apply manure, litter or process wastewater in accordance with site specific nutrient management practices that ensure appropriate agricultural utilization of the nutrients in the manure, litter or process wastewater.

C. Nutrient management.

1. All CAFO owners or operators shall implement a nutrient management plan (NMP) approved by the Department of Conservation and Recreation. All NMP's written after December 31, 2005, shall be developed by a certified nutrient management planner in accordance with § 10.1-104.2 of the Code of Virginia. The NMP shall be maintained on site. All NMPs developed for poultry operations shall be developed with respect to existing state law and regulation. The NMP shall address the form, source, amount, timing, and method of application of nutrients on each field to achieve realistic production goals, while minimizing nitrogen loss to ground and surface waters. NMP's written after December 31, 2005, and NMP's implemented after December 31, 2006, shall also include provisions to minimize phosphorus loss to ground and surface waters according to the most current standards and criteria development by the Department of

Conservation and Recreation at the time the plan is written. The NMP shall be enforceable through this permit. The NMP shall contain at a minimum the following information:

- a. Site map indicating the location of the waste storage facilities and the fields where waste will be applied, unless exempted in Part II D;
- b. Site evaluation and assessment of soil types and potential productivities;
- c. Nutrient management sampling including soil and waste monitoring;
- d. Storage and land area requirements;
- e. Calculation of waste application rates;
- f. Waste application schedules; and
- g. A plan for waste utilization in the event the operation is discontinued.

2. Buffer zones shall be maintained as follows:

- a. Distance from occupied dwellings not on the owner's property???200 feet (unless the occupant of the dwelling signs a waiver of the buffer zone);
- b. Distance from water supply wells or springs -100 feet;
- c. Distance from surface water courses:
 - (1) 100 feet (without a vegetated buffer); or
 - (2) 35-foot wide vegetated buffer; or
 - (3) Other site-specific conservation practices may be approved by the department that will provide pollutant reductions equivalent or better than the reductions that would be achieved by the 100-foot buffer, or 35-foot wide vegetated buffer.
- d. Distance from rock outcroppings (except limestone)???25 feet;
- e. Distance from limestone outcroppings???50 feet;
- f. Waste shall not be applied in such a manner that it would discharge to sinkholes that may exist in the area.

D. Special conditions.

1. Poultry waste may be transferred from a permitted poultry grower to another person or broker without the requirement for the identification of fields where such waste will be applied in the facility's approved nutrient management plan if the following conditions are met:

a. When a poultry grower transfers to another person more than 10 tons of poultry waste in any 365-day period, the poultry grower shall provide that person a copy of the most recent nutrient analysis for the poultry waste and a fact sheet approved by the department, in consultation with the Department of Conservation and Recreation, that includes appropriate practices for proper storage and management of the waste. The person or broker receiving the waste shall provide the poultry grower:

- (1) His name and address,
- (2) Written acknowledgement of receipt of the waste,
- (3) The nutrient analysis of the waste, and
- (4) The fact sheet.

If the person receiving the waste is a poultry waste broker, then he shall also certify in writing that he will provide a copy of the nutrient analysis and fact sheet to each end user to whom he transfers poultry waste.

b. When a poultry grower transfers to another person more than 10 tons of poultry waste in any 365-day period, the poultry grower shall keep a record of the following:

- (1) The amount of poultry waste received by the person,
- (2) The date of the transaction,
- (3) The nutrient analysis of the waste,
- (4) The locality in which the recipient intends to utilize the waste (i.e., nearest town or city and zip code),
- (5) The name of the stream or waterbody known to the recipient that is nearest to the waste utilization site, and
- (6) The signed waste transfer acknowledgement.

These records shall be maintained on site for five years after the transaction and shall be made available to department personnel upon request.

c. Poultry waste generated by this facility shall not be applied to fields owned by or under the operational control of either the poultry grower or a legal entity in which the poultry grower has an ownership interest unless the fields are included in the facility's approved nutrient management plan.

2. The permittee shall notify the department's regional office at least 14 days prior to:

a. Animals being initially placed in the facility; or

b. Utilization of any new waste storage facilities.

3. Each operator of a facility covered by this general permit shall have completed the training program offered or approved by the Department of Conservation and Recreation in the two years prior to submitting the registration statement for general permit coverage, or shall complete such training within one year after submitting the registration statement for general permit coverage. All operators shall complete the training program at least once every three years.

Part III Conditions Applicable to All VPDES Permits

A. Monitoring.

1. Samples and measurements taken as required by this permit shall be representative of the monitored activity.

2. Monitoring shall be conducted according to procedures approved under 40 CFR Part 136 (2001) or alternative methods approved by the U.S. Environmental Protection Agency, unless other procedures have been specified in this permit.

3. The permittee shall periodically calibrate and perform maintenance procedures on all monitoring and analytical instrumentation at intervals that ensure accuracy of measurements.

B. Records.

1. Records of monitoring information shall include:

a. The date, exact place, and time of sampling or measurements;

b. The individual or individuals who performed the sampling or measurements;

- c. The dates analyses were performed;
- d. The individual or individuals who performed the analyses;
- e. The analytical techniques or methods used; and
- f. The results of such analyses.

2. Except for records of monitoring information required by this permit related to the permittee's sewage sludge use and disposal activities, which shall be retained for a period of at least five years, the permittee shall retain records of all monitoring information, including all calibration and maintenance records and all original strip chart recordings for continuous monitoring instrumentation, copies of all reports required by this permit, and records of all data used to complete the registration statement for this permit, for a period of at least three years from the date of the sample, measurement, report or request for coverage. This period of retention shall be extended automatically during the course of any unresolved litigation regarding the regulated activity or regarding control standards applicable to the permittee, or as requested by the board.

C. Reporting monitoring results.

1. The permittee shall submit the results of the monitoring required by this permit not later than the tenth day of the month after monitoring takes place, unless another reporting schedule is specified elsewhere in this permit. Monitoring results shall be submitted to the department's regional office.
2. Monitoring results shall be reported on a Discharge Monitoring Report (DMR) or on forms provided, approved or specified by the department.
3. If the permittee monitors any pollutant specifically addressed by this permit more frequently than required by this permit using test procedures approved under 40 CFR Part 136 (2001) or using other test procedures approved by the U.S. Environmental Protection Agency or using procedures specified in this permit, the results of this monitoring shall be included in the calculation and reporting of the data submitted in the DMR or reporting form specified by the department.
4. Calculations for all limitations that require averaging of measurements shall utilize an arithmetic mean unless otherwise specified in this permit.

D. Duty to provide information. The permittee shall furnish to the department, within a reasonable time, any information that the board may request to determine whether cause exists for modifying, revoking and reissuing, or terminating this permit or to determine compliance with this permit. The board may require the permittee to furnish, upon request, such plans, specifications, and other pertinent information as may be necessary

to determine the effect of the wastes from his discharge on the quality of state waters, or such other information as may be necessary to accomplish the purposes of the State Water Control Law. The permittee shall also furnish to the department upon request, copies of records required to be kept by this permit.

E. Compliance schedule reports. Reports of compliance or noncompliance with, or any progress reports on, interim and final requirements contained in any compliance schedule of this permit shall be submitted no later than 14 days following each schedule date.

F. Unauthorized discharges. Except in compliance with this permit, or another permit issued by the board, it shall be unlawful for any person to:

1. Discharge into state waters sewage, industrial wastes, other wastes, or any noxious or deleterious substances; or
2. Otherwise alter the physical, chemical or biological properties of such state waters and make them detrimental to the public health, or to animal or aquatic life, or to the use of such waters for domestic or industrial consumption, or for recreation, or for other uses.

G. Reports of unauthorized discharges. Any permittee who discharges or causes or allows a discharge of sewage, industrial waste, other wastes or any noxious or deleterious substance into or upon state waters in violation of Part III F or who discharges or causes or allows a discharge that may reasonably be expected to enter state waters in violation of Part III F, shall notify the department of the discharge immediately upon discovery of the discharge, but in no case later than 24 hours after said discovery. A written report of the unauthorized discharge shall be submitted to the department within five days of discovery of the discharge. The written report shall contain:

1. A description of the nature and location of the discharge;
2. The cause of the discharge;
3. The date on which the discharge occurred;
4. The length of time that the discharge continued;
5. The volume of the discharge;
6. If the discharge is continuing, how long is it expected to continue;
7. If the discharge is continuing, what the expected total volume of the discharge will be; and
8. Any steps planned or taken to reduce, eliminate and prevent a recurrence of the present discharge or any future discharges not authorized by this permit.

Discharges reportable to the department under the immediate reporting requirements of other regulations are exempted from this requirement.

H. Reports of unusual or extraordinary discharges. If any unusual or extraordinary discharge including a bypass or upset should occur from a treatment works and the discharge enters or could be expected to enter state waters, the permittee shall promptly notify, in no case later than 24 hours, the department by telephone after the discovery of the discharge. This notification shall provide all available details of the incident, including any adverse effects on aquatic life and the known number of fish killed. The permittee shall reduce the report to writing and shall submit it to the department within five days of discovery of the discharge in accordance with Part III I 2. Unusual and extraordinary discharges include but are not limited to any discharge resulting from:

1. Unusual spillage of materials resulting directly or indirectly from processing operations;
2. Breakdown of processing or accessory equipment;
3. Failure or taking out of service some or all of the treatment works; and
4. Flooding or other acts of nature.

I. Reports of noncompliance. The permittee shall report any noncompliance that may adversely affect state waters or may endanger public health.

1. An oral report shall be provided within 24 hours from the time the permittee becomes aware of the circumstances. The following shall be included as information that shall be reported within 24 hours under this subdivision:
 - a. Any unanticipated bypass; and
 - b. Any upset that causes a discharge to surface waters.
2. A written report shall be submitted within five days and shall contain:
 - a. A description of the noncompliance and its cause;
 - b. The period of noncompliance, including exact dates and times, and if the noncompliance has not been corrected, the anticipated time it is expected to continue; and
 - c. Steps taken or planned to reduce, eliminate, and prevent reoccurrence of the noncompliance.

The board may waive the written report on a case-by-case basis for reports of noncompliance under Part III I if the oral report has been received within 24 hours and no adverse impact on state waters has been reported.

3. The permittee shall report all instances of noncompliance not reported under Parts III I 1 or 2, in writing, at the time the next monitoring reports are submitted. The reports shall contain the information listed in Part III I 2.

NOTE: The immediate (within 24 hours) reports required in Parts III G, H and I may be made to the department's regional office. Reports may be made by telephone or by fax. For reports outside normal working hours, leave a message and this shall fulfill the immediate reporting requirement. For emergencies, the Virginia Department of Emergency Management maintains a 24-hour telephone service at 1-800-468-8892.

J. Notice of planned changes.

1. The permittee shall give notice to the department as soon as possible of any planned physical alterations or additions to the permitted facility. Notice is required only when:

a. The permittee plans alteration or addition to any building, structure, facility, or installation from which there is or may be a discharge of pollutants, the construction of which commenced:

(1) After promulgation of standards of performance under § 306 of the Clean Water Act that are applicable to such source; or

(2) After proposal of standards of performance in accordance with § 306 of the Clean Water Act that are applicable to such source, but only if the standards are promulgated in accordance with § 306 within 120 days of their proposal;

b. The alteration or addition could significantly change the nature or increase the quantity of pollutants discharged. This notification applies to pollutants that are subject neither to effluent limitations nor to notification requirements specified elsewhere in this permit; or

c. The alteration or addition results in a significant change in the permittee's sludge use or disposal practices, and such alteration, addition, or change may justify the application of permit conditions that are different from or absent in the existing permit, including notification of additional use or disposal sites not reported during the permit application process or not reported pursuant to an approved land application plan.

2. The permittee shall give advance notice to the department of any planned changes in the permitted facility or activity that may result in noncompliance with permit requirements.

K. Signatory requirements.

1. Registration statement. All registration statements shall be signed as follows:

a. For a corporation: by a responsible corporate officer. For the purpose of this subsection, a responsible corporate officer means (i) a president, secretary, treasurer, or vice-president of the corporation in charge of a principal business function, or any other person who performs similar policy- or decision-making functions for the corporation or (ii) the manager of one or more manufacturing, production, or operating facilities, provided the manager is authorized to make management decisions that govern the operation of the regulated facility including having the explicit or implicit duty of making major capital investment recommendations, and initiating and directing other comprehensive measures to assure long-term environmental compliance with environmental laws and regulations; the manager can ensure that the necessary systems are established or actions taken to gather complete and accurate information for permit application requirements; and where authority to sign documents has been assigned or delegated to the manager in accordance with corporate procedures;

b. For a partnership or sole proprietorship: by a general partner or the proprietor, respectively; or

c. For a municipality, state, federal, or other public agency: by either a principal executive officer or ranking elected official. For purposes of this subsection, a principal executive officer of a public agency includes (i) the chief executive officer of the agency, or (ii) a senior executive officer having responsibility for the overall operations of a principal geographic unit of the agency.

2. Reports, etc. All reports required by permits, and other information requested by the board shall be signed by a person described in Part III K 1, or by a duly authorized representative of that person. A person is a duly authorized representative only if:

a. The authorization is made in writing by a person described in Part III K 1;

b. The authorization specifies either an individual or a position having responsibility for the overall operation of the regulated facility or activity such as the position of plant manager, operator of a well or a well field, superintendent, position of equivalent responsibility, or an individual or

position having overall responsibility for environmental matters for the company (a duly authorized representative may thus be either a named individual or any individual occupying a named position); and

c. The written authorization is submitted to the department.

3. Changes to authorization. If an authorization under Part III K 2 is no longer accurate because a different individual or position has responsibility for the overall operation of the facility, a new authorization satisfying the requirements of Part III K 2 shall be submitted to the department prior to or together with any reports, or information to be signed by an authorized representative.

4. Certification. Any person signing a document under Parts III K 1 or 2 shall make the following certification:

"I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations."

L. Duty to comply. The permittee shall comply with all conditions of this permit. Any permit noncompliance constitutes a violation of the State Water Control Law and the Clean Water Act, except that noncompliance with certain provisions of this permit may constitute a violation of the State Water Control Law but not the Clean Water Act. Permit noncompliance is grounds for enforcement action; for permit termination, revocation and reissuance, or modification; or denial of a permit renewal application.

The permittee shall comply with effluent standards or prohibitions established under § 307(a) of the Clean Water Act for toxic pollutants and with standards for sewage sludge use or disposal established under § 405(d) of the Clean Water Act within the time provided in the regulations that establish these standards or prohibitions or standards for sewage sludge use or disposal, even if this permit has not yet been modified to incorporate the requirement.

M. Duty to reapply. If the permittee wishes to continue an activity regulated by this permit after the expiration date of this permit, the permittee shall submit a new registration statement at least 90 days before the expiration date of the existing permit, unless permission for a later date has been granted by the board. The board shall not grant permission for registration statements to be submitted later than the expiration date of the existing permit.

N. Effect of a permit. This permit does not convey any property rights in either real or personal property or any exclusive privileges, nor does it authorize any injury to private property or invasion of personal rights, or any infringement of federal, state or local law or regulations.

O. State law. Nothing in this permit shall be construed to preclude the institution of any legal action under, or relieve the permittee from any responsibilities, liabilities, or penalties established pursuant to any other state law or regulation or under authority preserved by, § 510 of the Clean Water Act. Except as provided in permit conditions on "bypassing" (Part III U), and "upset" (Part III V), nothing in this permit shall be construed to relieve the permittee from civil and criminal penalties for noncompliance.

P. Oil and hazardous substance liability. Nothing in this permit shall be construed to preclude the institution of any legal action or relieve the permittee from any responsibilities, liabilities, or penalties to which the permittee is or may be subject under §§ 62.1-44.34:14 through 62.1-44.34:23 of the State Water Control Law.

Q. Proper operation and maintenance. The permittee shall at all times properly operate and maintain all facilities and systems of treatment and control (and related appurtenances) that are installed or used by the permittee to achieve compliance with the conditions of this permit. Proper operation and maintenance also includes effective plant performance, adequate funding, adequate staffing, and adequate laboratory and process controls, including appropriate quality assurance procedures. This provision requires the operation of back-up or auxiliary facilities or similar systems that are installed by the permittee only when the operation is necessary to achieve compliance with the conditions of this permit.

R. Disposal of solids or sludges. Solids, sludges or other pollutants removed in the course of treatment or management of pollutants shall be disposed of in a manner so as to prevent any pollutant from such materials from entering state waters.

S. Duty to mitigate. The permittee shall take all reasonable steps to minimize or prevent any discharge or sludge use or disposal in violation of this permit that has a reasonable likelihood of adversely affecting human health or the environment.

T. Need to halt or reduce activity not a defense. It shall not be a defense for a permittee in an enforcement action that it would have been necessary to halt or reduce the permitted activity in order to maintain compliance with the conditions of this permit.

U. Bypass.

1. "Bypass" means the intentional diversion of waste streams from any portion of a treatment facility. The permittee may allow any bypass to occur that does not cause effluent limitations to be exceeded, but only if it also is for essential maintenance to assure efficient operation. These bypasses are not subject to the provisions of Parts III U 2 and U 3.

2. Notice.

a. Anticipated bypass. If the permittee knows in advance of the need for a bypass, prior notice shall be submitted, if possible at least ten days before the date of the bypass.

b. Unanticipated bypass. The permittee shall submit notice of an unanticipated bypass as required in Part III I.

3. Prohibition of bypass.

a. Bypass is prohibited, and the board may take enforcement action against a permittee for bypass, unless:

(1) Bypass was unavoidable to prevent loss of life, personal injury, or severe property damage;

(2) There were no feasible alternatives to the bypass, such as the use of auxiliary treatment facilities, retention of untreated wastes, or maintenance during normal periods of equipment downtime. This condition is not satisfied if adequate back-up equipment should have been installed in the exercise of reasonable engineering judgment to prevent a bypass that occurred during normal periods of equipment downtime or preventive maintenance; and

(3) The permittee submitted notices as required under Part III U 2.

b. The board may approve an anticipated bypass, after considering its adverse effects, if the board determines that it will meet the three conditions listed above in Part III U 3 a.

V. Upset.

1. An upset constitutes an affirmative defense to an action brought for noncompliance with technology-based permit effluent limitations if the requirements of Part III V 2 are met. A determination made during administrative review of claims that noncompliance was caused by upset, and before an action for noncompliance, is not a final administrative action subject to judicial review.

2. A permittee who wishes to establish the affirmative defense of upset shall demonstrate, through properly signed, contemporaneous operating logs, or other relevant evidence, that:

- a. An upset occurred and that the permittee can identify the causes of the upset;
- b. The permitted facility was at the time being properly operated;
- c. The permittee submitted notice of the upset as required in Part III I; and
- d. The permittee complied with any remedial measures required under Part III S.

3. In any enforcement proceeding the permittee seeking to establish the occurrence of an upset has the burden of proof.

W. Inspection and entry. The permittee shall allow the director or an authorized representative, upon presentation of credentials and other documents as may be required by law, to:

1. Enter upon the permittee's premises where a regulated facility or activity is located or conducted, or where records must be kept under the conditions of this permit;
2. Have access to and copy, at reasonable times, any records that must be kept under the conditions of this permit;
3. Inspect at reasonable times any facilities, equipment (including monitoring and control equipment), practices, or operations regulated or required under this permit; and
4. Sample or monitor at reasonable times, for the purposes of assuring permit compliance or as otherwise authorized by the Clean Water Act and the State Water Control Law, any substances or parameters at any location. For purposes of this subsection, the time for inspection shall be deemed reasonable during regular business hours, and whenever the facility is discharging. Nothing contained herein shall make an inspection unreasonable during an emergency.

X. Permit actions. Permits may be modified, revoked and reissued, or terminated for cause. The filing of a request by the permittee for a permit modification, revocation and reissuance, or termination, or a notification of planned changes or anticipated noncompliance does not stay any permit condition.

Y. Transfer of permits.

1. Permits are not transferable to any person except after notice to the department. Except as provided in Part III Y 2, a permit may be transferred by the permittee to a new owner or operator only if the permit has been modified or

revoked and reissued, or a minor modification made, to identify the new permittee and incorporate such other requirements as may be necessary under the State Water Control Law and the Clean Water Act.

2. As an alternative to transfers under Part III Y 1, this permit may be automatically transferred to a new permittee if:

- a. The current permittee notifies the department at least two days in advance of the proposed transfer of the title to the facility or property;
- b. The notice includes a written agreement between the existing and new permittees containing a specific date for transfer of permit responsibility, coverage, and liability between them; and
- c. The board does not notify the existing permittee and the proposed new permittee of its intent to modify or revoke and reissue the permit. If this notice is not received, the transfer is effective on the date specified in the agreement mentioned in Part III Y 2 b.

Z. Severability. The provisions of this permit are severable, and if any provision of this permit or the application of any provision of this permit to any circumstance is held invalid, the application of such provision to other circumstances and the remainder of this permit shall not be affected thereby.

2) Va. Code Ann. § 62.1-44.15(5), (5a), (5b); 9 VAC 25-32(10), (20), (30), (250), (255), 9 VAC 25-192(10), (20), (25), (50), (60), (70), (80), (90)(A), (C)—(F), 9 VAC 25-630(10), (20), (25), (30), (40), (50), (60), (70), (80)(A), (C)—(F)

§ 62.1-44.15. (For expiration date -- see notes) Powers and duties; civil penalties

It shall be the duty of the Board and it shall have the authority:

[. . .]

(5) To issue, revoke or amend certificates under prescribed conditions for: (a) the discharge of sewage, industrial wastes and other wastes into or adjacent to state waters; (b) the alteration otherwise of the physical, chemical or biological properties of state waters; (c) excavation in a wetland; or (d) on and after October 1, 2001, the conduct of the following activities in a wetland: (i) new activities to cause draining that significantly alters or degrades existing wetland acreage or functions, (ii) filling or dumping, (iii) permanent flooding or impounding, or (iv) new activities that cause significant alteration or degradation of existing wetland acreage or functions. However, to the extent allowed by federal law, any person

holding a certificate issued by the Board that is intending to upgrade the permitted facility by installing technology, control equipment, or other apparatus that the permittee demonstrates to the satisfaction of the Director will result in improved energy efficiency, reduction in the amount of nutrients discharged, and improved water quality shall not be required to obtain a new, modified, or amended permit. The permit holder shall provide the demonstration anticipated by this subdivision to the Department no later than 30 days prior to commencing construction.

(5a) All certificates issued by the Board under this chapter shall have fixed terms. The term of a Virginia Pollution Discharge Elimination System permit shall not exceed five years. The term of a Virginia Water Protection Permit shall be based upon the projected duration of the project, the length of any required monitoring, or other project operations or permit conditions; however, the term shall not exceed 15 years. The term of a Virginia Pollution Abatement permit shall not exceed 10 years, except that the term of a Virginia Pollution Abatement permit for confined animal feeding operations shall be 10 years. The Department of Environmental Quality shall inspect all facilities for which a Virginia Pollution Abatement permit has been issued to ensure compliance with statutory, regulatory, and permit requirements. Department personnel performing inspections of confined animal feeding operations shall be certified under the voluntary nutrient management training and certification program established in § 10.1-104.2. The term of a certificate issued by the Board shall not be extended by modification beyond the maximum duration and the certificate shall expire at the end of the term unless an application for a new permit has been timely filed as required by the regulations of the Board and the Board is unable, through no fault of the permittee, to issue a new permit before the expiration date of the previous permit.

(5b) Any certificate issued by the Board under this chapter may, after notice and opportunity for a hearing, be amended or revoked on any of the following grounds or for good cause as may be provided by the regulations of the Board:

1. The owner has violated any regulation or order of the Board, any condition of a certificate, any provision of this chapter, or any order of a court, where such violation results in a release of harmful substances into the environment or poses a substantial threat of release of harmful substances into the environment or presents a hazard to human health or the violation is representative of a pattern of serious or repeated violations which, in the opinion of the Board, demonstrates the owner's disregard for or inability to comply with applicable laws, regulations, or requirements;
2. The owner has failed to disclose fully all relevant material facts or has misrepresented a material fact in applying for a certificate, or in any other report or document required under this law or under the regulations of the Board;

3. The activity for which the certificate was issued endangers human health or the environment and can be regulated to acceptable levels by amendment or revocation of the certificate; or
4. There exists a material change in the basis on which the permit was issued that requires either a temporary or a permanent reduction or elimination of any discharge controlled by the certificate necessary to protect human health or the environment.

9 VAC 25-32-10. Definitions.

A. The following words and terms, when used in this chapter and in VPA permits issued under this chapter, shall have the meanings defined in the State Water Control Law, unless the context clearly indicates otherwise and as follows:

"Active sewage sludge unit" means a sewage sludge unit that has not closed.

"Aerobic digestion" means the biochemical decomposition of organic matter in sewage sludge into carbon dioxide and water by microorganisms in the presence of air.

"Agricultural land" means land on which a food crop, a feed crop, or a fiber crop is grown. This includes range land and land used as pasture.

"Agricultural storm water discharge" means a precipitation-related discharge of manure, litter, or process wastewater that has been applied on land areas under the control of an animal feeding operation or under the control of an animal waste end-user in accordance with a nutrient management plan approved by the Virginia Department of Conservation and Recreation and in accordance with site specific nutrient management practices that ensure appropriate agricultural utilization of the nutrients in the manure, litter, or process wastewater.

"Agronomic rate" means, in regard to biosolids, the whole sludge application rate (dry weight basis) designed: (i) to provide the amount of nitrogen needed by the food crop, feed crop, fiber crop, cover crop, or vegetation grown on the land and (ii) to minimize the amount of nitrogen in the biosolids that passes below the root zone of the crop or vegetation grown on the land to the groundwater.

"Anaerobic digestion" means the biochemical decomposition of organic matter in sewage sludge or biosolids into methane gas and carbon dioxide by microorganisms in the absence of air.

"Animal feeding operation" means a lot or facility where the following conditions are met:

1. Animals have been, are, or will be stabled or confined and fed or maintained for a total of 45 days or more in any 12-month period; and
2. Crops, vegetation, forage growth, or post-harvest residues are not sustained in the normal growing season over any portion of the operation of the lot or facility.

Two or more animal feeding operations under common ownership are a single animal feeding operation for the purposes of determining the number of animals at an operation if they adjoin each other or if they use a common area or system for the disposal of wastes.

"Animal waste" means liquid, semisolid, and solid animal manure and process wastewater, compost, or sludges associated with animal feeding operations including the final treated wastes generated by a digester or other manure treatment technologies.

"Animal waste end-user" means any recipient of transferred animal waste who stores or who utilizes the waste as fertilizer, fuel, feedstock, livestock feed, or other beneficial use for an operation under his control.

"Animal waste fact sheet" means the document that details the requirements regarding utilization, storage, and management of animal waste by end-users. The fact sheet is approved by the department.

"Annual pollutant loading rate" or "APLR" means the maximum amount of a pollutant that can be applied to a unit area of land during a 365-day period.

"Annual whole sludge application rate" or "AWSAR" means the maximum amount of biosolids (dry weight basis) that can be applied to a unit area of land during a 365-day period.

"Apply biosolids" or "biosolids applied to the land" means land application of biosolids.

"Beneficial use" means a use that is of benefit as a substitute for natural or commercial products and does not contribute to adverse effects on health or the environment.

"Best Management Practices (BMP)" means a schedule of activities, prohibition of practices, maintenance procedures and other management practices to prevent or reduce the pollution of state waters. BMPs include treatment requirements, operating and maintenance procedures, schedule of activities, prohibition of activities, and other management practices to control plant site runoff, spillage, leaks, sludge or waste disposal, or drainage from raw material storage.

"Biosolids" means a sewage sludge that has received an established treatment and is managed in a manner to meet the required pathogen control and vector attraction reduction, and contains concentrations of regulated pollutants below the ceiling limits established in 40 CFR Part 503 and 9VAC25-32-356, such that it meets the standards established for use of biosolids for land application, marketing, or distribution in accordance with this regulation. Liquid biosolids contains less than 15% dry residue by weight. Dewatered biosolids contains 15% or more dry residue by weight.

"Board" means the Virginia State Water Control Board or State Water Control Board.

"Bulk biosolids" means biosolids that are not sold or given away in a bag or other container for application to the land.

"Bypass" means intentional diversion of waste streams from any portion of a treatment works.

"Confined animal feeding operation," for the purposes of this regulation, has the same meaning as an "animal feeding operation."

"Confined poultry feeding operation" means any confined animal feeding operation with 200 or more animal units of poultry. This equates to 20,000 chickens or 11,000 turkeys regardless of animal age or sex.

"Critical areas" and "critical waters" mean areas and waters in proximity to shellfish waters, a public water supply, or recreation or other waters where health or water quality concerns are identified by the Department of Health.

"Cumulative pollutant loading rate" means the maximum amount of an inorganic pollutant that can be applied to an area of land.

"Density of microorganisms" means the number of microorganisms per unit mass of total solids (dry weight) in the sewage sludge.

"Department" means the Department of Environmental Quality.

"Director" means the Director of the Department of Environmental Quality, or an authorized representative.

"Discharge" means, when used without qualification, a discharge of a pollutant.

"Discharge of a pollutant" means any addition of any pollutant or combination of pollutants to state waters or waters of the contiguous zone or ocean other than discharge from a vessel or other floating craft when being used as a means of transportation.

"Domestic septage" means either liquid or solid material removed from a septic tank, cesspool, portable toilet, Type III marine sanitation device, or similar treatment works that receives only domestic sewage. Domestic septage does not include liquid or solid material removed from a septic tank, cesspool, or similar treatment works that receives either commercial wastewater or industrial wastewater and does not include grease removed from a grease trap at a restaurant.

"Domestic sewage" means waste and wastewater from humans or household operations that is discharged to or otherwise enters a treatment works.

"Draft VPA permit" means a document indicating the board's tentative decision to issue, deny, modify, revoke and reissue, terminate or reissue a VPA permit. A notice of intent to terminate a VPA permit and a notice of intent to deny a VPA permit are types of draft VPA permits. A denial of a request for modification, revocation and reissuance or termination is not a draft VPA permit.

"Dry tons" means dry weight established as representative of land applied biosolids or industrial residuals and expressed in units of English tons.

"Dry weight" means the measured weight of a sample of sewage sludge, biosolids, or industrial residuals after all moisture has been removed in accordance with the standard methods of testing and often represented as percent solids.

"Dry weight basis" means calculated on the basis of having been dried at 105°C until reaching a constant mass (i.e., essentially 100% solids content).

"Exceptional quality biosolids" means biosolids that have received an established level of treatment for pathogen control and vector attraction reduction and contain known levels of pollutants, such that they may be marketed or distributed for public use in accordance with this regulation.

"Facilities" means, in regard to biosolids, processes, equipment, storage devices and dedicated sites, located or operated separately from a treatment works, utilized for sewage sludge management including, but not limited to, handling, treatment, transport, and storage of biosolids.

"Fact sheet" means the document that details the requirements regarding utilization, storage, and management of poultry waste by poultry waste end-users and poultry waste brokers. The fact sheet is approved by the department in consultation with the Department of Conservation and Recreation.

"Feed crops" means crops produced primarily for consumption by animals.

"Fiber crops" means crops produced primarily for the manufacture of textiles, such as flax and cotton.

"Field" means an area of land within a site where land application is proposed or permitted.

"Food crops" means crops produced primarily for consumption by humans. These include, but are not limited to, fruits, vegetables, and tobacco.

"Forest" means a tract of land thick with trees and underbrush.

"General VPA permit" means a VPA permit issued by the board authorizing a category of pollutant management activities.

"Generator" means the owner of a sewage treatment works that produces sewage sludge and biosolids.

"Groundwater" means water below the land surface in the saturated zone.

"Industrial residuals" means solid or semisolid industrial waste including solids, residues, and precipitates separated or created by the unit processes of a device or system used to treat industrial wastes.

"Industrial wastes" means liquid or other wastes resulting from any process of industry, manufacture, trade, or business, or from the development of any natural resources.

"Land application" means, in regard to sewage, biosolids, and industrial residuals, the distribution of treated wastewater, referred to as "effluent," stabilized sewage sludge, referred to as "biosolids," or industrial residuals by spreading or spraying on the surface of the land, injecting below the surface of the land, or incorporating into the soil with a uniform application rate for the purpose of fertilizing crops or vegetation or conditioning the soil. Sites approved for land application of biosolids in accordance with this regulation are not to be considered to be treatment works. Bulk disposal of stabilized sludge or industrial residuals in a confined area, such as in landfills, is not land application. For the purpose of this regulation, the use of biosolids in agricultural research and the distribution and marketing of exceptional quality biosolids are not land application.

"Land application area" means, in regard to biosolids, the area in the permitted field, excluding the setback areas, where biosolids may be applied.

"Land applier" means someone who land applies biosolids or industrial residuals pursuant to a valid permit from the department as set forth in this regulation.

"Land with a high potential for public exposure" means land that the public uses frequently. This includes, but is not limited to, a public contact site and a reclamation site located in a populated area (e.g., a construction site located in a city).

"Land with a low potential for public exposure" means land that the public uses infrequently. This includes, but is not limited to, agricultural land, forest, and a reclamation site located in an unpopulated area (e.g., a strip mine located in a rural area).

"Limitation" means any restriction imposed on quantities, rates or concentration of pollutants which are managed by pollutant management activities.

"Liner" means soil or synthetic material that has a hydraulic conductivity of 1×10^{-7} centimeters per second or less.

"Local monitor" means a person or persons employed by a local government to perform the duties of monitoring the operations of land appliers pursuant to a local ordinance.

"Local ordinance" means an ordinance adopted by counties, cities, or towns in accordance with § 62.1-44.16 or 62.1-44.19:3 of the Code of Virginia.

"Malodor" means an unusually strong or offensive odor associated with biosolids or sewage sludge as distinguished from odors commonly associated with biosolids or sewage sludge.

"Monitoring report" means forms supplied by the department for use in reporting of self-monitoring results of the permittee.

"Monthly average" means the arithmetic mean of all measurements taken during the month.

"Municipality" means a city, county, town, district association, or other public body (including an intermunicipal agency of two or more of the foregoing entities) created by or under state law; an Indian tribe or an authorized Indian tribal organization having jurisdiction over sewage sludge or biosolids management; or a designated and approved management agency under § 208 of the federal Clean Water Act, as amended. The definition includes a special district created under state law, such as a water district, sewer district, sanitary district, utility district, drainage district, or similar entity; or an integrated waste management facility as defined in § 201(e) of the federal Clean Water Act, as amended, that has as one of its principal responsibilities the treatment, transport, use, or disposal of sewage sludge or biosolids.

"Nonpoint source" means a source of pollution, such as a farm or forest land runoff, urban storm water runoff or mine runoff that is not collected or discharged as a point source.

"Odor sensitive receptor" means, in the context of land application of biosolids, any health care facility, such as hospitals, convalescent homes, etc. or a building or outdoor facility regularly used to host or serve large groups of people such as schools, dormitories, or athletic and other recreational facilities.

"Operate" means the act of any person who may have an impact on either the finished water quality at a waterworks or the final effluent at a sewage treatment works, such as to (i) place into or take out of service a unit process or unit processes, (ii) make or cause adjustments in the operation of a unit process or unit processes at a treatment works, or (iii) manage sewage sludge or biosolids.

"Operator" means any individual employed or appointed by any owner, and who is designated by such owner to be the person in responsible charge, such as a supervisor, a shift operator, or a substitute in charge, and whose duties include testing or evaluation to control waterworks or wastewater works operations. Not included in this definition are superintendents or directors of public works, city engineers, or other municipal or industrial officials whose duties do not include the actual operation or direct supervision of waterworks or wastewater works.

"Other container" means either an open or closed receptacle. This includes, but is not limited to, a bucket, a box, a carton, and a vehicle or trailer with a load capacity of one metric ton or less.

"Overflow" means the unintentional discharge of wastes from any portion of a treatment works.

"Owner" means the Commonwealth or any of its political subdivisions including sanitary districts, sanitation district commissions and authorities; federal agencies; any individual; any group of individuals acting individually or as a group; or any public or private institution, corporation, company, partnership, firm, or association that owns or proposes to own a sewerage system or treatment works as defined in § 62.1-44.3 of the Code of Virginia.

"Pasture" means land on which animals feed directly on feed crops such as legumes, grasses, grain stubble, or stover.

"Pathogenic organisms" means disease-causing organisms. These include, but are not limited to, certain bacteria, protozoa, viruses, and viable helminth ova.

"Permittee" means an owner or operator who has a currently effective VPA permit issued by the board or the department.

"Person who prepares biosolids" means either the person that generates biosolids during the treatment of domestic sewage in a treatment works or the person that derives the material from sewage sludge.

"pH" means the logarithm of the reciprocal of the hydrogen ion concentration measured at 25°C or measured at another temperature and then converted to an equivalent value at 25°C.

"Place sewage sludge" or "sewage sludge placed" means disposal of sewage sludge on a surface disposal site.

"Point source" means any discernible, defined and discrete conveyance, including but not limited to any pipe, ditch, channel, tunnel, conduit, well, discrete fissure, container, rolling stock, vessel or other floating craft, from which pollutants are or may be discharged. This term does not include return flows from irrigated agricultural land.

"Pollutant" means, in regard to wastewater, any substance, radioactive material, or heat which causes or contributes to, or may cause or contribute to, pollution. It does not mean (i) sewage from vessels; or (ii) water, gas, or other material which is injected into a well to facilitate production of oil or gas, or water derived in association with oil or gas production and disposed of in a well, if the well is used either to facilitate production or for disposal purposes if approved by Department of Mines Minerals and Energy unless the board determines that such injection or disposal will result in the degradation of ground or surface water resources.

"Pollutant" means, in regard to sewage sludge or biosolids, an organic substance, an inorganic substance, a combination of organic and inorganic substances, or a pathogenic organism that, after discharge and upon exposure, ingestion, inhalation, or assimilation into an organism either directly from the environment or indirectly by ingestion through the food chain, could, on the basis of information available to the board, cause death, disease, behavioral abnormalities, cancer, genetic mutations, physiological malfunctions (including malfunction in reproduction), or physical deformations in either organisms or offspring of the organisms.

"Pollutant limit" means a numerical value that describes the amount of a pollutant allowed per unit amount of biosolids (e.g., milligrams per kilogram of total solids), the amount of a pollutant that can be applied to a unit area of land (e.g., kilograms per hectare), or the volume of a material that can be applied to a unit area of land (e.g., gallons per acre).

"Pollutant management activity" means a treatment works with a potential or actual discharge to state waters, but which does not have a point source discharge to surface waters.

"Pollution" means such alteration of the physical, chemical, or biological properties of any state waters or soil as will, or is likely to, create a nuisance or render such waters or soil: (i) harmful or detrimental or injurious to the public health, safety, or welfare or to the health of animals, fish, or aquatic life; (ii) unsuitable despite reasonable treatment for use as present or possible future sources of public water supply; or (iii) unsuitable for recreational, commercial, industrial, agricultural, or other reasonable uses. Such alteration is also deemed to be pollution, if there occurs: (a) an alteration of the physical, chemical, or biological property of state waters or soil, or a discharge or a deposit of sewage, industrial wastes, or other wastes to state waters or soil by any owner which by itself is not sufficient to cause pollution, but which, in combination with such alteration of, or discharge, or deposit, to state waters or soil by other owners, is sufficient to cause pollution; (b) the discharge of untreated sewage by any owner into state waters or soil; or (c) the contravention of standards of air or water quality duly established by the board.

"Poultry grower" or "grower" means any person who owns or operates a confined poultry feeding operation.

"Poultry waste" means dry poultry litter and composted dead poultry.

"Poultry waste broker" or "broker" means a person who possesses or controls poultry waste that is not generated on an animal feeding operation under his operational control and transfers or hauls poultry waste to other persons. If the entity is defined as a broker they cannot be defined as a hauler for the purposes of this regulation.

"Poultry waste end-user" means any recipient of transferred poultry waste who stores or utilizes the waste as fertilizer, fuel, feedstock, livestock feed, or other beneficial end use for an operation under his control.

"Poultry waste hauler" or "hauler" means a person who provides transportation of transferred poultry waste from one entity to another and is not otherwise involved in the transfer or transaction of the waste nor responsible for determining the recipient of the waste. The responsibility of the recordkeeping and reporting remains with the entities to which the service was provided: grower, broker, and end-user.

"Primary sludge" means sewage sludge removed from primary settling tanks that is readily thickened by gravity thickeners.

"Privately owned treatment works (PVOTW)" means any sewage treatment works not publicly owned.

"Process" means a system, or an arrangement of equipment or other devices that remove from waste materials pollutants including, but not limited to, a treatment works or portions thereof.

"Public contact site" means land with a high potential for contact by the public. This includes, but is not limited to, public parks, ball fields, cemeteries, and golf courses.

"Publicly owned treatment works (POTW)" means any sewage treatment works that is owned by a state or municipality. Sewers, pipes, or other conveyances are included in this definition only if they convey wastewater to a POTW providing treatment.

"Public hearing" means a fact-finding proceeding held to afford interested persons an opportunity to submit factual data, views, and arguments to the board.

"Reclamation site" means drastically disturbed land that is reclaimed using biosolids. This includes, but is not limited to, strip mines and construction sites.

"Run-off" means rainwater, leachate, or other liquid that drains overland on any part of a land surface and runs off of the land surface.

"Schedule of compliance" means a schedule of remedial measures including an enforceable sequence of actions or operations leading to compliance with the federal Clean Water Act (33 USC 1251 et seq.), the law, and board regulations, standards and policies.

"Setback area" means the area of land between the boundary of the land application area and adjacent features where biosolids or other managed pollutants may not be land applied.

"Sewage" means the water-carried and non-water-carried human excrement, kitchen, laundry, shower, bath, or lavatory wastes, separately or together with such underground, surface, storm, and other water and liquid industrial wastes as may be present from residences, buildings, vehicles, industrial establishments, or other places.

"Sewage sludge" means any solid, semisolid, or liquid residue generated during the treatment of domestic sewage in a treatment works. Sewage sludge includes, but is not limited to, domestic septage; scum or solids removed in primary, secondary, or advanced wastewater treatment processes; and a material derived from sewage sludge. Sewage sludge does not include ash generated during the firing of sewage sludge in a sewage sludge incinerator or grit and screenings generated during preliminary treatment of domestic sewage in a treatment works.

"Sewage sludge unit" means land on which only sewage sludge is placed for final disposal. This does not include land on which sewage sludge is either stored or treated. Land does not include surface waters.

"Sewage sludge use or disposal" means the collection, storage, treatment, transportation, processing, monitoring, use, or disposal of sewage sludge.

"Site" means the area of land within a defined boundary where an activity is proposed or permitted.

"Sludge" means solids, residues, and precipitates separated from or created by the unit processes of a treatment works.

"Sludge management" means the treatment, handling, transportation, storage, use, distribution, or disposal of sewage sludge.

"Specific oxygen uptake rate" or "SOUR" means the mass of oxygen consumed per unit time per mass of total solids (dry weight basis) in the sewage sludge.

"State waters" means all water on the surface or under the ground wholly or partially within or bordering the state or within its jurisdiction.

"State Water Control Law (law)" means Chapter 3.1 (§ 62.1-44.2 et seq.) of Title 62.1 of the Code of Virginia.

"Store sewage sludge" or "storage of sewage sludge" means the placement of sewage sludge on land on which the sewage sludge remains for two years or less. This does not include the placement of sewage sludge on land for treatment.

"Substantial compliance" means designs and practices that do not exactly conform to the standards set forth in this chapter as contained in documents submitted pursuant to 9VAC25-32-60, but whose construction or implementation will not substantially affect health considerations or performance.

"Supernatant" means a liquid obtained from separation of suspended matter during sludge treatment or storage.

"Surface disposal site" means an area of land that contains one or more active sewage sludge units.

"Surface water" means:

1. All waters which are currently used, were used in the past, or may be susceptible to use in interstate or foreign commerce, including all waters which are subject to the ebb and flow of the tide;

2. All interstate waters, including interstate "wetlands";
3. All other waters such as inter/intrastate lakes, rivers, streams (including intermittent streams), mudflats, sandflats, "wetlands," sloughs, prairie potholes, wet meadows, playa lakes, or natural ponds the use, degradation, or destruction of which would affect or could affect interstate or foreign commerce including any such waters:
 - a. Which are or could be used by interstate or foreign travelers for recreational or other purposes;
 - b. From which fish or shellfish are or could be taken and sold in interstate or foreign commerce; or
 - c. Which are used or could be used for industrial purposes by industries in interstate commerce;
4. All impoundments of waters otherwise defined as surface waters of the United States under this definition;
5. Tributaries of waters identified in subdivisions 1 through 4 of this definition;
6. The territorial sea; and
7. "Wetlands" adjacent to waters, other than waters that are themselves wetlands, identified in subdivisions 1 through 6 of this definition.

"Total solids" means the materials in sewage sludge that remain as residue when the sewage sludge is dried to 103°C to 105°C.

"Toxic pollutant" means any pollutant listed as toxic under § 307 (a)(1) of the CWA or, in the case of "sludge use or disposal practices," any pollutant identified in regulations implementing § 405 (d) of the CWA.

"Toxicity" means the inherent potential or capacity of a material to cause adverse effects in a living organism, including acute or chronic effects to aquatic life, detrimental effects on human health, or other adverse environmental effects.

"Treatment facility" means only those mechanical power driven devices necessary for the transmission and treatment of pollutants (e.g., pump stations, unit treatment processes).

"Treat sewage sludge" or "treatment of sewage sludge" means the preparation of sewage sludge for final use or disposal. This includes, but is not limited to,

thickening, stabilization, and dewatering of sewage sludge. This does not include storage of sewage sludge.

"Treatment works" means either a federally owned, publicly owned, or privately owned device or system used to treat (including recycle and reclaim) either domestic sewage or a combination of domestic sewage and industrial waste of a liquid nature. Treatment works may include but are not limited to pumping, power, and other equipment and their appurtenances; septic tanks; and any works, including land, that are or will be (i) an integral part of the treatment process or (ii) used for ultimate disposal of residues or effluents resulting from such treatment. "Treatment works" does not include biosolids use on privately owned agricultural land.

"Twenty-five-year, 24-hour storm event" means the maximum 24-hour precipitation event with a probable recurrence interval of once in 25 years as established by the National Weather Service or appropriate regional or state rainfall probability information.

"Unstabilized solids" means organic materials in sewage sludge that have not been treated in either an aerobic or anaerobic treatment process.

"Upset" means an exceptional incident in which there is unintentional and temporary noncompliance with technology-based permit limitations because of factors beyond the permittee's reasonable control. An upset does not include noncompliance caused by operational error, improperly designed treatment facilities, inadequate treatment facilities, lack of preventive maintenance, or careless or improper operation.

"Use" means to manage or recycle a processed waste product in a manner so as to derive a measurable benefit as a result of such management.

"Variance" means a conditional approval based on a waiver of specific regulations to a specific owner relative to a specific situation under documented conditions for a specified period of time.

"Vector attraction" means the characteristic of biosolids or sewage sludge that attracts rodents, flies, mosquitoes, or other organisms capable of transporting infectious agents.

"Vegetated buffer" means a permanent strip of dense perennial vegetation established parallel to the contours of and perpendicular to the dominant slope of the field for the purposes of slowing water runoff, enhancing water infiltration, and minimizing the risk of any potential nutrients or pollutants from leaving the field and reaching surface waters.

"Virginia Pollution Abatement (VPA) permit" means a document issued by the board, pursuant to this chapter, authorizing pollutant management activities under prescribed conditions.

"Virginia Pollutant Discharge Elimination System (VPDES) permit" means a document issued by the board pursuant to 9VAC25-31, authorizing, under prescribed conditions, the potential or actual discharge of pollutants from a point source to surface waters.

"Volatile solids" means the amount of the total solids in sewage sludge lost when the sewage sludge is combusted at 550°C in the presence of excess air.

"VPA application" means the standard form or forms approved by the board for applying for a VPA permit.

"Waste storage facility" means a (i) waste holding pond or tank used to store manure prior to land application, (ii) lagoon or treatment facility used to digest or reduce the solids or nutrients, or (iii) structure used to store manure or waste.

"300 animal units" means 300,000 pounds of live animal weight or the following numbers and types of animals:

- a. 300 slaughter and feeder cattle;
- b. 200 mature dairy cattle (whether milked or dry cows);
- c. 750 swine each weighing over 25 kilograms (approximately 55 pounds);
- d. 150 horses;
- e. 3,000 sheep or lambs;
- f. 16,500 turkeys;
- g. 30,000 laying hens or broilers.

"Water quality standards" means the narrative statements for general requirements and numeric limits for specific requirements that describe the water quality necessary to meet and maintain reasonable and beneficial uses. Such standards are established by the board under § 62.1-44.15 (3a) of the Code of Virginia.

B. Generally used technical terms not defined in subsection A of this section or the department's latest definitions of technical terms as used to implement § 62.1-44.15 of the Code of Virginia shall be defined in accordance with "Glossary-Water and Wastewater Control Engineering" published by the American Public Health Association (APHA),

American Society of Civil Engineers (ASCE), American Water Works Association (AWWA), and the Water Environment Federation (WEF).

9 VAC 25-32-20. Purpose.

This regulation delineates the procedures and requirements to be followed in connection with VPA permits issued by the board pursuant to the State Water Control Law.

9 VAC 25-32-30. Requirements and Prohibitions.

A. All pollutant management activities covered under a VPA permit shall maintain no point source discharge of pollutants to surface waters except in the case of a storm event greater than the 25-year, 24-hour storm.

B. Except in compliance with a VPA permit, or another permit issued by the board, it shall be unlawful for any person to:

1. Discharge into, or adjacent to, state waters sewage, industrial wastes, other wastes, or any noxious or deleterious substances; or
2. Otherwise alter the physical, chemical or biological properties of such state waters and make them detrimental to the public health, or to animal or aquatic life, or to the use of such waters for domestic or industrial consumption, or for recreation, or for other uses.

C. Any person required to obtain a permit pursuant to this chapter who discharges or causes or allows a discharge of sewage, industrial waste, other wastes or any noxious or deleterious substance into or upon state waters in violation of subsection B of this section; or who discharges or causes or allows a discharge that may reasonably be expected to enter state waters in violation of subsection B of this section shall notify the department of the discharge immediately upon discovery of the discharge and, in any event, no later than 24 hours after the discovery. A written report of the unauthorized discharge shall be submitted by the owner, to the department, within five days of discovery of the discharge.

1. The written report shall contain:
 - a. A description of the nature of the discharge;
 - b. The cause of the discharge;
 - c. The date on which the discharge occurred;
 - d. The length of time that the discharge continued;
 - e. The volume of the discharge;

- f. If the discharge is continuing, how long it is expected to continue;
- g. If the discharge is continuing, what the expected total volume of the discharge will be; and
- h. Any steps planned or taken to reduce, eliminate and prevent a recurrence of the present discharge or any future discharges not authorized by the permit.

2. Discharges reportable to the department under the immediate reporting requirements of other regulations are exempted from this requirement.

D. VPA permits may be utilized to authorize pollutant management activities including, but not limited to, animal feeding operations, storage or land application of sewage, sludge, biosolids, industrial waste or other waste; or the complete reuse or recycle of wastewater. Point source discharges of pollutants to surface waters may be authorized by a VPDES permit (See 9VAC25-31, VPDES Permit Regulation).

E. No VPA permit shall be issued in the following circumstances:

- 1. Where the terms or conditions of the VPA permit do not comply with the applicable regulations or requirements of the law;
- 2. For the discharge of any radiological, chemical or biological warfare agent or high level radioactive material into state waters; or
- 3. For any pollutant management activity that is in conflict with any area-wide or basin-wide water quality control and waste management plan or policy established by the board pursuant to the law.

9 VAC 25-32-250. Animal Feeding Operations.

A. All animal feeding operations shall maintain no point source discharge of pollutants to surface waters except in the case of a storm event greater than the 25-year, 24-hour storm. Animal feeding operations having 300 or more animal units utilizing a liquid manure collection and storage system or having 200 or more animal units of poultry are pollutant management activities subject to the VPA permit program. Two or more animal feeding operations under common ownership are a single animal feeding operation for the purpose of determining the number of animals at an operation if they adjoin each other or if they use a common area or system for the disposal of wastes.

B. Case-by-case determination.

- 1. The board may determine that any animal feeding operation that does not otherwise qualify for coverage under the VPA general permit and has not been

required to obtain a VPDES permit be required to obtain an individual VPA permit upon determining that it is a potential or actual contributor of pollution to state waters. In making this determination the following factors shall be considered:

- a. The size of the operation;
- b. The location of the operation relative to state waters;
- c. The means of conveyance of animal wastes and process waters into state waters;
- d. The slope, vegetation, rainfall, and other factors affecting the likelihood or frequency of discharge of animal wastes and process waste waters into state waters;
- e. The compliance history and the ability to make corrections in order to comply with the VPA general permit conditions;
- f. The means of storage, treatment, or disposal of animal wastes; and
- g. Other relevant factors.

2. A VPA permit application shall not be required for an animal feeding operation subject to subdivision 1 of this subsection until the board has conducted an on-site inspection of the operation and determined that the operation shall be regulated under the VPA permit program.

9 VAC 25-32-255. Requirements for End-Users of Animal Waste and Poultry Waste.

A. Technical requirements for end-users of animal waste or poultry waste will be established in general permit regulations or individual permits. Technical requirements for end-users of animal waste or poultry waste shall address but not be limited to the following:

1. Proper waste storage;
2. Appropriate land application practices; and
3. Recordkeeping.

B. End-users of animal waste or poultry waste shall comply with technical requirements established as set forth by subsection A of this section.

9 VAC 25-192-10. Definitions.

The words and terms used in this chapter shall have the meanings defined in the State Water Control Law (§ 62.1-44.2 et seq. of the Code of Virginia) and the Permit Regulation (9VAC25-32) unless the context clearly indicates otherwise, except that for the purposes of this chapter:

"Agricultural stormwater discharge" means a precipitation-related discharge of manure, litter, or process wastewater that has been applied on land areas under the control of an animal feeding operation or under the control of an animal waste end-user in accordance with a nutrient management plan approved by the Virginia Department of Conservation and Recreation and in accordance with site specific nutrient management practices that ensure appropriate agricultural utilization of the nutrients in the manure, litter or process wastewater.

"Animal feeding operation" means a lot or facility where the following conditions are met:

1. Animals have been, are, or will be stabled or confined and fed or maintained for a total of 45 days or more in any 12-month period; and
2. Crops, vegetation, forage growth or post-harvest residues are not sustained in the normal growing season over any portion of the operation of the lot or facility.

Two or more animal feeding operations under common ownership are a single animal feeding operation for the purposes of determining the number of animals at an operation, if they adjoin each other, or if they use a common area or system for the disposal of wastes.

"Animal waste" means liquid, semi-solid, and solid animal manure and process wastewater, compost, or sludges associated with animal feeding operations including the final treated wastes generated by a digester or other manure treatment technologies.

"Animal waste end-user" or "end-user" means any recipient of transferred animal waste who stores or who utilizes the waste as fertilizer, fuel, feedstock, livestock feed, or other beneficial use for an operation under his control.

"Animal waste fact sheet" means the document that details the requirements regarding utilization, storage, and management of animal waste by end-users. The fact sheet is approved by the department.

"Beneficial use" means a use that is of benefit as a substitute for natural or commercial products and does not contribute to adverse effects on health or environment.

"Confined animal feeding operation," for the purposes of this regulation, has the same meaning as an "animal feeding operation."

"Department" means the Virginia Department of Environmental Quality.

"Director" means the Director of the Virginia Department of Environmental Quality or his designee.

"Nutrient management plan" or "NMP" means a plan developed or approved by the Department of Conservation and Recreation that requires proper storage, treatment, and management of animal waste and limits accumulation of excess nutrients in soils and leaching or discharge of nutrients into state waters; except that for an animal waste end-user who is not covered under the general permit, the requirements of 9VAC25-192-90 constitute the NMP.

"Organic source" means any nutrient source including, but not limited to, manures, biosolids, compost, and waste or sludges from animals, humans, or industrial processes, but for the purposes of this regulation it excludes waste from wildlife.

"Waste nutrient analysis rate" means a land application rate for animal waste approved by the board as specified in this regulation.

"Waste storage facility" means (i) a waste holding pond or tank used to store manure prior to land application, (ii) a lagoon or treatment facility used to digest or reduce the solids or nutrients, or (iii) a structure used to store manure or waste.

"Vegetated buffer" means a permanent strip of dense perennial vegetation established parallel to the contours of and perpendicular to the dominant slope of the field for the purposes of slowing water runoff, enhancing water infiltration, and minimizing the risk of any potential nutrients or pollutants from leaving the field and reaching surface waters.

"300 animal units" means 300,000 pounds of live animal weight, or the following numbers and types of animals:

- a. 300 slaughter and feeder cattle;
- b. 200 mature dairy cattle (whether milked or dry cows);
- c. 750 swine each weighing over 25 kilograms (approximately 55 pounds);
- d. 150 horses;
- e. 3,000 sheep or lambs;

- f. 16,500 turkeys;
- g. 30,000 laying hens or broilers.

9 VAC 25-192-20. Purpose; Delegation of Authority; Effective Date of Permit.

A. This general permit regulation governs the pollutant management activities at animal feeding operations having 300 or more animal units utilizing a liquid manure collection and storage system not covered by a Virginia Pollutant Discharge Elimination System (VPDES) permit and animal waste utilized or stored by animal waste end-users. These animal feeding operations may operate and maintain treatment works for waste storage, treatment, or recycling and may perform land application of manure, wastewater, compost, or sludges.

B. The Director of the Department of Environmental Quality, or his designee, may perform any act of the board provided under this chapter, except as limited by § 62.1-44.14 of the Code of Virginia.

C. This general permit will become effective on November 16, 2014. This general permit will expire 10 years from the effective date.

9 VAC 25-192-25. Duty to Comply.

A. Any person who manages or proposes to manage pollutants regulated by 9VAC25-192 shall comply with the applicable requirements of this chapter.

B. In order to manage pollutants from an animal feeding operation, the owner shall be required to obtain coverage under the Virginia Pollution Abatement (VPA) general permit or an individual VPA permit provided that the owner has not been required to obtain a Virginia Pollutant Discharge Elimination System (VPDES) permit. The owner shall comply with the requirements of this chapter and the permit.

C. An animal waste end-user shall comply with the technical requirements outlined in 9VAC25-192-80 and 9VAC25-192-90.

9 VAC 25-192-50. Authorization to Manage Pollutants.

A. Owner of an animal feeding operation. Any owner governed by this general permit is hereby authorized to manage pollutants at animal feeding operations provided that the owner files the registration statement of 9VAC25-192-60, complies with the requirements of 9VAC25-192-70, and provided that:

1. The owner has not been required to obtain a VPDES permit or an individual VPA permit according to subdivision 2 of 9VAC25-32-260.

2. The operation of the animal feeding operation shall not contravene the Water Quality Standards, as amended and adopted by the board, or any provision of the State Water Control Law. There shall be no point source discharge of wastewater to surface waters of the state except in the case of a storm event greater than the 25-year, 24-hour storm. Agricultural stormwater discharges are permitted. Domestic sewage shall not be managed under this general permit. Industrial waste shall not be managed under this general permit, except for wastes that have been approved by the department and are managed in accordance with 9VAC25-192-70.

3. The owner of any proposed pollutant management activities or those which have not previously been issued a valid Virginia Pollution Abatement (VPA) permit or Virginia Pollutant Discharge Elimination System (VPDES) permit must attach to the registration statement, the Local Government Ordinance Form (a notification from the governing body of the county, city or town where the operation is located that the operation is consistent with all ordinances adopted pursuant to Chapter 22 (§ 15.2-2200 et seq.) of Title 15.2 of the Code of Virginia).

4. The owner shall obtain Department of Conservation and Recreation approval of a nutrient management plan for the animal feeding operation prior to the submittal of the registration statement. The owner shall attach to the registration statement a copy of the approved nutrient management plan and a copy of the letter from the Department of Conservation and Recreation certifying approval of the nutrient management plan that was developed by a certified nutrient management planner in accordance with § 10.1-104.2 of the Code of Virginia. The owner shall implement the approved nutrient management plan.

5.

a. The owner shall give notice of the registration statement to all owners or residents of property that adjoins the property on which the animal feeding operation will be located. Such notice shall include (i) the types and maximum number of animals which will be maintained at the facility and (ii) the address and phone number of the appropriate department regional office to which comments relevant to the registration statement may be submitted. This notice requirement is waived whenever registration is for the purpose of renewing coverage under the permit and no expansion is proposed and the department has not issued any special or consent order relating to violations under the existing permit.

b. Any person may submit written comments on the proposed operation to the department within 30 days of the date of the filing of the registration statement. If, on the basis of such written comments or his review, the director determines that the proposed operation will not be capable of complying with the provisions of the general permit, the director shall

require the owner to obtain an individual permit for the operation. Any such determination by the director shall be made in writing and mailed to the owner not more than 45 days after the filing of the registration statement or, if in the director's sole discretion additional time is necessary to evaluate comments received from the public, not more than 60 days after the filing of the registration statement.

6. As required by § 62.1-44.17:1 F of the Code of Virginia, each owner of a facility covered by this general permit shall have completed the training program offered or approved by the department in the two years prior to submitting the registration statement for general permit coverage, or shall complete such training within one year after the registration statement has been submitted for general permit coverage. All permitted owners shall complete the training program at least once every three years.

B. Animal waste end-user. An animal waste end-user shall comply with the requirements outlined in 9VAC25-192-80 and 9VAC25-192-90.

1. When an animal waste end-user does not comply with the requirements of 9VAC25-192-80 and 9VAC25-192-90, the department may choose to do any or all of the following:

- a. Initiate enforcement action based upon the violation of the regulation;
- b. Require the animal waste end-user to register for coverage under the general permit;
- c. Require the animal waste end-user to apply for the VPA individual permit; or
- d. Take other actions set forth in the VPA Permit Regulation (9VAC25-32).

2. An animal waste end-user governed by this general permit is hereby authorized to manage pollutants relating to the utilization and storage of animal waste provided that the animal waste end-user files the registration statement of 9VAC25-192-60, complies with the requirements of 9VAC25-192-70, and:

- a. The animal waste end-user has not been required to obtain a VPA individual permit according to subdivision 2 of 9VAC25-32-260;
- b. The activities of the animal waste end-user shall not contravene the Water Quality Standards, as amended and adopted by the board, or any provision of the State Water Control Law (§ 62.1-44 et seq. of the Code of Virginia). There shall be no point source discharge of wastewater to surface waters of the state except in the case of a storm event greater than

the 25-year, 24-hour storm. Agricultural stormwater discharges are permitted. Domestic sewage shall not be managed under this general permit. Industrial waste shall not be managed under this general permit, except for wastes that have been approved by the department and are managed in accordance with 9VAC25-192-70;

c. The animal waste end-user shall obtain Department of Conservation and Recreation approval of a nutrient management plan for land application sites where animal waste will be utilized or stored and managed prior to the submittal of the registration statement. The animal waste end-user shall attach to the registration statement a copy of the approved nutrient management plan and a copy of the letter from the Department of Conservation and Recreation certifying approval of the nutrient management plan that was developed by a certified nutrient management planner in accordance with § 10.1-104.2 of the Code of Virginia. The animal waste end-user shall implement the approved nutrient management plan; and

d. As required by § 62.1-44.17:1 F of the Code of Virginia, each permitted animal waste end-user shall complete a training program offered or approved by the department within one year of filing the registration statement for general permit coverage. All permitted animal waste end-users shall complete a training program at least once every three years.

C. Continuation of permit coverage.

1. Any owner that was authorized to manage pollutants under the general permit issued in 2004 and that submits a complete registration statement on or before November 15, 2014, is authorized to continue to manage pollutants under the terms of the 2004 general permit until such time as the board either:

a. Issues coverage to the owner under this general permit; or

b. Notifies the owner that coverage under this permit is denied.

2. When the permittee that was covered under the expiring or expired general permit has violated or is violating the conditions of that permit, the board may choose to do any or all of the following:

a. Initiate enforcement action based upon the expiring or expired general permit;

b. Issue a notice of intent to deny coverage under the reissued general permit. If the general permit coverage is denied, the owner would then be required to cease the activities authorized by the expiring or expired

general permit or be subject to enforcement action for operating without a permit;

c. Issue an individual permit with appropriate conditions; or

d. Take other actions set forth in the VPA Permit Regulation (9VAC25-32).

D. Receipt of this general permit does not relieve any permittee of the responsibility to comply with any other applicable federal, state or local statute, ordinance, or regulation.

9 VAC 25-192-60. Registration Statement.

A. The owner of an animal feeding operation. In order to be covered under the general permit, the owner shall file a complete VPA General Permit Registration Statement for the management of pollutants at animal feeding operations in accordance with this chapter. The registration statement shall be deemed complete for registration under the VPA General Permit if it contains the following information:

1. The animal feeding operation owner's name, mailing address, email address (if available), and telephone number;
2. The name, mailing address, email address (if available), and telephone number of the operator or contact person other than the owner, if applicable;
3. The farm name (if applicable) and location of the animal feeding operation;
4. The best time of day and day of the week to contact the operator or the contact person;
5. If the facility has an existing VPA or VPDES permit number, the permit number;
6. The type or types of animals (dairy cattle, slaughter and feeder cattle, swine, other) and the maximum number and average weight of the type or types of animals to be maintained at the animal feeding operation;
7. The types of wastes that will be managed at the facility and how much of each type of waste will be managed;
8. If waste will be transferred off-site, the type of waste and how much will be transferred;
9. The owner of any proposed pollutant management activities or those which have not previously been issued a valid VPA permit or VPDES permit must attach to the registration statement, the Local Government Ordinance Form (the

notification from the governing body of the county, city or town where the operation is located that the operation is consistent with all ordinances adopted pursuant to Chapter 22 (§ 15.2-2200 et seq.) of Title 15.2 of the Code of Virginia);

10. A copy of the nutrient management plan approved by the Department of Conservation and Recreation;

11. A copy of the Department of Conservation and Recreation nutrient management plan approval letter that also certifies that the plan was developed by a certified nutrient management planner in accordance with § 10.1-104.2 of the Code of Virginia; and

12. The following certification: "I certify that notice of the registration statement has been given to all owners or residents of property that adjoins the property on which the animal feeding operation will be located. This notice included the types and numbers of animals which will be maintained at the facility and the address and phone number of the appropriate Department of Environmental Quality regional office to which comments relevant to the permit may be submitted. (The preceding certification is waived if the registration is for renewing coverage under the general permit and no expansion of the operation is proposed and the department has not issued any special or consent order relating to violations under the existing permit.) I certify under penalty of law that all the requirements of the board for the general permit are being met and that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system or those persons directly responsible for gathering the information, the information submitted is to the best of my knowledge and belief true, accurate, and complete. I am aware that there are significant penalties for submitting false information including the possibility of fine and imprisonment for knowing violations."

B. The animal waste end-user. In order to be covered under the general permit, the animal waste end-user shall file a complete VPA General Permit Registration Statement in accordance with this chapter. The registration statement shall be deemed complete for registration under the VPA General Permit if it contains the following information:

1. The animal waste end-user's name, mailing address, email address (if available), and telephone number;
2. The name (if applicable) and location of the facility where the animal waste will be utilized, stored, or managed;
3. The best time of day and day of the week to contact the animal waste end-user;

4. If the facility has an existing VPA or VPDES permit number, the permit number;
5. If confined animals are located at the facility, indicate the type or types of animals (dairy cattle, slaughter and feeder cattle, swine, other) and the maximum number and average weight of the type or types of animals;
6. The types of wastes that will be managed at the facility and how much of each type of waste will be managed;
7. If waste will be transferred off-site, the type of waste and how much will be transferred;
8. A copy of the nutrient management plan approved by the Department of Conservation and Recreation;
9. A copy of the Department of Conservation and Recreation nutrient management plan approval letter that also certifies that the plan was developed by a certified nutrient management planner in accordance with § 10.1-104.2 of the Code of Virginia; and
10. The following certification: "I certify under penalty of law that all the requirements of the board for the general permit are being met and that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system or those persons directly responsible for gathering the information, the information submitted is to the best of my knowledge and belief true, accurate, and complete. I am aware that there are significant penalties for submitting false information including the possibility of fine and imprisonment for knowing violations."

C. The registration statement shall be signed in accordance with Part II F of 9VAC25-32-70.

9 VAC 25-192-70. Contents of the General Permit.

Any owner or animal waste end-user whose registration statement is accepted by the board will receive the following general permit and shall comply with the requirements therein and be subject to the VPA permit regulation, 9VAC25-32.

General Permit No.: VPG1 Effective Date: November 16, 2014 Expiration Date: November 15, 2024

GENERAL PERMIT FOR POLLUTANT MANAGEMENT ACTIVITIES FOR ANIMAL FEEDING OPERATIONS AND ANIMAL WASTE MANAGEMENT

AUTHORIZATION TO MANAGE POLLUTANTS UNDER THE VIRGINIA POLLUTION ABATEMENT PROGRAM AND THE VIRGINIA STATE WATER CONTROL LAW

In compliance with the provisions of the State Water Control Law and State Water Control Board regulations adopted pursuant thereto, owners of animal feeding operations having 300 or more animal units utilizing a liquid manure collection and storage system, and animal waste end-users are authorized to manage pollutants within the boundaries of the Commonwealth of Virginia, except where board regulations prohibit such activities.

The authorized pollutant management activities shall be in accordance with the registration statement, supporting documents submitted to the Department of Environmental Quality, this cover page, Part I-Pollutant Management and Monitoring Requirements for Animal Feeding Operations, Part II-Conditions Applicable to all VPA Permits, and Part III-Pollutant Management and Monitoring Requirements for Animal Waste End-Users, as set forth herein.

Part I Pollutant Management and Monitoring Requirements for Animal Feeding Operations

A. Pollutant management and monitoring requirements.

1. During the period beginning with the permit's effective date and lasting until the permit's expiration date, the permittee is authorized to manage pollutants at the location or locations identified in the registration statement and the facility's approved nutrient management plan.
2. At earthen liquid waste storage facilities constructed after December 1, 1998, to an elevation below the seasonal high water table or within one foot thereof, groundwater monitoring wells shall be installed. A minimum of one up gradient and one down gradient well shall be installed at each earthen waste storage facility that requires groundwater monitoring. Existing wells may be utilized to meet this requirement if properly located and constructed.
3. All facilities previously covered under a VPA permit that required groundwater monitoring shall continue monitoring consistent with the requirements listed below regardless of where they are located relative to the seasonal high water table.
4. At facilities where groundwater monitoring is required, the following conditions apply:
 - a. One data set shall be collected from each well prior to any waste being placed in the storage facility.
 - b. The static water level shall be measured prior to bailing well water for sampling.

c. At least three well volumes of groundwater shall be withdrawn immediately prior to sampling each monitoring well.

5. In accordance with subdivisions 2 and 3 of this subsection, the groundwater shall be monitored by the permittee at the monitoring wells as specified below. Additional groundwater monitoring may be required in the facility's approved nutrient management plan.

GROUNDWATER MONITORING				
PARAMETERS	LIMITATIONS	UNITS	MONITORING REQUIREMENTS	
			Frequency	Sample Type
Static Water Level	NL	Ft	1/3 years	Measured
Ammonia Nitrogen	NL	mg/L	1/3 years	Grab
Nitrate Nitrogen	NL	mg/L	1/3 years	Grab
pH	NL	SU	1/3 years	Grab
Conductivity	NL	umhos/cm	1/3 years	Grab

NL = No limit, this is a monitoring requirement only.

6. Soil at the land application sites shall be monitored as specified below. Additional soils monitoring may be required in the facility's approved nutrient management plan.

SOILS MONITORING				
PARAMETERS	LIMITATIONS	UNITS	MONITORING REQUIREMENTS	
			Frequency	Sample Type
pH	NL	SU	1/3 years	Composite
Phosphorus	NL	ppm or lbs/ac	1/3 years	Composite
Potash	NL	ppm or lbs/ac	1/3 years	Composite
Calcium	NL	ppm or lbs/ac	1/3 years	Composite
Magnesium	NL	ppm or lbs/ac	1/3 years	Composite

NL = No limit, this is a monitoring requirement only.

SU = Standard Units

7. Soil monitoring shall be conducted at a depth of between 0-6 inches, unless otherwise specified in the facility's approved nutrient management plan.

8. Waste shall be monitored as specified below. Additional waste monitoring may be required in the facility's approved nutrient management plan.

WASTE MONITORING			
PARAMETERS	LIMITATIONS	UNITS	MONITORING REQUIREMENTS

			Frequency	Sample Type
Total Kjeldahl Nitrogen	NL	*	1/year	Composite
Ammonia Nitrogen	NL	*	1/year	Composite
Total Phosphorus	NL	*	1/year	Composite
Total Potassium	NL	*	1/ year	Composite
Calcium	NL	*	1/year	Composite
Magnesium	NL	*	1/year	Composite
Moisture Content	NL	%	1/year	Composite

NL = No limit, this is a monitoring requirement only.

*Parameters for waste may be reported as a percent, as lbs/ton or lbs/1000 gallons, or as ppm where appropriate.

9. Analysis of soil and waste shall be according to methods specified in the facility's approved nutrient management plan.

10. All monitoring data collected as required by this section and any additional monitoring shall be maintained on site for a period of five years and shall be made available to department personnel upon request.

B. Other requirements or special conditions.

1. Any liquid manure collection and storage facility shall be designed and operated to (i) prevent point source discharges of pollutants to state waters except in the case of a storm event greater than the 25-year, 24-hour storm and (ii) provide adequate waste storage capacity to accommodate periods when the ground is frozen or saturated, periods when land application of nutrients should not occur due to limited or nonexistent crop nutrient uptake, and periods when physical limitations prohibit the land application of waste.

2. Waste storage facilities constructed after December 1, 1998, shall not be located on a 100-year floodplain.

3. Earthen waste storage facilities constructed after December 1, 1998, shall include a properly designed and installed liner. Such liner shall be either a synthetic liner of at least 20 mils thickness or a compacted soil liner of at least one foot thickness with a maximum permeability rating of 0.0014 inches per hour. A Virginia licensed professional engineer or an employee of the Natural Resources Conservation Service of the United States Department of Agriculture with appropriate engineering approval authority shall certify that the siting, design, and construction of the waste storage facility comply with the requirements of this permit. This certification shall be maintained on site.

4. At earthen waste storage facilities constructed below the seasonal high water table, the top surface of the waste must be maintained at a level of at least two feet above the water table.

5. All liquid waste storage or treatment facilities shall maintain at least one foot of freeboard at all times, up to and including a 25-year, 24-hour storm.

6. For new waste storage or treatment facilities constructed after November 16, 2014, the facilities shall be constructed, operated, and maintained in accordance with the applicable practice standard adopted by the Natural Resources Conservation Service of the U.S. Department of Agriculture and approved by the department. A Virginia licensed professional engineer or an employee of the Natural Resources Conservation Service of the U.S. Department of Agriculture with appropriate engineering approval authority shall certify that the siting, design, and construction of the waste storage facility comply with the requirements of this permit. This certification shall be maintained on site.

7. The permittee shall notify the department's regional office at least 14 days prior to (i) animals being initially placed in the confined facility or (ii) utilization of any new waste storage or treatment facilities.

8. Semi-solid and solid waste shall be stored in a manner that prevents contact with surface water and groundwater. Waste that is stockpiled outside for more than 14 days shall be kept in a facility or at a site that provides adequate storage. Adequate storage shall, at a minimum, include the following:

a. Waste shall be covered to protect it from precipitation and wind;

b. Stormwater shall not run onto or under the stored waste;

c. A minimum of two feet separation distance to the seasonal high water table or an impermeable barrier shall be used under the stored waste. All waste storage facilities that use an impermeable barrier shall maintain a minimum of one foot separation between the seasonal high water table and the impermeable barrier. "Seasonal high water table" means that portion of the soil profile where a color change has occurred in the soil as a result of saturated soil conditions or where soil concretions have formed. Typical colors are gray mottlings, solid gray, or black. The depth in the soil at which these conditions first occur is termed the seasonal high water table. Impermeable barriers shall be constructed of at least 12 inches of compacted clay, at least four inches of reinforced concrete, or another material of similar structural integrity that has a minimum permeability rating of 0.0014 inches per hour (1×10^{-6} centimeters per second); and

d. For waste that is not stored in a waste storage facility or under roof, the storage site must be at least 100 feet from any surface water, intermittent drainage, wells, sinkholes, rock outcrops, and springs.

9. All equipment needed for the proper operation of the permitted facilities shall be maintained in good working order. The manufacturer's operating and maintenance manuals shall be retained for references to allow for timely maintenance and prompt repair of equipment when appropriate. The permittee shall periodically inspect for leaks on equipment used for land application of waste.

10. When wastes are treated by a digester or other manure treatment technologies, the waste treatment process shall be approved by the department and shall be managed by a facility covered under this permit and in accordance with the following conditions:

a. All treated wastes generated by a digester or other manure treatment technologies must be managed through an approved nutrient management plan or transferred to another entity in accordance with animal waste transfer requirements in Part 1 B 15 and 16.

b. When a facility covered under this permit generates a treated waste from animal waste and other feedstock, the permittee shall maintain records related to the production of the treated waste.

(1) If off-site wastes are added to generate the treated waste, the permittee shall record the following items:

(a) The amount of waste brought to the facility; and

(b) From whom and where the waste originated.

(2) For all treated wastes generated by the facility, the permittee shall record the following items:

(a) The amount of treated waste generated;

(b) The nutrient analysis of the treated waste; and

(c) The final use of the treated waste.

(3) Permittees shall maintain the records required by Part I B 10 b (1) and (2) on site for a period of three years. All records shall be made available to department personnel upon request.

11. Animal waste generated by this facility shall not be applied to fields owned by or under the operational control of either the permittee or a legal entity in which the permittee has an ownership interest unless the fields are included in the facility's approved nutrient management plan.

12. The permittee shall implement a nutrient management plan (NMP) developed by a certified nutrient management planner in accordance with § 10.1-104.2 of the Code of Virginia and approved by the Department of Conservation and Recreation and maintain the plan on site. The NMP shall address the form, source, amount, timing, and method of application of nutrients on each field to achieve realistic production goals, while minimizing nitrogen and phosphorus loss to ground and surface waters. The terms of the NMP shall be enforceable through this permit. The NMP shall contain at a minimum the following information:

- a. Site map indicating the location of the waste storage facilities and the fields where waste will be applied;
- b. Site evaluation and assessment of soil types and potential productivities;
- c. Nutrient management sampling including soil and waste monitoring;
- d. Storage and land area requirements;
- e. Calculation of waste application rates; and
- f. Waste application schedules.

13. Waste shall not be land applied within buffer zones. Buffer zones at waste application sites shall, at a minimum, be maintained as follows:

- a. Distance from occupied dwellings not on the permittee's property: 200 feet (unless the occupant of the dwelling signs a waiver of the buffer zone);
- b. Distance from water supply wells or springs: 100 feet;
- c. Distance from surface water courses: 100 feet (without a permanent vegetated buffer) or 35 feet (if a permanent vegetated buffer exists). Other site-specific conservation practices may be approved by the department that will provide pollutant reductions equivalent or better than the reductions that would be achieved by the 100-foot buffer or 35-foot wide vegetated buffer;
- d. Distance from rock outcropping (except limestone): 25 feet;

- e. Distance from limestone outcroppings: 50 feet; and
- f. Waste shall not be applied in such a manner that it would discharge to sinkholes that may exist in the area.

14. The following land application records shall be maintained:

- a. The identification of the land application field sites where the waste is utilized or stored;
- b. The application rate;
- c. The application dates; and
- d. What crops have been planted.

These records shall be maintained on site for a period of five years after the date the application is made and shall be made available to department personnel upon request.

15. Animal waste generated by this facility may be transferred from the permittee to another person if one or more of the following conditions are met:

a. Animal waste generated by this facility may be transferred off-site for land application or another acceptable use approved by the department, if:

(1) The sites where the animal waste will be utilized are included in this permitted facility's approved nutrient management plan; or

(2) The sites where the animal waste will be utilized are included in another permitted facility's approved nutrient management plan.

b. Animal waste generated by this facility may be transferred off-site without identifying in the permittee's approved nutrient management plan the fields where such waste will be utilized, if one of the following conditions are met:

(1) The animal waste is registered with the Virginia Department of Agriculture and Consumer Services in accordance with regulations adopted pursuant to subdivision A 2 of § 3.2-3607 of the Code of Virginia; or

(2) When the permittee transfers to another person more than 10 tons of solid or semi-solid animal waste (solid or semi-solid animal waste contains less than 85% moisture) or more than 6,000 gallons of liquid animal waste (liquid animal waste contains 85% or more

moisture) in any 365-day period, the permittee shall maintain records in accordance with Part I B 16.

16. Animal waste may be transferred from a permittee to another person without identifying the fields where such waste will be utilized in the permittee's approved nutrient management plan if the following conditions are met:

a. When a permittee transfers to another person more than 10 tons of solid or semi-solid animal waste (solid or semi-solid animal waste contains less than 85% moisture) or more than 6,000 gallons of liquid animal waste (liquid animal waste contains 85% or more moisture) in any 365-day period, the permittee shall provide that person with:

- (1) Permittee's name, address, and permit number;
- (2) A copy of the most recent nutrient analysis of the animal waste; and
- (3) An animal waste fact sheet.

b. When a permittee transfers to another person more than 10 tons of solid or semi-solid animal waste (solid or semi-solid animal waste contains less than 85% moisture) or more than 6,000 gallons of liquid animal waste (liquid animal waste contains 85% or more moisture) in any 365-day period, the permittee shall keep a record of the following:

- (1) The recipient name and address;
- (2) The amount of animal waste received by the person;
- (3) The date of the transaction;
- (4) The nutrient analysis of the animal waste;
- (5) The locality in which the recipient intends to utilize the animal waste (i.e., nearest town or city and zip code);
- (6) The name of the stream or waterbody, if known, to the recipient that is nearest to the animal waste utilization or storage site; and
- (7) The signed waste transfer records form acknowledging the receipt of the following:
 - (a) The animal waste;

(b) The nutrient analysis of the animal waste; and

(c) An animal waste fact sheet.

c. Permittees shall maintain the records required by Part I B 16 a and b for at least three years after the date of the transaction and shall make them available to department personnel upon request.

17. When the waste storage or treatment facility is no longer needed, the permittee shall close it in a manner that (i) minimizes the need for further maintenance and (ii) controls, minimizes, or eliminates, to the extent necessary to protect human health and the environment, the postclosure escape of uncontrolled leachate, surface runoff, or waste decomposition products to the groundwater, surface water, or the atmosphere. At closure, the permittee shall remove all waste residue from the animal waste storage or treatment facility. Removed waste materials shall be utilized according to the approved NMP.

18. As required by § 62.1-44.17:1 F of the Code of Virginia, each permittee covered under this general permit shall have completed the training program offered or approved by the department in the two years prior to submitting the registration statement for general permit coverage, or shall complete such training within one year after the registration statement has been submitted for general permit coverage. All permittees shall complete the training program at least once every three years.

Part II Conditions Applicable to all VPA Permits

A. Sampling and analysis methods.

1. Samples and measurements taken as required by this permit shall be representative of the volume and nature of the monitored activity.
2. Unless otherwise specified in this permit all sample preservation methods, maximum holding times and analysis methods for pollutants shall comply with requirements set forth in Guidelines Establishing Test Procedures for the Analysis of Pollutants (40 CFR Part 136).
3. The sampling and analysis program to demonstrate compliance with the permit shall at a minimum, conform to Part I of this permit.
4. The permittee shall periodically calibrate and perform maintenance procedures on all monitoring and analytical instrumentation at intervals that will ensure accuracy of measurements.

B. Recording of results. For each measurement or sample taken pursuant to the requirements of this permit, the permittee shall record the following information:

1. The date, exact place and time of sampling or measurements;
2. The persons who performed the sampling or measurements;
3. The dates analyses were performed;
4. The persons who performed each analysis;
5. The analytical techniques or methods used; and
6. The results of such analyses and measurements.

C. Records retention. All records and information resulting from the monitoring activities required by this permit, including all records of analyses performed and calibration and maintenance of instrumentation and recording from continuous monitoring instrumentation shall be retained on site for five years from the date of the sample, measurement or report. This period of retention shall be extended automatically during the course of any unresolved litigation regarding the regulated activity or regarding control standards applicable to the permittee, or as requested by the director.

D. Additional monitoring by permittee. If the permittee monitors any pollutant at the locations designated herein more frequently than required by this permit, using approved analytical methods as specified above, the results of such monitoring shall be included in the calculation and reporting of the values required in the project report. Such increased frequency shall also be reported.

E. Reporting requirements.

1. If, for any reason, the permittee does not comply with one or more limitations, standards, monitoring or management requirements specified in this permit, the permittee shall submit to the department at least the following information:
 - a. A description and cause of noncompliance;
 - b. The period of noncompliance, including exact dates and times or the anticipated time when the noncompliance will cease; and
 - c. Actions taken or to be taken to reduce, eliminate, and prevent recurrence of the noncompliance. Whenever such noncompliance may adversely affect state waters or may endanger public health, the permittee shall submit the above required information by oral report within 24 hours from the time the permittee becomes aware of the circumstances and by written report within five days. The director may waive the written report requirement on a case-by-case basis if the oral report has been received within 24 hours and no adverse impact on state waters has been reported.

2. The permittee shall report any unpermitted, unusual or extraordinary discharge which enters or could be expected to enter state waters. The permittee shall provide information, specified in Part II E 1 a through c, regarding each such discharge immediately, that is, as quickly as possible upon discovery, however, in no case later than 24 hours. A written submission covering these points shall be provided within five days of the time the permittee becomes aware of the circumstances covered by this paragraph.

NOTE: The immediate (within 24 hours) reports required in Parts II E 1 and 2 may be made to the department's regional office. Reports may be made by telephone or by fax. For reports outside normal working hours, a message shall fulfill the immediate reporting requirement. For emergencies, the Virginia Department of Emergency Management maintains a 24-hour telephone service at 1-800-468-8892.

F. Signatory requirements. Any registration statement or certification required by this permit shall be signed as follows:

1. For a corporation, by a responsible corporate official. For purposes of this section, a responsible corporate official means (i) a president, secretary, treasurer, or vice-president of the corporation in charge of a principal business function, or any other person who performs similar policy or decision-making functions for the corporation, or (ii) the manager of one or more manufacturing, production, or operating facilities employing more than 250 persons or having gross annual sales or expenditures exceeding \$25,000,000 (in second quarter 1980 dollars), if authority to sign documents has been assigned or delegated to the manager in accordance with corporate procedures.

2. For a municipality, state, federal or other public agency by either a principal executive officer or ranking elected official. (A principal executive officer of a federal, municipal, or state agency includes the chief executive officer of the agency or head executive officer having responsibility for the overall operation of a principal geographic unit of the agency.)

3. For a partnership or sole proprietorship, by a general partner or proprietor respectively.

G. Change in management of pollutants. All pollutant management activities authorized by this permit shall be made in accordance with the terms and conditions of the permit. The permittee shall submit a new registration statement 30 days prior to all expansions, production increases, or process modifications, that will result in the management of new or increased pollutants. The management of any pollutant at a level greater than that identified and authorized by this permit, shall constitute a violation of the terms and conditions of this permit.

H. Treatment works operation and quality control.

1. Design and operation of facilities or treatment works and disposal of all wastes shall be in accordance with the registration statement filed with the department. The permittee has the responsibility of designing and operating the facility in a reliable and consistent manner to meet the facility performance requirements in the permit. If facility deficiencies, design or operational, are identified in the future which could affect the facility performance or reliability, it is the responsibility of the permittee to correct such deficiencies.

2. All waste collection, control, treatment, management of pollutant activities and disposal facilities shall be operated in a manner consistent with the following:

a. At all times, all facilities and pollutant management activities shall be operated in a prudent and workmanlike manner.

b. The permittee shall provide an adequate operating staff to carry out the operation, maintenance and testing functions required to ensure compliance with the conditions of this permit.

c. Maintenance of treatment facilities or pollutant management activities shall be carried out in such a manner that the monitoring and limitation requirements are not violated.

d. Collected solids shall be stored and utilized as specified in the approved nutrient management plan in such a manner as to prevent entry of those wastes (or runoff from the wastes) into state waters.

I. Adverse impact. The permittee shall take all feasible steps to minimize any adverse impact to state waters resulting from noncompliance with any limitation or limitations or conditions specified in this permit, and shall perform and report such accelerated or additional monitoring as is necessary to determine the nature and impact of the noncomplying limitation or limitations or conditions.

J. Duty to halt, reduce activity or to mitigate.

1. It shall not be a defense for a permittee in an enforcement action that it would have been necessary to halt or reduce the permitted activity in order to maintain compliance with the conditions of this permit.

2. The permittee shall take all reasonable steps to minimize, correct or prevent any discharge in violation of this permit which has a reasonable likelihood of adversely affecting human health or the environment.

K. Structural stability. The structural stability of any of the units or parts of the facilities herein permitted is the sole responsibility of the permittee and the failure of such

structural units or parts shall not relieve the permittee of the responsibility of complying with all terms and conditions of this permit.

L. Compliance with state law. Compliance with this permit during its term constitutes compliance with the State Water Control Law. Nothing in this permit shall be construed to preclude the institution of any legal action under, or relieve the permittee from any responsibilities, liabilities, or penalties established pursuant to any other state law or regulation.

M. Property rights. The issuance of this permit does not convey any property rights in either real or personal property, or any exclusive privileges, nor does it authorize any injury to private property or any invasion of personal rights, nor any infringement of federal, state, or local laws or regulations.

N. Severability. The provisions of this permit are severable.

O. Duty to reregister. If the permittee wishes to continue to operate under a general permit after the expiration date of this permit, the permittee must submit a new registration statement at least 30 days prior to the expiration date of this permit.

P. Right of entry. The permittee shall allow, or secure necessary authority to allow, authorized state representatives, upon the presentation of credentials:

1. To enter upon the permittee's premises on which the establishment, treatment works, pollutant management activities, or discharge or discharges is located or in which any records are required to be kept under the terms and conditions of this permit;
2. To have access to inspect and copy at reasonable times any records required to be kept under the terms and conditions of this permit;
3. To inspect at reasonable times any monitoring equipment or monitoring method required in this permit;
4. To sample at reasonable times any waste stream, process stream, raw material or by-product; and
5. To inspect at reasonable times any collection, treatment, or pollutant management activities required under this permit. For purposes of this section, the time for inspection shall be deemed reasonable during regular business hours, and whenever the facility is discharging or involved in managing pollutants. Nothing contained here shall make an inspection time unreasonable during an emergency.

Q. Transferability of permits. Coverage under this permit may be transferred to a new owner by a permittee if:

1. The current permittee notifies the department 30 days in advance of the proposed transfer of the title to the facility or property;
2. The notice to the department includes a written agreement between the existing and proposed new permittee containing a specific date of transfer of permit responsibility, coverage and liability between them; and
3. The department does not within the 30-day time period notify the existing permittee and the proposed permittee of the board's intent to transfer coverage under the permit. Such transferred coverage under this permit shall, as of the date of the transfer, be fully effective.

R. Permit modification. The permit may be modified when a change is made in the promulgated standards or regulations on which the permit was based.

S. Permit termination. After public notice and opportunity for a hearing, coverage under the general permit may be terminated for cause.

T. When an individual permit may be required. The director may require any permittee authorized to manage pollutants covered under this general permit to apply for and obtain an individual permit. Cases where an individual permit may be required include, but are not limited to, the following:

1. The pollutant management activities violate the terms or conditions of this permit;
2. When additions or alterations have been made to the affected facility that require the application of permit conditions that differ from those of the existing permit or are absent from it; and
3. When new information becomes available about the operation or pollutant management activities covered under this permit that was not available at the time of permit coverage.

Coverage under this general permit may be terminated as to an individual permittee for any of the reasons set forth above after appropriate notice and an opportunity for a hearing.

U. When an individual permit may be requested. Any permittee operating under this permit may request to be excluded from the coverage under this permit by applying for an individual permit. When an individual permit is issued to a permittee the applicability of this general permit to the individual permittee is automatically terminated on the effective date of the individual permit.

V. Civil and criminal liability. Nothing in this permit shall be construed to relieve the permittee from civil and criminal penalties for noncompliance with the terms of this permit.

W. Oil and hazardous substance liability. Nothing in this permit shall be construed to preclude the institution of any legal action or relieve the permittee from any responsibilities, liabilities, or penalties to which the permittee is or may be subject under § 311 of the Clean Water Act or §§ 62.1-44.34:14 through 62.1-44.34:23 of the Code of Virginia.

X. Unauthorized discharge of pollutants. Except in compliance with this permit, it shall be unlawful for any permittee to:

1. Discharge into state waters sewage, industrial wastes, other wastes or any noxious or deleterious substances; or
2. Otherwise alter the physical, chemical or biological properties of such state waters and make them detrimental to the public health, or to animal or aquatic life, or to the uses of such waters for domestic or industrial consumption, or for recreation, or for other uses.

Part III Pollutant Management and Monitoring Requirements for Animal Waste End-Users

A. Pollutant management and monitoring requirements.

1. During the period beginning with the permit's effective date and lasting until the permit's expiration date, the permittee is authorized to manage pollutants at the location or locations identified in the registration statement and the facility's approved nutrient management plan.
2. At earthen liquid waste storage facilities constructed after December 1, 1998, to an elevation below the seasonal high water table or within one foot thereof, groundwater monitoring wells shall be installed. A minimum of one up gradient and one down gradient well shall be installed at each earthen waste storage facility that requires groundwater monitoring. Existing wells may be utilized to meet this requirement if properly located and constructed.
3. All facilities previously covered under a VPA permit that required groundwater monitoring shall continue monitoring consistent with the requirements listed below regardless of where they are located relative to the seasonal high water table.
4. At facilities where groundwater monitoring is required, the following conditions apply:

- a. One data set shall be collected from each well prior to any waste being placed in the storage facility.
- b. The static water level shall be measured prior to bailing well water for sampling.
- c. At least three well volumes of groundwater shall be withdrawn immediately prior to sampling each monitoring well.

5. In accordance with subdivisions 2 and 3 of this subsection, the groundwater shall be monitored by the permittee at the monitoring wells as specified below. Additional groundwater monitoring may be required in the facility's approved nutrient management plan.

GROUNDWATER MONITORING				
PARAMETERS	LIMITATIONS	UNITS	MONITORING REQUIREMENTS	
			Frequency	Sample Type
Static Water Level	NL	Ft	1/3 years	Measured
Ammonia Nitrogen	NL	mg/L	1/3 years	Grab
Nitrate Nitrogen	NL	mg/L	1/3 years	Grab
pH	NL	SU	1/3 years	Grab
Conductivity	NL	umhos/cm	1/3 years	Grab

NL = No limit, this is a monitoring requirement only.

6. Soil at the land application sites shall be monitored as specified below. Additional soils monitoring may be required in the facility's approved nutrient management plan.

SOILS MONITORING				
PARAMETERS	LIMITATIONS	UNITS	MONITORING REQUIREMENTS	
			Frequency	Sample Type
pH	NL	SU	1/3 years	Composite
Phosphorus	NL	ppm or lbs/ac	1/3 years	Composite
Potash	NL	ppm or lbs/ac	1/3 years	Composite
Calcium	NL	ppm or lbs/ac	1/3 years	Composite
Magnesium	NL	ppm or lbs/ac	1/3 years	Composite

NL = No limit, this is a monitoring requirement only.

SU = Standard Units

7. Soil monitoring shall be conducted at a depth of between 0-6 inches, unless otherwise specified in the facility's approved nutrient management plan.

8. Waste shall be monitored as specified below. Additional waste monitoring may be required in the facility's approved nutrient management plan.

WASTE MONITORING				
PARAMETERS	LIMITATIONS	UNITS	MONITORING REQUIREMENTS	
			Frequency	Sample Type
Total Kjeldahl Nitrogen	NL	*	1/year	Composite
Ammonia Nitrogen	NL	*	1/year	Composite
Total Phosphorus	NL	*	1/year	Composite
Total Potassium	NL	*	1/ year	Composite
Calcium	NL	*	1/year	Composite
Magnesium	NL	*	1/year	Composite
Moisture Content	NL	%	1/year	Composite

NL = No limit, this is a monitoring requirement only.

*Parameters for waste may be reported as a percent, as lbs/ton or lbs/1000 gallons, or as ppm where appropriate.

9. Analysis of soil and waste shall be according to methods specified in the facility's approved nutrient management plan.

10. All monitoring data collected as required by this section and any additional monitoring shall be maintained on site for a period of five years and shall be made available to department personnel upon request.

B. Other requirements or special conditions.

1. Any liquid manure collection and storage facility shall be designed and operated to (i) prevent point source discharges of pollutants to state waters except in the case of a storm event greater than the 25-year, 24-hour storm and (ii) provide adequate waste storage capacity to accommodate periods when the ground is frozen or saturated, periods when land application of nutrients should not occur due to limited or nonexistent crop nutrient uptake, and periods when physical limitations prohibit the land application of waste.

2. Waste storage facilities constructed after December 1, 1998, shall not be located on a 100-year floodplain.

3. Earthen waste storage facilities constructed after December 1, 1998, shall include a properly designed and installed liner. Such liner shall be either a synthetic liner of at least 20 mils thickness or a compacted soil liner of at least one foot thickness with a maximum permeability rating of 0.0014 inches per hour. A Virginia licensed professional engineer or an employee of the Natural Resources Conservation Service of the U.S. Department of Agriculture with appropriate

engineering approval authority shall certify that the siting, design, and construction of the waste storage facility comply with the requirements of this permit. This certification shall be maintained on site.

4. At earthen waste storage facilities constructed below the seasonal high water table, the top surface of the waste must be maintained at a level of at least two feet above the water table.

5. All liquid waste storage or treatment facilities shall maintain at least one foot of freeboard at all times, up to and including a 25-year, 24-hour storm.

6. For new waste storage or treatment facilities constructed after November 16, 2014, the facilities shall be constructed, operated, and maintained in accordance with the applicable practice standard adopted by the Natural Resources Conservation Service of the U.S. Department of Agriculture and approved by the department. A Virginia licensed professional engineer or an employee of the Natural Resources Conservation Service of the U.S. Department of Agriculture with appropriate engineering approval authority shall certify that the siting, design, and construction of the waste storage facility comply with the requirements of this permit. This certification shall be maintained on site.

7. The permittee shall notify the department's regional office at least 14 days prior to (i) animals being initially placed in the confined facility or (ii) utilization of any new waste storage or treatment facilities.

8. Semi-solid and solid waste shall be stored in a manner that prevents contact with surface water and groundwater. Waste that is stockpiled outside for more than 14 days shall be kept in a facility or at a site that provides adequate storage. Adequate storage shall, at a minimum, include the following:

- a. Waste shall be covered to protect it from precipitation and wind;
- b. Stormwater shall not run onto or under the stored waste;
- c. A minimum of two feet separation distance to the seasonal high water table or an impermeable barrier shall be used under the stored waste. All waste storage facilities that use an impermeable barrier shall maintain a minimum of one foot separation between the seasonal high water table and the impermeable barrier. "Seasonal high water table" means that portion of the soil profile where a color change has occurred in the soil as a result of saturated soil conditions or where soil concretions have formed. Typical colors are gray mottlings, solid gray, or black. The depth in the soil at which these conditions first occur is termed the seasonal high water table. Impermeable barriers shall be constructed of at least 12 inches of compacted clay, at least four inches of reinforced concrete, or another

material of similar structural integrity that has a minimum permeability rating of 0.0014 inches per hour (1×10^{-6} centimeters per second); and

d. For waste that is not stored in a waste storage facility or under roof, the storage site must be at least 100 feet from any surface water, intermittent drainage, wells, sinkholes, rock outcrops, and springs.

9. All equipment needed for the proper operation of the permitted facilities shall be maintained in good working order. The manufacturer's operating and maintenance manuals shall be retained for references to allow for timely maintenance and prompt repair of equipment when appropriate. The permittee shall periodically inspect for leaks on equipment used for land application of waste.

10. All treated wastes generated by a digester or other manure treatment technologies shall be approved by the department and shall be managed by a facility covered under this permit and in accordance with the following conditions:

a. All treated wastes generated by a digester or other manure treatment technologies must be managed through an approved nutrient management plan or transferred to another entity in accordance with animal waste transfer requirements in Part III B 15 and 16.

b. When a facility covered under this permit generates a treated waste from animal waste and other feedstock, the permittee shall maintain records related to the production of the treated waste.

(1) If off-site wastes are added to generate the treated waste, the permittee shall record the following items:

(a) The amount of waste brought to the facility; and

(b) From whom and where the waste originated.

(2) For all treated wastes generated by the facility, the permittee shall record the following items:

(a) The amount of treated waste generated;

(b) The nutrient analysis of the treated waste; and

(c) The final use of the treated waste.

(3) Permittees shall maintain the records required by Part III B 10 b (1) and (2) on site for a period of three years. All records shall be made available to department personnel upon request.

11. Animal waste generated by this facility shall not be applied to fields owned by or under the operational control of either the permittee or a legal entity in which the permittee has an ownership interest unless the fields are included in the facility's approved nutrient management plan.

12. The permittee shall implement a nutrient management plan (NMP) developed by a certified nutrient management planner in accordance with § 10.1-104.2 of the Code of Virginia and approved by the Department of Conservation and Recreation and maintain the plan on site. The NMP shall address the form, source, amount, timing, and method of application of nutrients on each field to achieve realistic production goals, while minimizing nitrogen and phosphorus loss to ground and surface waters. The terms of the NMP shall be enforceable through this permit. The NMP shall contain at a minimum the following information:

- a. Site map indicating the location of the waste storage facilities and the fields where waste will be applied;
- b. Site evaluation and assessment of soil types and potential productivities;
- c. Nutrient management sampling including soil and waste monitoring;
- d. Storage and land area requirements;
- e. Calculation of waste application rates; and
- f. Waste application schedules.

13. Waste shall not be land applied within buffer zones. Buffer zones at waste application sites shall, at a minimum, be maintained as follows:

- a. Distance from occupied dwellings not on the permittee's property: 200 feet (unless the occupant of the dwelling signs a waiver of the buffer zone);
- b. Distance from water supply wells or springs: 100 feet;
- c. Distance from surface water courses: 100 feet (without a permanent vegetated buffer) or 35 feet (if a permanent vegetated buffer exists). Other site-specific conservation practices may be approved by the department that will provide pollutant reductions equivalent or better than the

reductions that would be achieved by the 100-foot buffer or 35-foot wide vegetated buffer;

- d. Distance from rock outcropping (except limestone): 25 feet;
- e. Distance from limestone outcroppings: 50 feet; and
- f. Waste shall not be applied in such a manner that it would discharge to sinkholes that may exist in the area.

14. The following land application records shall be maintained:

- a. The identification of the land application field sites where the waste is utilized or stored;
- b. The application rate;
- c. The application dates; and
- d. What crops have been planted.

These records shall be maintained on site for a period of five years after the date the application is made and shall be made available to department personnel upon request.

15. Animal waste generated by this facility may be transferred from the permittee to another person, if one or more of the following conditions are met:

- a. Animal waste generated by this facility may be transferred off-site for land application or another acceptable use approved by the department, if:
 - (1) The sites where the animal waste will be utilized are included in this permitted facility's approved nutrient management plan; or
 - (2) The sites where the animal waste will be utilized are included in another permitted facility's approved nutrient management plan.
- b. Animal waste generated by this facility may be transferred off-site without identifying in the permittee's approved nutrient management plan the fields where such waste will be utilized, if the following conditions are met:
 - (1) The animal waste is registered with the Virginia Department of Agriculture and Consumer Services in accordance with regulations adopted pursuant to subdivision A 2 of § 3.2-3607 of the Code of Virginia; or

(2) When the permittee transfers to another person more than 10 tons of solid or semi-solid animal waste (solid or semi-solid animal waste contains less than 85% moisture) or more than 6,000 gallons of liquid animal waste (liquid animal waste contains 85% or more moisture) in any 365-day period, the permittee shall maintain records in accordance with Part III B 16.

16. Animal waste may be transferred from a permittee to another person without identifying the fields where such waste will be utilized in the permittee's approved nutrient management plan if the following conditions are met:

a. When a permittee transfers to another person more than 10 tons of solid or semi-solid animal waste (solid or semi-solid animal waste contains less than 85% moisture) or more than 6,000 gallons of liquid animal waste (liquid animal waste contains 85% or more moisture) in any 365-day period, the permittee shall provide that person with:

- (1) Permittee's name, address, and permit number;
- (2) A copy of the most recent nutrient analysis of the animal waste; and
- (3) An animal waste fact sheet.

b. When a permittee transfers to another person more than 10 tons of solid or semi-solid animal waste (solid or semi-solid animal waste contains less than 85% moisture) or more than 6,000 gallons of liquid animal waste (liquid animal waste contains 85% or more moisture) in any 365-day period, the permittee shall keep a record of the following:

- (1) The recipient name and address;
- (2) The amount of animal waste received by the person;
- (3) The date of the transaction;
- (4) The nutrient analysis of the animal waste;
- (5) The locality in which the recipient intends to utilize the animal waste (i.e., nearest town or city and zip code);
- (6) The name of the stream or waterbody, if known, to the recipient that is nearest to the animal waste utilization or storage site; and

(7) The signed waste transfer records form acknowledging the receipt of the following:

- (a) The animal waste;
- (b) The nutrient analysis of the animal waste; and
- (c) An animal waste fact sheet.

c. Permittees shall maintain the records required by Part III B 16 a and b for at least three years after the date of the transaction and shall make them available to department personnel upon request.

17. When the waste storage or treatment facility is no longer needed, the permittee shall close it in a manner that (i) minimizes the need for further maintenance and (ii) controls, minimizes, or eliminates, to the extent necessary to protect human health and the environment, the postclosure escape of uncontrolled leachate, surface runoff, or waste decomposition products to the groundwater, surface water, or the atmosphere. At closure, the permittee shall remove all waste residue from the animal waste storage or treatment facility. Removed waste materials shall be utilized according to the approved NMP.

18. As required by § 62.1-44.17:1 F of the Code of Virginia, each permittee covered under this general permit shall have completed the training program offered or approved by the department in the two years prior to submitting the registration statement for general permit coverage or shall complete such training within one year after the registration statement has been submitted for general permit coverage. All permittees shall complete the training program at least once every three years.

9 VAC 25-192-80. Tracking and Accounting Requirements for Animal Waste End-Users.

A. When an animal waste end-user is the recipient of more than 10 tons of solid or semi-solid animal waste (solid or semi-solid animal waste contains less than 85% moisture) or more than 6,000 gallons of liquid animal waste (liquid animal waste contains 85% percent or more moisture) in any 365-day period from an owner or operator of an animal feeding operation covered by a VPA or VPDES permit, the end-user shall maintain records regarding the transfer and land application of animal waste.

1. The animal waste end-user shall provide the permittee with the following items:

- a. End-user name and address;
- b. The locality in which the end-user intends to utilize the waste (i.e., nearest town or city and zip code);

c. The name of the stream or waterbody, if known, to the end-user that is nearest to the waste utilization or storage site; and

d. Written acknowledgement of receipt of:

(1) The waste;

(2) The nutrient analysis of the waste; and

(3) An animal waste fact sheet.

2. The animal waste end-user shall record the following items regarding the waste transfer:

a. The source name, address, and permit number (if applicable);

b. The amount of animal waste that was received;

c. The date of the transaction;

d. The final use of the animal waste;

e. The locality in which the waste was utilized (i.e., nearest town or city and zip code); and

f. The name of the stream or waterbody, if known, to the recipient that is nearest to the waste utilization or storage site.

Records regarding animal waste transfers shall be maintained on site for a period of three years after the date of the transaction. All records shall be made available to department personnel upon request.

3. If waste is land applied, the animal waste end-user shall keep a record of the following items regarding the land application of the waste:

a. The nutrient analysis of the waste;

b. Maps indicating the animal waste land application fields and storage sites;

c. The land application rate;

d. The land application dates;

e. What crops were planted;

- f. Soil test results, if obtained;
- g. NMP, if applicable; and
- h. The method used to determine the land application rates (i.e., phosphorus crop removal, waste nutrient analysis rate, soil test recommendations, or a nutrient management plan).

Records regarding land application of animal waste shall be maintained on site for a period of three years after the date the application is made. All records shall be made available to department personnel upon request.

B. Any duly authorized agent of the board may, at reasonable times and under reasonable circumstances, enter any establishment or upon any property, public or private, for the purpose of obtaining information or conducting surveys or investigations necessary in the enforcement of the provisions of this regulation.

9 VAC 25-192-90. Utilization and Storage Requirements for Transferred Animal Waste.

A. An animal waste end-user who receives animal waste from an owner or operator of an animal feeding operation covered by a VPA or VPDES permit shall comply with the requirements outlined in this section.

[. . .]

C. Land application requirements. An animal waste end-user who (i) receives more than 10 tons of solid or semi-solid animal waste (solid or semi-solid animal waste contains less than 85% moisture) or more than 6,000 gallons of liquid animal waste (liquid animal waste contains 85% or more moisture) from an owner or operator of an animal feeding operation covered by a VPA or VPDES permit and (ii) land applies animal waste shall follow appropriate land application requirements as outlined in this subsection. The application of animal waste shall be managed to minimize adverse water quality impacts.

1. The maximum application rates can be established by the following methods:

a. Phosphorus crop removal application rates can be used when:

1) Soil test phosphorus levels do not exceed the values listed in the table below:

Region	Soil Test P (ppm) VPI & SU Soil Test (Mehlich I) *
Eastern Shore and Lower Coastal Plain	135
Middle and Upper Coastal Plain and Piedmont	136
Ridge and Valley	162

* If results are from another laboratory the Department of Conservation and Recreation approved conversion factors must be used.

2) The phosphorus crop removal application rates are set forth by regulations promulgated by the Department of Conservation and Recreation in accordance with § 10.1-104.2 of the Code of Virginia.

b. Animal waste may be applied to any crop once every three years at a rate of no greater than 80 pounds of plant available phosphorus per acre when:

(1) The plant available phosphorus supplied by the animal waste is based on a waste nutrient analysis obtained in the last two years;

(2) In the absence of current soil sample analyses and recommendations; and

(3) Nutrients have not been supplied by an organic source, other than pastured animals, to the proposed land application sites within the previous three years of the proposed land application date of animal waste.

c. Soil test recommendations can be used when:

(1) Accompanied by analysis results for soil tests that have been obtained from the proposed field or fields in the last three years;

(2) The analytical results are from procedures in accordance with 4VAC50-85-140 A 2 f; and

(3) Nutrients from the waste application do not exceed the nitrogen or phosphorus recommendations for the proposed crop or double crops. The recommendations shall be in accordance with 4VAC50-85-140 A 2 a.

d. A nutrient management plan developed by a certified nutrient management planner in accordance with § 10.1-104.2 of the Code of Virginia.

2. The timing of land application of animal waste shall be appropriate for the crop, and in accordance with 4VAC50-85-140 A 4, except that no waste may be applied to ice covered or snow covered ground or to soils that are saturated.

3. Animal waste shall not be land applied within buffer zones. Buffer zones at waste application sites shall, at a minimum, be maintained as follows:

- a. Distance from occupied dwellings: 200 feet (unless the occupant of the dwelling signs a waiver of the buffer zone);
- b. Distance from water supply wells or springs: 100 feet;
- c. Distance from surface water courses: 100 feet (without a permanent vegetated buffer) or 35 feet (if a permanent vegetated buffer exists). Other site-specific conservation practices may be approved by the department that will provide pollutant reductions equivalent or better than the reductions that would be achieved by the 100-foot buffer;
- d. Distance from rock outcropping (except limestone): 25 feet;
- e. Distance from limestone outcroppings: 50 feet; and
- f. Waste shall not be applied in such a manner that it would discharge to sinkholes that may exist in the area.

D. Animal waste end-users shall maintain the records demonstrating compliance with the requirements of subsections B and C of this section for at least three years and make them available to department personnel upon request.

E. The activities of the animal waste end-user shall not contravene the Water Quality Standards, as amended and adopted by the board, or any provision of the State Water Control Law (§ 62.1-44 et seq. of the Code of Virginia).

F. Any duly authorized agent of the board may, at reasonable times and under reasonable circumstances, enter any establishment or upon any property, public or private, for the purpose of obtaining information or conducting surveys or investigations necessary in the enforcement of the provisions of this regulation.

9 VAC 25-630-10. Definitions.

The words and terms used in this chapter shall have the meanings defined in the State Water Control Law (§ 62.1-44.2 et seq. of the Code of Virginia) and the Permit Regulation (9VAC25-32) unless the context clearly indicates otherwise, except that for the purposes of this chapter:

"Agricultural storm water discharge" means a precipitation-related discharge of manure, litter, or process wastewater that has been applied on land areas under the control of an animal feeding operation or under the control of a poultry waste end-user or poultry waste broker in accordance with a nutrient management plan approved by the Virginia Department of Conservation and Recreation and in accordance with site-specific nutrient management practices that ensure

appropriate agricultural utilization of the nutrients in the manure, litter, or process wastewater.

"Animal feeding operation" means a lot or facility (other than an aquatic animal production facility) where both of the following conditions are met:

1. Animals (other than aquatic animals) have been, are, or will be stabled or confined and fed or maintained for a total of 45 days or more in any 12-month period; and
2. Crops, vegetation, forage growth or post-harvest residues are not sustained in the normal growing season over any portion of the operation of the lot or facility.

Two or more animal feeding operations under common ownership are a single animal feeding operation for the purpose of determining the number of animals at an operation if they adjoin each other or if they use a common area or system for the disposal of wastes.

"Confined animal feeding operation," for the purposes of this regulation, has the same meaning as an "animal feeding operation."

"Confined poultry feeding operation" means any confined animal feeding operation with 200 or more animal units of poultry. This equates to 20,000 chickens or 11,000 turkeys, regardless of animal age or sex.

"Department" means the Virginia Department of Environmental Quality.

"Director" means the Director of the Virginia Department of Environmental Quality or his designee.

"Fact sheet" means the document prepared by the department that summarizes the requirements set forth in this chapter regarding utilization, storage, and management of poultry waste by poultry waste end-users and poultry waste brokers.

"General permit" means 9VAC25-630-50.

"Nutrient management plan" or "NMP" means a plan developed or approved by the Department of Conservation and Recreation that requires proper storage, treatment, and management of poultry waste, including dry litter, and limits accumulation of excess nutrients in soils and leaching or discharge of nutrients into state waters; except that for a poultry waste end-user or poultry waste broker who is not subject to the general permit, the requirements of 9VAC25-630-80 constitute the NMP.

"Organic source" means any nutrient source including, but not limited to, manures, biosolids, compost, and waste or sludges from animals, humans, or industrial processes, but for the purposes of this regulation it excludes waste from wildlife.

"Permittee" means the poultry grower, poultry waste end-user, or poultry waste broker whose poultry waste management activities are covered under the general permit.

"Poultry grower" or "grower" means any person who owns or operates a confined poultry feeding operation.

"Poultry waste" means dry poultry litter and composted dead poultry.

"Poultry waste broker" or "broker" means a person who possesses or controls poultry waste that is not generated on an animal feeding operation under his operational control and who transfers or hauls poultry waste to other persons. If the entity is defined as a broker they cannot be defined as a hauler for the purposes of this regulation.

"Poultry waste end-user" or "end-user" means any recipient of transferred poultry waste who stores or who utilizes the waste as fertilizer, fuel, feedstock, livestock feed, or other beneficial end use for an operation under his control.

"Poultry waste hauler" or "hauler" means a person who provides transportation of transferred poultry waste from one entity to another, and is not otherwise involved in the transfer or transaction of the waste, nor responsible for determining the recipient of the waste. The responsibility of the recordkeeping and reporting remains with the entities to which the service was provided: grower, broker, and end-user.

"Standard rate" means a land application rate for poultry waste approved by the board as specified in this regulation.

"Vegetated buffer" means a permanent strip of dense perennial vegetation established parallel to the contours of and perpendicular to the dominant slope of the field for the purposes of slowing water runoff, enhancing water infiltration, and minimizing the risk of any potential nutrients or pollutants from leaving the field and reaching surface waters.

9 VAC 25-630-20. Purpose; Delegation of Authority; Effective Date of Permit.

A. This regulation governs the management of poultry waste at confined poultry feeding operations not covered by a Virginia Pollutant Discharge Elimination System (VPDES) permit and poultry waste utilized or stored by poultry waste end-users or poultry waste

brokers. It establishes requirements for proper nutrient management, waste storage, and waste tracking and accounting of poultry waste.

B. The Director of the Department of Environmental Quality, or his designee, may perform any act of the board provided under this chapter, except as limited by § 62.1-44.14 of the Code of Virginia.

C. This general permit will become effective on December 1, 2010. This general permit will expire 10 years from the effective date.

9 VAC 25-630-25. Duty to Comply.

A. Any person who manages or proposes to manage pollutants regulated by 9VAC25-630 shall comply with the applicable requirements of this chapter.

B. In order to manage pollutants from a confined poultry feeding operation, the poultry grower shall be required to obtain coverage under the Virginia Pollution Abatement (VPA) general permit or an individual VPA permit provided that the poultry grower has not been required to obtain a Virginia Pollutant Discharge Elimination System (VPDES) permit. The poultry grower shall comply with the requirements of this chapter and the permit.

C. Any poultry waste end-user or poultry waste broker shall comply with the technical requirements outlined in 9VAC25-630-60, 9VAC25-630-70, and 9VAC25-630-80. Any poultry waste end-user or poultry waste broker who does not comply with the technical requirements outlined in 9VAC25-630-60, 9VAC25-630-70, and 9VAC25-630-80 may be required to obtain coverage under the general permit.

D. Any poultry waste end-user or poultry waste broker who is required by the board to obtain coverage under the Virginia Pollution Abatement general permit shall obtain coverage and comply with the requirements of this chapter.

9 VAC 25-630-30. Authorization to Manage Pollutants.

A. Poultry grower. Any poultry grower governed by this general permit is hereby authorized to manage pollutants at confined poultry feeding operations provided that the poultry grower files the registration statement of 9VAC25-630-40, complies with the requirements of 9VAC25-630-50, and:

1. The poultry grower has not been required to obtain a Virginia Pollutant Discharge Elimination System (VPDES) permit or an individual permit according to 9VAC25-32-260 B;
2. The activities of the confined poultry feeding operation shall not contravene the Water Quality Standards, as amended and adopted by the board, or any provision of the State Water Control Law. There shall be no point source

discharge of wastewater to surface waters of the state except in the case of a storm event greater than the 25-year, 24-hour storm. Agricultural storm water discharges are permitted. Domestic sewage or industrial waste shall not be managed under this general permit;

3. Confined poultry feeding operations that use disposal pits for routine disposal of daily mortalities shall not be covered under this general permit. The use of a disposal pit by a permittee for routine disposal of daily poultry mortalities shall be a violation of this permit. This prohibition shall not apply to the emergency disposal of dead poultry done according to regulations adopted pursuant to § 3.2-6002 or Chapter 14 (§ 10.1-1400 et seq.) of Title 10.1 of the Code of Virginia;

4. The poultry grower shall obtain Department of Conservation and Recreation approval of a nutrient management plan for the confined poultry feeding operation prior to the submittal of the registration statement. The poultry grower shall attach to the registration statement a copy of the approved nutrient management plan and a copy of the letter from the Department of Conservation and Recreation certifying approval of the nutrient management plan that was developed by a certified nutrient management planner in accordance with § 10.1-104.2 of the Code of Virginia. The poultry grower shall implement the approved nutrient management plan;

5. Adjoining property notification.

a. Prior to filing a general permit registration statement for a confined poultry feeding operation that proposes construction of poultry growing houses after December 1, 2000, the poultry grower shall give notice to all owners or residents of property that adjoins the property on which the proposed confined poultry feeding operation will be located. Such notice shall include (i) the types and maximum number of poultry which will be maintained at the facility and (ii) the address and phone number of the appropriate department regional office to which comments relevant to the permit may be submitted.

b. Any person may submit written comments on the proposed operation to the department within 30 days of the date of the filing of the registration statement. If, on the basis of such written comments or his review, the director determines that the proposed operation will not be capable of complying with the provisions of the general permit, the director shall require the owner to obtain an individual permit for the operation. Any such determination by the director shall be made in writing and received by the poultry grower not more than 45 days after the filing of the registration statement or, if in the director's sole discretion additional time is necessary to evaluate comments received from the public, not more than 60 days after the filing of the registration statement; and

6. Each poultry grower covered by this general permit shall complete a training program offered or approved by the department within one year of filing the registration statement for general permit coverage. All permitted poultry growers shall complete a training program at least once every five years.

B. Poultry waste end-user, poultry waste broker. Any poultry waste end-user or poultry waste broker shall comply with the requirements outlined in 9VAC25-630-60, 9VAC25-630-70, and 9VAC25-630-80 or the general permit as applicable.

1. Any poultry waste end-user or poultry waste broker who does not comply with the requirements of 9VAC25-630-60, 9VAC25-630-70, and 9VAC25-630-80 may be required to obtain coverage under the general permit.

2. Any poultry waste end-user or poultry waste broker governed by this general permit is hereby authorized to manage pollutants relating to the utilization and storage of poultry waste provided that the poultry waste end-user or poultry waste broker files the registration statement of 9VAC25-630-40, complies with the requirements of 9VAC25-630-50, and:

a. The poultry waste end-user or poultry waste broker has not been required to obtain a Virginia Pollution Abatement individual permit according to subdivision 2 b of 9VAC25-32-260;

b. The activities of the poultry waste end-user or poultry waste broker shall not contravene the Water Quality Standards, as amended and adopted by the board, or any provision of the State Water Control Law (§ 62.1-44 et seq. of the Code of Virginia). There shall be no point source discharge of wastewater to surface waters of the state except in the case of a storm event greater than the 25-year, 24-hour storm. Agricultural storm water discharges are permitted. Domestic sewage or industrial waste shall not be managed under this general permit;

c. The poultry waste end-user or poultry waste broker shall obtain Department of Conservation and Recreation approval of a nutrient management plan for land application sites where poultry waste will be utilized or stored and managed prior to the submittal of the registration statement. The poultry waste end-user or the poultry waste broker shall attach to the registration statement a copy of the approved nutrient management plan and a copy of the letter from the Department of Conservation and Recreation certifying approval of the nutrient management plan that was developed by a certified nutrient management planner in accordance with § 10.1-104.2 of the Code of Virginia. The poultry waste end-user or the poultry waste broker shall implement the approved nutrient management plan; and

d. Each poultry waste end-user or poultry waste broker covered by this general permit shall complete a training program offered or approved by the department within one year of filing the registration statement for general permit coverage. All permitted poultry waste end-users or permitted poultry waste brokers shall complete a training program at least once every five years.

C. Receipt of this general permit does not relieve any poultry grower, poultry waste end-user, or poultry waste broker of the responsibility to comply with any other applicable federal, state or local statute, ordinance or regulation.

D. Continuation of permit coverage.

1. Any owner that was authorized to manage pollutants under the general permit issued in 2000, and that submits a complete registration statement on or before November 30, 2010, is authorized to continue to manage pollutants under the terms of the 2000 general permit until such time as the board either:

- a. Issues coverage to the owner under this general permit; or
- b. Notifies the owner that coverage under this permit is denied.

2. When the permittee that was covered under the expiring or expired general permit has violated or is violating the conditions of that permit, the board may choose to do any or all of the following:

- a. Initiate enforcement action based upon the existing or expired general permit;
- b. Issue a notice of intent to deny coverage under the amended general permit. If the general permit coverage is denied, the owner would then be required to cease the activities authorized by the continued general permit or be subject to enforcement action for operating without a permit;
- c. Issue an individual permit with appropriate conditions; or
- d. Take other actions set forth in the VPA Permit Regulation (9VAC25-32).

9 VAC 25-630-40. Registration Statement.

A. Poultry growers. In order to be covered under the general permit, the poultry grower shall file a complete VPA General Permit Registration Statement. The registration statement shall contain the following information:

1. The poultry grower's name, mailing address, email address (if available), and telephone number;
2. The farm name (if applicable) and location of the confined poultry feeding operation;
3. The name, email address (if available), and telephone number of a contact person or operator other than the poultry grower, if necessary;
4. The best time of day and day of the week to contact the poultry grower or contact person;
5. If the facility has an existing VPA permit, the permit number;
6. Indicate whether the poultry are grown under contract with a poultry integrator and give the name of the integrator (if applicable);
7. The types of poultry and the maximum numbers of each type to be grown at the facility at any one time;
8. Identification of the method of dead bird disposal;
9. An indication of whether new poultry growing houses are under construction or planned for construction;
10. A copy of the nutrient management plan approved by the Department of Conservation and Recreation;
11. A copy of the Department of Conservation and Recreation nutrient management plan approval letter that also certifies that the plan was developed by a certified nutrient management planner in accordance with § 10.1-104.2 of the Code of Virginia; and
12. The following certification: "I certify that for any confined poultry feeding operation that proposes construction of new poultry growing houses, notice of the registration statement has been given to all owners or residents of property that adjoins the property on which the confined poultry feeding operation will be located. This notice included the types and numbers of poultry which will be grown at the facility and the address and phone number of the appropriate Department of Environmental Quality regional office to which comments relevant to the permit may be submitted. I certify under penalty of law that all the requirements of the board for the general permit are being met and that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system or those persons directly responsible for

gathering the information, the information submitted is to the best of my knowledge and belief true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations."

B. Poultry waste end-users or poultry waste brokers. In order to be covered under the general permit, the poultry waste end-user or poultry waste broker shall file a complete VPA General Permit Registration Statement. The registration statement shall contain the following information:

1. The poultry waste end-user's or poultry waste broker's name, mailing address, email address (if available), and telephone number;
2. The location of the operation where the poultry waste will be utilized, stored, or managed;
3. The best time of day and day of the week to contact the poultry waste end-user or poultry waste broker;
4. If the facility has an existing VPA permit, the permit number;
5. If confined poultry are located at the facility, indicate the number of confined poultry;
6. A copy of the nutrient management plan approved by the Department of Conservation and Recreation;
7. A copy of the Department of Conservation and Recreation nutrient management plan approval letter that also certifies that the plan was developed by a certified nutrient management planner in accordance with § 10.1-104.2 of the Code of Virginia; and
8. The following certification: "I certify under penalty of law that all the requirements of the board for the general permit are being met and that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system or those persons directly responsible for gathering the information, the information submitted is to the best of my knowledge and belief true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations."

C. The registration statement shall be signed in accordance with 9VAC25-32-50.

9 VAC 25-630-50. Contents of the General Permit.

Any poultry grower, poultry waste end-user, or poultry waste broker whose registration statement is accepted by the board will receive the following general permit and shall comply with the requirements therein and be subject to the VPA Permit Regulation, 9VAC25-32.

General Permit No. VPG2

Effective Date: December 1, 2010

Expiration Date: November 30, 2020

**GENERAL PERMIT FOR POULTRY WASTE MANAGEMENT
AUTHORIZATION TO MANAGE POLLUTANTS UNDER THE VIRGINIA POLLUTION
ABATEMENT PROGRAM AND THE VIRGINIA STATE WATER CONTROL LAW**

In compliance with the provisions of the State Water Control Law and State Water Control Board regulations adopted pursuant thereto, owners of confined poultry feeding operations having 200 or more animal units, poultry waste end-users, and poultry waste brokers are authorized to manage pollutants within the boundaries of the Commonwealth of Virginia, except where board regulations prohibit such activities.

The authorized pollutant management activities shall be in accordance with the registration statement and supporting documents submitted to the Department of Environmental Quality, this cover page, and Part I – Pollutant Management and Monitoring Requirements for Confined Poultry Feeding Operations and Part II – Conditions Applicable to All VPA Permits and Part III – Pollutant Management and Monitoring Requirements for Poultry Waste End-Users and Poultry Waste Brokers, as set forth herein.

Part I Pollutant Management and Monitoring Requirements for Confined Poultry Feeding Operations

A. Pollutant management authorization and monitoring requirements.

1. During the period beginning with the permittee's coverage under this general permit and lasting until the permit's expiration date, the permittee is authorized to manage pollutants at the location or locations identified in the registration statement and the facility's approved nutrient management plan.
2. If poultry waste is land applied, it shall be applied at the rates specified in the facility's approved nutrient management plan.
3. Soil at the land application sites shall be monitored as specified below. Additional soils monitoring may be required in the facility's approved nutrient management plan.

SOILS MONITORING

PARAMETERS	LIMITATIONS	UNITS	MONITORING REQUIREMENTS	
			Frequency	Sample Type
pH	NL	SU	1/3 years	Composite*
Phosphorus	NL	ppm or lbs/ac	1/3 years	Composite*
Potash	NL	ppm or lbs/ac	1/3 years	Composite*
Calcium	NL	ppm or lbs/ac	1/3 years	Composite*
Magnesium	NL	ppm or lbs/ac	1/3 years	Composite*

NL = No limit, this is a monitoring requirement only.

SU = Standard Units

*Specific sampling requirements are found in the facility's approved nutrient management plan.

4. Poultry waste shall be monitored as specified below. Additional waste monitoring may be required in the facility's approved nutrient management plan.

WASTE MONITORING				
PARAMETERS	LIMITATIONS	UNITS	MONITORING REQUIREMENTS	
			Frequency	Sample Type
Total Kjeldahl Nitrogen	NL	*	1/3 years	Composite
Ammonia Nitrogen	NL	*	1/3 years	Composite
Total Phosphorus	NL	*	1/3 years	Composite
Total Potassium	NL	*	1/3 years	Composite
Moisture Content	NL	%	1/3 years	Composite

5. Analysis of soil and waste shall be according to methods specified in the facility's approved nutrient management plan.

6. All monitoring data required by Part I A shall be maintained on site in accordance with Part II B. Reporting of results to the department is not required; however, the monitoring results shall be made available to department personnel upon request.

B. Other requirements or special conditions.

1. The confined poultry feeding operation shall be designed and operated to (i) prevent point source discharges of pollutants to state waters except in the case of a storm event greater than the 25-year, 24-hour storm and (ii) provide adequate waste storage capacity to accommodate periods when the ground is ice covered, snow covered or saturated, periods when land application of nutrients should not occur due to limited or nonexistent crop nutrient uptake, and periods when physical limitations prohibit the land application of waste.

2. Poultry waste shall be stored according to the nutrient management plan and in a manner that prevents contact with surface water and ground water. Poultry waste that is stockpiled outside of the growing house for more than 14 days shall be kept in a facility or at a site that provides adequate storage. Adequate storage shall, at a minimum, include the following:

a. Poultry waste shall be covered to protect it from precipitation and wind;

b. Storm water shall not run onto or under the stored poultry waste;

c. A minimum of two feet separation distance to the seasonal high water table or an impermeable barrier shall be used under the stored poultry waste. All poultry waste storage facilities that use an impermeable barrier shall maintain a minimum of one foot separation between the seasonal high water table and the impermeable barrier. "Seasonal high water table" means that portion of the soil profile where a color change has occurred in the soil as a result of saturated soil conditions or where soil concretions have formed. Typical colors are gray mottlings, solid gray or black. The depth in the soil at which these conditions first occur is termed the seasonal high water table. Impermeable barriers must be constructed of at least 12 inches of compacted clay, at least four inches of reinforced concrete, or another material of similar structural integrity that has a minimum permeability rating of 0.0014 inches per hour (1×10^{-6} centimeters per second); and

d. For poultry waste that is not stored under roof, the storage site must be at least 100 feet from any surface water, intermittent drainage, wells, sinkholes, rock outcrops, and springs.

3. Poultry waste storage facilities constructed after December 1, 2000, shall not be located within a 100-year floodplain unless the poultry grower has no land outside the floodplain on which to construct the facility and the facility is constructed so that the poultry waste is stored above the 100-year flood elevation or otherwise protected from floodwaters through the construction of berms or similar best management flood control structures. New, expanded or replacement poultry growing houses that are constructed after December 1, 2000, shall not be located within a 100-year floodplain unless they are part of an existing, ongoing confined poultry feeding operation and are constructed so that the poultry and poultry litter are housed above the 100-year flood elevation or otherwise protected from floodwaters through construction of berms or similar best management flood control structures.

4. Poultry waste may be transferred from a permitted poultry grower to another person without identifying the fields where such waste will be utilized in the

permitted poultry grower's approved nutrient management plan if the following conditions are met:

a. When a poultry grower transfers to another person more than 10 tons of poultry waste in any 365-day period, the poultry grower shall provide that person with:

- (1) Grower name, address, and permit number;
- (2) A copy of the most recent nutrient analysis of the poultry waste; and
- (3) A fact sheet.

b. When a poultry grower transfers to another person more than 10 tons of poultry waste in any 365-day period, the poultry grower shall keep a record of the following:

- (1) The recipient name and address;
- (2) The amount of poultry waste received by the person;
- (3) The date of the transaction;
- (4) The nutrient analysis of the waste; and
- (5) The signed waste transfer records form acknowledging the receipt of the following:
 - (a) The waste;
 - (b) The nutrient analysis of the waste; and
 - (c) A fact sheet.

c. When a poultry grower transfers to another person more than 10 tons of poultry waste in any 365-day period, and the recipient of the waste is someone other than a broker, the poultry grower shall keep a record of the following:

- (1) The locality in which the recipient intends to utilize the waste (i.e., nearest town or city and zip code); and
- (2) The name of the stream or waterbody if known to the recipient that is nearest to the waste utilization or storage site.

d. Poultry growers shall maintain the records required by Part I B 4 a, b, and c for at least three years after the transaction and shall make them available to department personnel upon request.

e. Poultry waste generated by this facility shall not be applied to fields owned by or under the operational control of either the poultry grower or a legal entity in which the poultry grower has an ownership interest unless the fields are included in the facility's approved nutrient management plan.

5. Confined poultry feeding operations that use disposal pits for routine disposal of daily mortalities shall not be covered under this general permit. The use of a disposal pit for routine disposal of daily poultry mortalities by a permittee shall be a violation of this permit. This prohibition does not apply to the emergency disposal of dead poultry done according to regulations adopted pursuant to § 3.2-6002 of the Code of Virginia or Chapter 14 (§ 10.1-1400 et seq.) of Title 10.1 of the Code of Virginia.

6. The poultry grower shall implement a nutrient management plan (NMP) developed by a certified nutrient management planner in accordance with § 10.1-104.2 of the Code of Virginia and approved by the Department of Conservation and Recreation and maintain the plan on site. The terms of the NMP shall be enforceable through this permit. The NMP shall contain at a minimum the following information:

a. Site map indicating the location of the waste storage facilities and the fields where waste generated by this facility will be applied by the poultry grower. The location of fields as identified in Part I B 4 e shall also be included;

b. Site evaluation and assessment of soil types and potential productivities;

c. Nutrient management sampling including soil and waste monitoring;

d. Storage and land area requirements for the grower's poultry waste management activities;

e. Calculation of waste application rates; and

f. Waste application schedules.

7. When the poultry waste storage facility is no longer needed, the permittee shall close it in a manner that: (i) minimizes the need for further maintenance and (ii) controls, minimizes or eliminates, to the extent necessary to protect human health and the environment, the postclosure escape of uncontrolled leachate, surface runoff, or waste decomposition products to the ground water, surface water or the

atmosphere. At closure, the permittee shall remove all poultry waste residue from the waste storage facility. At waste storage facilities without permanent covers and impermeable ground barriers, all residual poultry waste shall be removed from the surface below the stockpile when the poultry waste is taken out of storage. Removed waste materials shall be utilized according to the NMP.

8. Nitrogen application rates contained in the NMP shall be established in accordance with 4VAC5-15-150 A 2. The application of poultry waste shall be managed to minimize runoff, leachate, and volatilization losses, and reduce adverse water quality impacts from nitrogen.

9. Phosphorus application rates contained in the NMP shall be established in accordance with 4VAC5-15-150 A 2. The application of poultry waste shall be managed to minimize runoff and leaching and reduce adverse water quality impacts from phosphorous.

10. The timing of land application of poultry waste shall be according to the schedule contained in the NMP, except that no waste may be applied to ice covered or snow covered ground or to soils that are saturated. Poultry waste may be applied to frozen ground within the NMP scheduled times only under the following conditions:

- a. Slopes are not greater than 6.0%;
- b. A minimum of a 200-foot vegetative or adequate crop residue buffer is maintained between the application area and all surface water courses;
- c. Only those soils characterized by USDA as "well drained" with good infiltration are used; and
- d. At least 60% uniform cover by vegetation or crop residue is present in order to reduce surface runoff and the potential for leaching of nutrients to ground water.

11. Poultry waste shall not be land applied within buffer zones. Buffer zones at waste application sites shall, at a minimum, be maintained as follows:

- a. Distance from occupied dwellings not on the permittee's property: 200 feet (unless the occupant of the dwelling signs a waiver of the buffer zone);
- b. Distance from water supply wells or springs: 100 feet;
- c. Distance from surface water courses: 100 feet (without a permanent vegetated buffer) or 35 feet (if a permanent vegetated buffer exists).

Other site-specific conservation practices may be approved by the department that will provide pollutant reductions equivalent or better than the reductions that would be achieved by the 100-foot buffer;

d. Distance from rock outcropping (except limestone): 25 feet;

e. Distance from limestone outcroppings: 50 feet; and

f. Waste shall not be applied in such a manner that it would discharge to sinkholes that may exist in the area.

12. The following records shall be maintained:

a. The identification of the land application field sites where the waste is utilized or stored;

b. The application rate;

c. The application dates; and

d. What crops have been planted.

These records shall be maintained on site for a period of three years after recorded application is made and shall be made available to department personnel upon request.

13. Each poultry grower covered by this general permit shall complete a training program offered or approved by the department within one year of filing the registration statement for general permit coverage. All permitted poultry growers shall complete a training program at least once every five years.

Part II Conditions Applicable to all VPA Permits

A. Monitoring.

1. Samples and measurements taken as required by this permit shall be representative of the monitored activity.

2. Monitoring shall be conducted according to procedures listed under 40 CFR Part 136 unless other procedures have been specified in this permit.

3. The permittee shall periodically calibrate and perform maintenance procedures on all monitoring and analytical instrumentation at intervals that will ensure accuracy of measurements.

B. Records.

1. Records of monitoring information shall include:

- a. The date, exact place, and time of sampling or measurements;
- b. The name of the individual(s) who performed the sampling or measurements;
- c. The date(s) analyses were performed;
- d. The name of the individual(s) who performed the analyses;
- e. The analytical techniques or methods used, with supporting information such as observations, readings, calculations and bench data; and
- f. The results of such analyses.

2. The permittee shall retain records of all monitoring information, including all calibration and maintenance records and all original strip chart recordings for continuous monitoring instrumentation, copies of all reports required by this permit, and records of all data used to complete the application for this permit for a period of at least three years from the date of the sample, measurement, report or application. This period of retention may be extended by request of the board at any time.

C. Reporting monitoring results. If reporting is required by Part I or Part III of this general permit, the permittee shall follow the requirements of this subsection.

1. The permittee shall submit the results of the monitoring required by this permit not later than the 10th day of the month after the monitoring takes place, unless another reporting schedule is specified elsewhere in this permit. Monitoring results shall be submitted to the department's regional office.

2. Monitoring results shall be reported on forms provided or specified by the department.

3. If the permittee monitors the pollutant management activity, at a sampling location specified in this permit, for any pollutant more frequently than required by the permit using approved analytical methods, the permittee shall report the results of this monitoring on the monitoring report.

4. If the permittee monitors the pollutant management activity, at a sampling location specified in this permit, for any pollutant that is not required to be monitored by the permit, and uses approved analytical methods, the permittee shall report the results with the monitoring report.

5. Calculations for all limitations that require averaging of measurements shall utilize an arithmetic mean unless otherwise specified in this permit.

D. Duty to provide information. The permittee shall furnish to the department, within a reasonable time, any information which the director may request to determine whether cause exists for modifying, revoking and reissuing, or terminating this permit, or to determine compliance with this permit. The permittee shall also furnish to the department, upon request, copies of records required to be kept by the permittee. Plans, specifications, maps, conceptual reports and other relevant information shall be submitted as requested by the director prior to commencing construction.

E. Compliance schedule reports. Reports of compliance or noncompliance with, or any progress reports on, interim and final requirements contained in any compliance schedule of this permit shall be submitted no later than 14 days following each schedule date.

F. Unauthorized discharges. Except in compliance with this permit, or another permit issued by the board, it shall be unlawful for any person to:

1. Discharge into state waters sewage, industrial wastes, other wastes, or any noxious or deleterious substances; or
2. Otherwise alter the physical, chemical or biological properties of such state waters and make them detrimental to the public health, or to animal or aquatic life, or to the use of such waters for domestic or industrial consumption, or for recreation, or for other uses.

G. Reports of unauthorized discharges. Any permittee who discharges or causes or allows (i) a discharge of sewage, industrial waste, other wastes or any noxious or deleterious substance into or upon state waters in violation of Part II F or (ii) a discharge that may reasonably be expected to enter state waters in violation of Part II F shall notify the department of the discharge immediately upon discovery of the discharge, but in no case later than 24 hours after said discovery. A written report of the unauthorized discharge shall be submitted to the department within five days of discovery of the discharge. The written report shall contain:

1. A description of the nature and location of the discharge;
2. The cause of the discharge;
3. The date on which the discharge occurred;
4. The length of time that the discharge continued;
5. The volume of the discharge;
6. If the discharge is continuing, how long it is expected to continue;

7. If the discharge is continuing, what the expected total volume of the discharge will be; and

8. Any steps planned or taken to reduce, eliminate and prevent a recurrence of the present discharge or any future discharges not authorized by this permit. Discharges reportable to the department under the immediate reporting requirements of other regulations are exempted from this requirement.

H. Reports of unusual or extraordinary discharges. If any unusual or extraordinary discharge including a bypass or upset should occur from a treatment works and the discharge enters or could be expected to enter state waters, the permittee shall promptly notify, in no case later than 24 hours, the department by telephone after the discovery of the discharge. This notification shall provide all available details of the incident, including any adverse affects on aquatic life and the known number of fish killed. The permittee shall reduce the report to writing and shall submit it to the department within five days of discovery of the discharge in accordance with Part II I 2. Unusual and extraordinary discharges include but are not limited to any discharge resulting from:

1. Unusual spillage of materials resulting directly or indirectly from processing operations;
2. Breakdown of processing or accessory equipment;
3. Failure or taking out of service some or all of the treatment works; and
4. Flooding or other acts of nature.

I. Reports of noncompliance. The permittee shall report any noncompliance which may adversely affect state waters or may endanger public health.

1. An oral report shall be provided within 24 hours from the time the permittee becomes aware of the circumstances. The following shall be included as information which shall be reported within 24 hours under this paragraph:

- a. Any unanticipated bypass; and
- b. Any upset which causes a discharge to surface waters.

2. A written report shall be submitted within five days and shall contain:

- a. A description of the noncompliance and its cause;
- b. The period of noncompliance, including exact dates and times, and, if the noncompliance has not been corrected, the anticipated time it is expected to continue; and

c. Steps taken or planned to reduce, eliminate, and prevent reoccurrence of the noncompliance.

The board may waive the written report on a case-by-case basis for reports of noncompliance under Part II I if the oral report has been received within 24 hours and no adverse impact on state waters has been reported.

3. The permittee shall report all instances of noncompliance not reported under Part II I 1 or 2 in writing at the time the next monitoring reports are submitted. The reports shall contain the information listed in Part II I 2.

NOTE: The immediate (within 24 hours) reports required in Parts II F, G and H may be made to the department's regional office. For reports outside normal working hours, leave a message and this shall fulfill the immediate reporting requirement. For emergencies, the Virginia Department of Emergency Services maintains a 24-hour telephone service at 1-800-468-8892.

J. Notice of planned changes.

1. The permittee shall give notice to the department as soon as possible of any planned physical alterations or additions to the design or operation of the pollutant management activity.
2. The permittee shall give at least 10 days advance notice to the department of any planned changes in the permitted facility or activity that may result in noncompliance with permit requirements.

K. Signatory requirements.

1. Applications. All permit applications shall be signed as follows:
 - a. For a corporation: by a responsible corporate officer. For the purpose of this section, a responsible corporate officer means: (i) a president, secretary, treasurer, or vice-president of the corporation in charge of a principal business function, or any other person who performs similar policy- or decision-making functions for the corporation or (ii) the manager of one or more manufacturing, production, or operating facilities employing more than 250 persons or having gross annual sales or expenditures exceeding \$25 million (in second-quarter 1980 dollars), if authority to sign documents has been assigned or delegated to the manager in accordance with corporate procedures;
 - b. For a partnership or sole proprietorship: by a general partner or the proprietor, respectively; or

c. For a municipality, state, federal, or other public agency: by either a principal executive officer or ranking elected official. For purposes of this section, a principal executive officer of a public agency includes: (i) the chief executive officer of the agency, or (ii) a senior executive officer having responsibility for the overall operations of a principal geographic unit of the agency.

2. Reports, etc. All reports required by permits, and other information requested by the board shall be signed by a person described in Part II K 1, or by a duly authorized representative of that person. A person is a duly authorized representative only if:

a. The authorization is made in writing by a person described in Part II K 1;

b. The authorization specifies either an individual or a position having responsibility for the overall operation of the regulated facility or activity such as the position of plant manager, operator of a well or a well field, superintendent, or a position of equivalent responsibility. A duly authorized representative may thus be either a named individual or any individual occupying a named position; and

c. The written authorization is submitted to the department.

3. Changes to authorization. If an authorization under Part II K 2 is no longer accurate because a different individual or position has responsibility for the overall operation of the facility, a new authorization satisfying the requirements of Part II K 2 shall be submitted to the department prior to or together with any reports, or information to be signed by an authorized representative.

4. Certification. Any person signing a document under Part II K 1 or 2 shall make the following certification: "I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations."

L. Duty to comply. The permittee shall comply with all conditions of this general permit and 9VAC25-630. Any noncompliance with the general permit or 9VAC25-630 constitutes a violation of the State Water Control Law. Permit noncompliance is grounds for enforcement action; for permit termination, revocation and reissuance, or modification; or denial of a permit renewal application. Compliance with a permit during

its term constitutes compliance, for purposes of enforcement, with the State Water Control Law.

M. Duty to reapply. If the permittee wishes to continue an activity regulated by this permit after the expiration date of this permit, the permittee shall apply for and obtain a new permit. All permittees with a currently effective permit shall submit a new application at least 30 days before the expiration date of the existing permit unless permission for a later date has been granted by the board. The board shall not grant permission for applications to be submitted later than the expiration date of the existing permit.

N. Effect of a permit. This permit does not convey any property rights in either real or personal property or any exclusive privileges, nor does it authorize any injury to private property or invasion of personal rights, or any infringement of federal, state or local law or regulations.

O. State law. Nothing in this permit shall be construed to preclude the institution of any legal action under, or relieve the permittee from any responsibilities, liabilities, or penalties established pursuant to any other state law or regulation or under authority preserved by § 510 of the federal Clean Water Act. Except as provided in permit conditions on bypassing (Part II U), and upset (Part II V), nothing in this permit shall be construed to relieve the permittee from civil and criminal penalties for noncompliance.

P. Oil and hazardous substance liability. Nothing in this permit shall be construed to preclude the institution of any legal action or relieve the permittee from any responsibilities, liabilities, or penalties to which the permittee is or may be subject under §§ 62.1-44.34:14 through 62.1-44.34:23 of the State Water Control Law.

Q. Proper operation and maintenance. The permittee shall be responsible for the proper operation and maintenance of all treatment works, systems and controls which are installed or used to achieve compliance with the conditions of this permit. Proper operation and maintenance includes effective plant performance, adequate funding, adequate staffing, and adequate laboratory and process controls, including appropriate quality assurance procedures.

R. Disposal of solids or sludges. Solids, sludges or other pollutants removed in the course of treatment or management of pollutants shall be disposed of in a manner so as to prevent any pollutant from such materials from entering state waters.

S. Duty to mitigate. The permittee shall take all reasonable steps to minimize or prevent any pollutant management activity in violation of this permit which has a reasonable likelihood of adversely affecting human health or the environment.

T. Need to halt or reduce activity not a defense. It shall not be a defense for a permittee in an enforcement action that it would have been necessary to halt or reduce the permitted activity in order to maintain compliance with the conditions of this permit.

U. Bypass.

1. Prohibition. "Bypass" means intentional diversion of waste streams from any portion of a treatment works. A bypass of the treatment works is prohibited except as provided herein.
2. Anticipated bypass. If the permittee knows in advance of the need for a bypass, he shall notify the department promptly at least 10 days prior to the bypass. After considering its adverse effects, the board may approve an anticipated bypass if:
 - a. The bypass will be unavoidable to prevent loss of human life, personal injury, or severe property damage. "Severe property damage" means substantial physical damage to property, damage to the treatment facilities which causes them to become inoperable, or substantial and permanent loss of natural resources which can reasonably be expected to occur in the absence of a bypass. "Severe property damage" does not mean economic loss caused by delays in production; and
 - b. There are no feasible alternatives to bypass such as the use of auxiliary treatment facilities, retention of untreated waste, or maintenance during normal periods of equipment downtime. However, if bypass occurs during normal periods of equipment downtime or preventive maintenance and in the exercise of reasonable engineering judgment the permittee could have installed adequate backup equipment to prevent such bypass, this exclusion shall not apply as a defense.
3. Unplanned bypass. If an unplanned bypass occurs, the permittee shall notify the department as soon as possible, but in no case later than 24 hours, and shall take steps to halt the bypass as early as possible. This notification will be a condition for defense to an enforcement action that an unplanned bypass met the conditions in paragraphs U 2 a and b and in light of the information reasonably available to the permittee at the time of the bypass.

V. Upset. A permittee may claim an upset as an affirmative defense to an action brought for noncompliance. In any enforcement proceedings a permittee shall have the burden of proof to establish the occurrence of any upset. In order to establish an affirmative defense of upset, the permittee shall present properly signed, contemporaneous operating logs or other relevant evidence that shows:

1. That an upset occurred and that the cause can be identified;
2. That the permitted facility was at the time being operated efficiently and in compliance with proper operation and maintenance procedures;
3. That the 24-hour reporting requirements to the department were met; and

4. That the permittee took all reasonable steps to minimize or correct any adverse impact on state waters resulting from noncompliance with the permit.

W. Inspection and entry. Upon presentation of credentials, any duly authorized agent of the board may, at reasonable times and under reasonable circumstances:

1. Enter upon any permittee's property, public or private and have access to records required by this permit;
2. Have access to, inspect and copy any records that must be kept as part of permit conditions;
3. Inspect any facility's equipment (including monitoring and control equipment) practices or operations regulated or required under the permit; and
4. Sample or monitor any substances or parameters at any locations for the purpose of assuring permit compliance or as otherwise authorized by the State Water Control Law.

For purposes of this section, the time for inspection shall be deemed reasonable during regular business hours, and whenever the facility is involved in managing pollutants. Nothing contained herein shall make an inspection unreasonable during an emergency.

X. Permit actions. Permits may be modified, revoked and reissued, or terminated for cause upon the request of the permittee or interested persons, or upon the board's initiative. If a permittee files a request for a permit modification, revocation, or termination, or files a notification of planned changes, or anticipated noncompliance, the permit terms and conditions shall remain effective until the request is acted upon by the board. This provision shall not be used to extend the expiration date of the effective VPA permit.

Y. Transfer of permits.

1. Permits are not transferable to any person except after notice to the department. The board may require modification or revocation and reissuance of the permit to change the name of the permittee and to incorporate such other requirements as may be necessary. Except as provided in Part II Y 2, a permit may be transferred by the permittee to a new owner or operator only if the permit has been modified to reflect the transfer or has been revoked and reissued to the new owner or operator.

2. As an alternative to transfers under Part II Y 1, this permit shall be automatically transferred to a new permittee if:

- a. The current permittee notifies the department within 30 days of the transfer of the title to the facility or property;
- b. The notice includes a written agreement between the existing and new permittees containing a specific date for transfer of permit responsibility, coverage, and liability between them; and
- c. The board does not, within the 30-day time period, notify the existing permittee and the proposed new permittee of its intent to modify or revoke and reissue the permit. If the board notice is not received, the transfer is effective on the date specified in the agreement mentioned in Part II Y 2 b.

Z. Severability. The provisions of this permit are severable and, if any provision of this permit or the application of any provision of this permit to any circumstance is held invalid, the application of such provision to other circumstances and the remainder of this permit shall not be affected thereby.

Part III Pollutant Management and Monitoring Requirements for Poultry Waste End-Users and Poultry Brokers

A. Pollutant management authorization and monitoring requirements.

- 1. During the period beginning with the permittee's coverage under this general permit and lasting until the permit's expiration date, the permittee is authorized to manage pollutants at the location or locations identified in the registration statement and the permittee's approved nutrient management plan.
- 2. If poultry waste is land applied on land under the permittee's operational control, it shall be applied at the rates specified in the permittee's approved nutrient management plan.
- 3. Soil at the land application sites shall be monitored as specified below. Additional soils monitoring may be required in the permittee's approved nutrient management plan.

SOILS MONITORING				
PARAMETERS	LIMITATIONS	UNITS	MONITORING REQUIREMENTS	
			Frequency	Sample Type
pH	NL	SU	1/3 years	Composite*
Phosphorus	NL	ppm or lbs/ac	1/3 years	Composite*
Potash	NL	ppm or lbs/ac	1/3 years	Composite*
Calcium	NL	ppm or lbs/ac	1/3 years	Composite*
Magnesium	NL	ppm or lbs/ac	1/3 years	Composite*

NL = No limit, this is a monitoring requirement only.

SU = Standard Units

*Specific sampling requirements are outlined in the permittee's approved nutrient management plan.

4. Poultry waste shall be monitored as specified below. Additional waste monitoring may be required in the permittee's approved nutrient management plan.

WASTE MONITORING				
PARAMETERS	LIMITATIONS	UNITS	MONITORING REQUIREMENTS	
			Frequency	Sample Type
Total Kjeldahl Nitrogen	NL	*	1/year	Composite
Ammonia Nitrogen	NL	*	1/year	Composite
Total Phosphorus	NL	*	1/year	Composite
Total Potassium	NL	*	1/year	Composite
Moisture Content	NL	%	1/year	Composite

NL = No limit, this is a monitoring requirement only.

*Parameters for waste may be reported as a percent, as lbs/ton or lbs/1000 gallons, or as ppm where appropriate.

5. If waste from two or more poultry waste sources is commingled or stored then a sample that best represents the waste shall be used to calculate the nutrients available in the poultry waste for land application and shall be provided to the end-user of the waste.

6. Analysis of soil and waste shall be according to methods specified in the permittee's approved nutrient management plan.

7. All monitoring data required by Part III A shall be maintained on site in accordance with Part II B. Reporting of results to the department is not required; however, the monitoring results shall be made available to department personnel upon request.

B. Other requirements or special conditions.

1. Poultry waste storage facilities shall be designed and operated to (i) prevent point source discharges of pollutants to state waters except in the case of a storm event greater than the 25-year, 24-hour storm and (ii) provide adequate waste storage capacity to accommodate periods when the ground is ice covered, snow covered or saturated, periods when land application of nutrients should not occur due to limited or nonexistent crop nutrient uptake, and periods when physical limitations prohibit the land application of waste.

2. Poultry waste shall be stored according to the approved nutrient management plan and in a manner that prevents contact with surface water and ground water. Poultry waste that is stockpiled outside for more than 14 days shall be kept in a facility or at a site that provides adequate storage. Adequate storage shall, at a minimum, include the following:

- a. Poultry waste shall be covered to protect it from precipitation and wind;
- b. Storm water shall not run onto or under the stored poultry waste;
- c. A minimum of two feet separation distance to the seasonal high water table or an impermeable barrier shall be used under the stored poultry waste. All poultry waste storage facilities that use an impermeable barrier shall maintain a minimum of one foot separation between the seasonal high water table and the impermeable barrier. "Seasonal high water table" means that portion of the soil profile where a color change has occurred in the soil as a result of saturated soil conditions or where soil concretions have formed. Typical colors are gray mottlings, solid gray, or black. The depth in the soil at which these conditions first occur is termed the seasonal high water table. Impermeable barriers must be constructed of at least 12 inches of compacted clay, at least four inches of reinforced concrete, or another material of similar structural integrity that has a minimum permeability rating of 0.0014 inches per hour (1×10^{-6} centimeters per second); and
- d. For poultry waste that is not stored under roof, the storage site must be at least 100 feet from any surface water, intermittent drainage, wells, sinkholes, rock outcrops, and springs.

3. Poultry waste storage facilities constructed after December 1, 2000, shall not be located within a 100-year floodplain unless there is no land available outside the floodplain on which to construct the facility and the facility is constructed so that the poultry waste is stored above the 100-year flood elevation or otherwise protected from floodwaters through the construction of berms or similar best management flood control structures.

4. When a poultry waste end-user or poultry waste broker receives, possesses, or has control over more than 10 tons of transferred poultry waste in any 365-day period, he shall provide the person from whom he received the poultry waste with:

- a. The end-user or broker name, address, and permit number;
- b. If the recipient of the poultry waste is an end-user, then he shall also provide the person from whom he received the poultry waste the following information:

(1) The locality in which the recipient intends to utilize the waste (i.e., nearest town or city and zip code);

(2) The name of the stream or waterbody if known to the recipient that is nearest to the waste utilization or storage site; and

c. Written acknowledgement of receipt of:

(1) The waste;

(2) The nutrient analysis of the waste; and

(3) The fact sheet.

If the person receiving the waste is a poultry waste broker, then he shall also certify in writing that he will provide a copy of the nutrient analysis and fact sheet to each end user to whom he transfers poultry waste.

5. When a poultry waste broker transfers or hauls poultry waste to other persons, he shall provide the person who received the poultry waste with:

a. Broker name, address, and permit number;

b. The nutrient analysis of the waste; and

c. A fact sheet.

6. When a poultry waste end-user or poultry waste broker is a recipient of more than 10 tons of transferred poultry waste in any 365-day period, the poultry waste end-user or poultry waste broker shall keep a record regarding the transferred poultry waste:

a. The following items shall be recorded regarding the source of the transferred poultry waste:

(1) The source name and address;

(2) The amount of poultry waste received from the source; and

(3) The date the poultry waste was acquired.

b. The following items shall be recorded regarding the recipient of the transferred poultry waste:

- (1) The recipient name and address;
- (2) The amount of poultry waste received by the person;
- (3) The date of the transaction;
- (4) The nutrient content of the waste;
- (5) The locality in which the recipient intends to utilize the waste (i.e., nearest town or city and zip code);
- (6) The name of the stream or waterbody if known to the recipient that is nearest to the waste utilization or storage site; and
- (7) The signed waste transfer records form acknowledging the receipt of the following:
 - (a) The waste;
 - (b) The nutrient analysis of the waste; and
 - (c) A fact sheet.

7. End-users or brokers shall maintain the records required by Part III B 6 for at least three years after the transaction and make them available to department personnel upon request.

8. If poultry waste is also generated by this facility it shall not be applied to fields owned by or under the operational control of either the permittee or a legal entity in which the permittee has an ownership interest unless the fields are included in the permittee's approved nutrient management plan.

9. Poultry feeding operations that use disposal pits for routine disposal of daily mortalities shall not be covered under this general permit. The use of a disposal pit for routine disposal of daily poultry mortalities by a permittee shall be a violation of this permit. This prohibition does not apply to the emergency disposal of dead poultry done according to regulations adopted pursuant to § 3.2-6002 of the Code of Virginia or Chapter 14 (§ 10.1-1400 et seq.) of Title 10.1 of the Code of Virginia.

10. The permittee shall implement a nutrient management plan (NMP) developed by a certified nutrient management planner in accordance with § 10.1-104.2 of the Code of Virginia and approved by the Department of Conservation and Recreation and maintain the plan on site. The terms of the NMP shall be enforceable through this permit. The NMP shall contain at a minimum the following information:

- a. Site map indicating the location of the waste storage facilities and the fields where waste will be applied by the permittee. The location of fields as identified in Part III B 8 shall also be included;
- b. Site evaluation and assessment of soil types and potential productivities;
- c. Nutrient management sampling including soil and waste monitoring;
- d. Storage and land area requirements for the permittee's poultry waste management activities;
- e. Calculation of waste application rates; and
- f. Waste application schedules.

11. When the poultry waste storage facility is no longer needed, the permittee shall close it in a manner that: (i) minimizes the need for further maintenance and (ii) controls, minimizes, or eliminates, to the extent necessary to protect human health and the environment, the postclosure escape of uncontrolled leachate, surface runoff, or waste decomposition products to the ground water, surface water, or the atmosphere. At closure, the permittee shall remove all poultry waste residue from the waste storage facility. At waste storage facilities without permanent covers and impermeable ground barriers, all residual poultry waste shall be removed from the surface below the stockpile when the poultry waste is taken out of storage. Removed waste materials shall be utilized according to the NMP.

12. Nitrogen application rates contained in the NMP shall be established in accordance with 4VAC5-15-150 A 2. The application of poultry waste shall be managed to minimize runoff, leachate, and volatilization losses, and reduce adverse water quality impacts from nitrogen.

13. Phosphorus application rates contained in the NMP shall be established in accordance with 4VAC5-15-150 A 2. The application of poultry waste shall be managed to minimize runoff and leaching and reduce adverse water quality impacts from phosphorous.

14. The timing of land application of poultry waste shall be according to the schedule contained in the NMP, except that no waste may be applied to ice covered or snow covered ground or to soils that are saturated. Poultry waste may be applied to frozen ground within the NMP scheduled times only under the following conditions:

- a. Slopes are not greater than 6.0%;

- b. A minimum of a 200-foot vegetative or adequate crop residue buffer is maintained between the application area and all surface water courses;
- c. Only those soils characterized by USDA as "well drained" with good infiltration are used; and
- d. At least 60% uniform cover by vegetation or crop residue is present in order to reduce surface runoff and the potential for leaching of nutrients to ground water.

15. Poultry waste shall not be land applied within buffer zones. Buffer zones at waste application sites shall, at a minimum, be maintained as follows:

- a. Distance from occupied dwellings not on the permittee's property: 200 feet (unless the occupant of the dwelling signs a waiver of the buffer zone);
- b. Distance from water supply wells or springs: 100 feet;
- c. Distance from surface water courses: 100 feet (without a permanent vegetated buffer) or 35 feet (if a permanent vegetated buffer exists). Other site-specific conservation practices may be approved by the department that will provide pollutant reductions equivalent or better than the reductions that would be achieved by the 100-foot buffer;
- d. Distance from rock outcropping (except limestone): 25 feet;
- e. Distance from limestone outcroppings: 50 feet; and
- f. Waste shall not be applied in such a manner that it would discharge to sinkholes that may exist in the area.

16. The following records shall be maintained:

- a. The identification of the land application field sites where the waste is utilized or stored;
- b. The application rate;
- c. The application dates; and
- d. What crops have been planted.

These records shall be maintained on site for a period of three years after recorded application is made and shall be made available to department personnel upon request.

17. Each poultry waste end-user or poultry waste broker covered by this general permit shall complete a training program offered or approved by the department within one year of filing the registration statement for general permit coverage. All permitted poultry waste end-users or permitted poultry waste brokers shall complete a training program at least once every five years.

9 VAC 25-630-60. Tracking and Accounting Requirements for Poultry Waste Brokers.

A. Poultry waste brokers shall register with the department by providing their name and address on a form approved by the department prior to transferring poultry waste.

B. When a poultry waste broker transfers to another person more than 10 tons of poultry waste in any 365-day period, the poultry waste broker shall provide information regarding the transfer of poultry waste to both the source and recipient of the waste.

1. The broker name and address shall be provided to the source of the transferred poultry waste:

2. The following items shall be provided to the recipient of the transferred poultry waste:

a. The broker name and address;

b. The most recent nutrient analysis of the poultry waste; and

c. A fact sheet.

C. When a poultry waste broker transfers to another person more than 10 tons of poultry waste in any 365-day period, the poultry waste broker shall keep records regarding the transferred poultry waste.

1. The following items shall be recorded regarding the source of the transferred poultry waste:

a. The source name and address;

b. The amount of the poultry waste received from the source; and

c. The date the poultry waste was acquired.

2. The following items shall be recorded regarding the recipient of the transferred poultry waste:

- a. The recipient name and address;
- b. The amount of poultry waste received by the person;
- c. The date of the transaction;
- d. The nutrient content of the waste;
- e. The locality in which the recipient intends to utilize the waste (i.e., nearest town or city and zip code);
- f. The name of the stream of waterbody if known to the recipient that is nearest to the waste utilization or storage site; and
- g. The signed waste transfer records form acknowledging the receipt of the following:
 - (1) The waste;
 - (2) The nutrient analysis of the waste; and
 - (3) A fact sheet.

D. Poultry waste brokers shall submit copies of the records required by subsection C of this section, to the department annually using a form approved by the department. Records for the preceding calendar year shall be submitted to the department not later than February 15. Poultry waste brokers shall maintain the records required by subsection C of this section for at least three years and make them available to department personnel upon request.

E. If waste from two or more poultry waste sources is commingled or stored then a sample that best represents the waste shall be used to calculate the nutrients available in the poultry waste for land application and shall be provided to the end-user of the waste.

F. If the poultry waste broker land applies the poultry waste for the end-user then the broker shall provide the end-user with the records regarding land application as required by 9VAC25-630-70.

G. Poultry waste brokers shall complete a training program offered or approved by the department within one year of registering with the department. Poultry waste brokers shall complete a training program at least once every five years.

H. Any duly authorized agent of the board may, at reasonable times and under reasonable circumstances, enter any establishment or upon any property, public or

private, for the purpose of obtaining information or conducting surveys or investigations necessary in the enforcement of the provisions of this regulation.

9 VAC 25-630-70. Tracking and Accounting Requirements for Poultry Waste End-Users.

A. When a poultry waste end-user is the recipient of more than 10 tons of poultry waste in any 365-day period, the end-user shall maintain records regarding the transfer and land application of poultry waste.

1. The poultry waste end-user shall provide the permitted poultry grower or poultry waste broker with the following items:
 - a. End-user name and address;
 - b. The locality in which the end-user intends to utilize the waste (i.e., nearest town or city and zip code);
 - c. The name of the stream or waterbody if known to the end-user that is nearest to the waste utilization or storage site; and
 - d. Written acknowledgement of receipt of:
 - (1) The waste;
 - (2) The nutrient analysis of the waste; and
 - (3) A fact sheet.
2. The poultry waste end-user shall record the following items regarding the waste transfer:
 - a. The source name, address, and permit number (if applicable);
 - b. The amount of poultry waste that was received;
 - c. The date of the transaction;
 - d. The final use of the poultry waste;
 - e. The locality in which the waste was utilized (i.e., nearest town or city and zip code); and
 - f. The name of the stream or waterbody if known to the recipient that is nearest to the waste utilization or storage site.

Records regarding poultry waste transfers shall be maintained on site for a period of three years after the transaction. All records shall be made available to department personnel upon request.

3. If waste is land applied, the poultry waste end-user shall keep a record of the following items regarding the land application of the waste:

- a. The nutrient analysis of the waste;
- b. Maps indicating the poultry waste land application fields and storage sites;
- c. The land application rate;
- d. The land application dates;
- e. What crops were planted;
- f. Soil test results, if obtained;
- g. NMP, if applicable; and
- h. The method used to determine the land application rates (i.e., phosphorus crop removal, standard rate, soil test recommendations, or a nutrient management plan).

Records regarding land application of poultry waste shall be maintained on site for a period of three years after the recorded application is made. All records shall be made available to department personnel upon request.

B. Any duly authorized agent of the board may, at reasonable times and under reasonable circumstances, enter any establishment or upon any property, public or private, for the purpose of obtaining information or conducting surveys or investigations necessary in the enforcement of the provisions of this regulation.

9 VAC 25-630-80. Utilization and Storage Requirements for Transferred Poultry Waste.

A. Any poultry waste end-user or poultry waste broker who receives poultry waste shall comply with the requirements outlined in the following sections.

[. . .]

C. Land application requirements. Any poultry waste end-user or poultry waste broker who (i) receives five or more tons of poultry waste in any 365-day period and (ii) land applies poultry waste shall follow appropriate land application requirements as outlined

in this section. The application of poultry waste shall be managed to minimize adverse water quality impacts.

1. The maximum application rates can be established by the following methods:

a. Phosphorus crop removal application rates can be used when:

(1) Soil test phosphorus levels do not exceed the values listed in the table below:

Region	Soil test P (ppm) VPI & SU Soil test (Mehlich I) *
Eastern Shore and Lower Coastal Plain	135
Middle and Upper Coastal Plain and Piedmont	136
Ridge and Valley	162
* If results are from another laboratory the Department of Conservation and Recreation approved conversion factors must be used.	

(2) The phosphorus crop removal application rates are set forth by regulations promulgated by the Department of Conservation and Recreation in accordance with § 10.1-104.2 of the Code of Virginia.

b. Poultry waste may be applied to any crop at the standard rate of 1.5 tons per acre once every three years when:

(1) In the absence of current soil sample analyses and recommendations; and

(2) Nutrients have not been supplied by an organic source, other than pastured animals, to the proposed land application sites within the previous three years of the proposed land application date of poultry waste.

c. Soil test recommendations can be used when:

(1) Accompanied by analysis results for soil tests that have been obtained from the proposed field or fields in the last three years;

(2) The analytical results are from procedures in accordance with 4VAC5-15-150 A 2 f; and

(3) Nutrients from the waste application do not exceed the nitrogen or phosphorus recommendations for the proposed crop or double crops. The recommendations shall be in accordance with 4VAC5-15-150 A 2 a.

d. A nutrient management plan developed by a certified nutrient management planner in accordance with § 10.1-104.2 of the Code of Virginia.

2. The timing of land application of poultry waste shall be appropriate for the crop, and in accordance with 4VAC5-15-150 A 4, except that no waste may be applied to ice covered or snow covered ground or to soils that are saturated. Poultry waste may be applied to frozen ground under the following conditions:

- a. Slopes are not greater than 6.0%;
- b. A minimum of a 200-foot vegetative or adequate crop residue buffer is maintained between the application area and all surface water courses;
- c. Only those soils characterized by USDA as "well drained" with good infiltration are used; and
- d. At least 60% uniform cover by vegetation or crop residue is present in order to reduce surface runoff and the potential for leaching of nutrients to ground water.

3. Poultry waste shall not be land applied within buffer zones. Buffer zones at waste application sites shall, at a minimum, be maintained as follows:

- a. Distance from occupied dwellings: 200 feet (unless the occupant of the dwelling signs a waiver of the buffer zone);
- b. Distance from water supply wells or springs: 100 feet;
- c. Distance from surface water courses: 100 feet (without a permanent vegetated buffer) or 35 feet (if a permanent vegetated buffer exists). Other site-specific conservation practices may be approved by the department that will provide pollutant reductions equivalent or better than the reductions that would be achieved by the 100-foot buffer;
- d. Distance from rock outcropping (except limestone): 25 feet;
- e. Distance from limestone outcroppings: 50 feet; and
- f. Waste shall not be applied in such a manner that it would discharge to sinkholes that may exist in the area.

D. Poultry waste end-users and poultry waste brokers shall maintain the records demonstrating compliance with the requirements of subsections B and C for at least three years and make them available to department personnel upon request.

E. The activities of the poultry waste end-user or poultry waste broker shall not contravene the Water Quality Standards, as amended and adopted by the board, or any provision of the State Water Control Law (§ 62.1-44 et seq. of the Code of Virginia).

F. Any duly authorized agent of the board may, at reasonable times and under reasonable circumstances, enter any establishment or upon any property, public or private, for the purpose of obtaining information or conducting surveys or investigations necessary in the enforcement of the provisions of this regulation.
