

State Water Statutes

Editor's Note: *Water law encompasses a variety of issues that may be more specifically addressed in other reading rooms. For example, to locate additional statutes related to the Clean Water Act and other environmentally-related statutes, please consult the [Clean Water Act](#) or [Environmental Law Reading Rooms](#). Every effort has been made to include all water-related statutes that affect agriculture; however, no representation can be made as to the completeness of this listing due to the broad nature of the subject. Nine states have water-related constitutional provisions in addition to statutes. These constitutional provisions have been listed separately under the Major Statutes section of the Water Law Reading Room.*
